

Studies

Biomass for Fuel Fibre, Fertiliser and Feed

Agro-industrial Reports

Contents

Introduction

Reports *(click on each title to view)*

1. **Thermal Biomass** conversion and utilisation - Biomass Information Systems
2. Ways to Improve the Quality of Domestically Produced Proteins for use in the **Animal Feed** Industry
3. Production of **Thermo-Bioplastics and Fibres** based mainly on Biological Materials
4. Soil Fertility and **Cultivation of Energy Crops**
5. **Lignocellulosic energy crops** in different agricultural scenarios
6. **Integrated biomass** system
7. **Industrial Fibre Crops** - Increased Application of Domestically Produced Plant Fibres in Textiles, Pulp and Paper Production, and Composite Materials
8. **Biomass Gasification** in Europe
9. **Bioconversion** Assessment study
10. **Biofuels** - Application of Biologically Derived Products as Fuels or Additives in Combustion Engines
