

Aqualine AS (Ltd), Norwegian company

Turnover 32 mill €
Employees 30
Customers world wide

Skills

Offshore equipment for fish farming

- **Certified supplier of mooring equipment**
- **Certified Plastic Cage systems**

Our main competence are equipment offshore.

**Aqualine AS expertise
is a high level of offshore maritime
understanding and experience-
combined with high engineering skills.**

**Especially we have developed, built and
delievered offshore floating structures
and mooring systems since 1980**

In the near future:

We are introducing offshore platform for fishfarming

-Main purpose is to serve offshore fish farming and importantly to take offshore fish farming to the next level.

**The equipment on the platform needs electricity.
Today this energy is produced by diesel generators**

Idea:

We are interested in finding a way to produce renewable electricity on our offshore platforms

**We wish to find an interesting project
where we can join a consortium. Therefore
we hope that someone will contact us**
