

EU AGRI MAPPING

Walter Müller

walter.mueller@solnet.ch

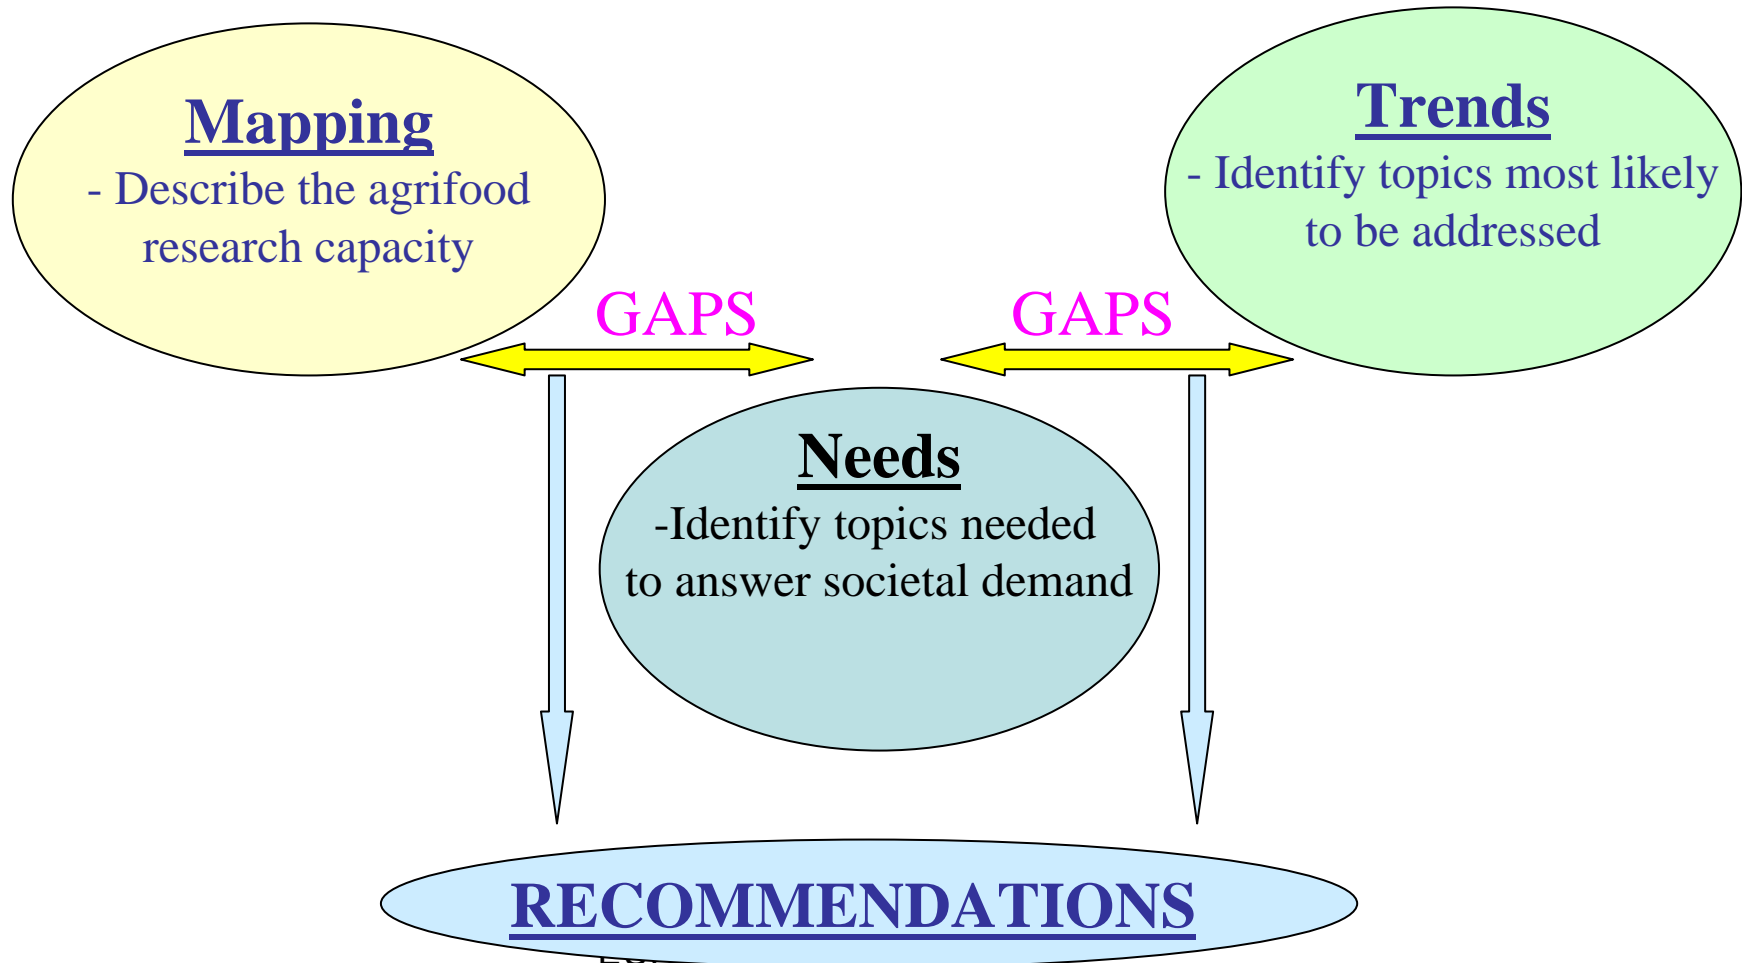

Why another mapping project?

- **Every country has his own history** with his own political solutions in organising his own agrifood research
- There is a strong trend toward international networks (FP6/FP7, Bologna reform, mobility). **We need partners.**
- **A common portal** with a minimum of data and links to national homepages, specifically to the new EU-member states, **could facilitate communication.**

Focus of the project

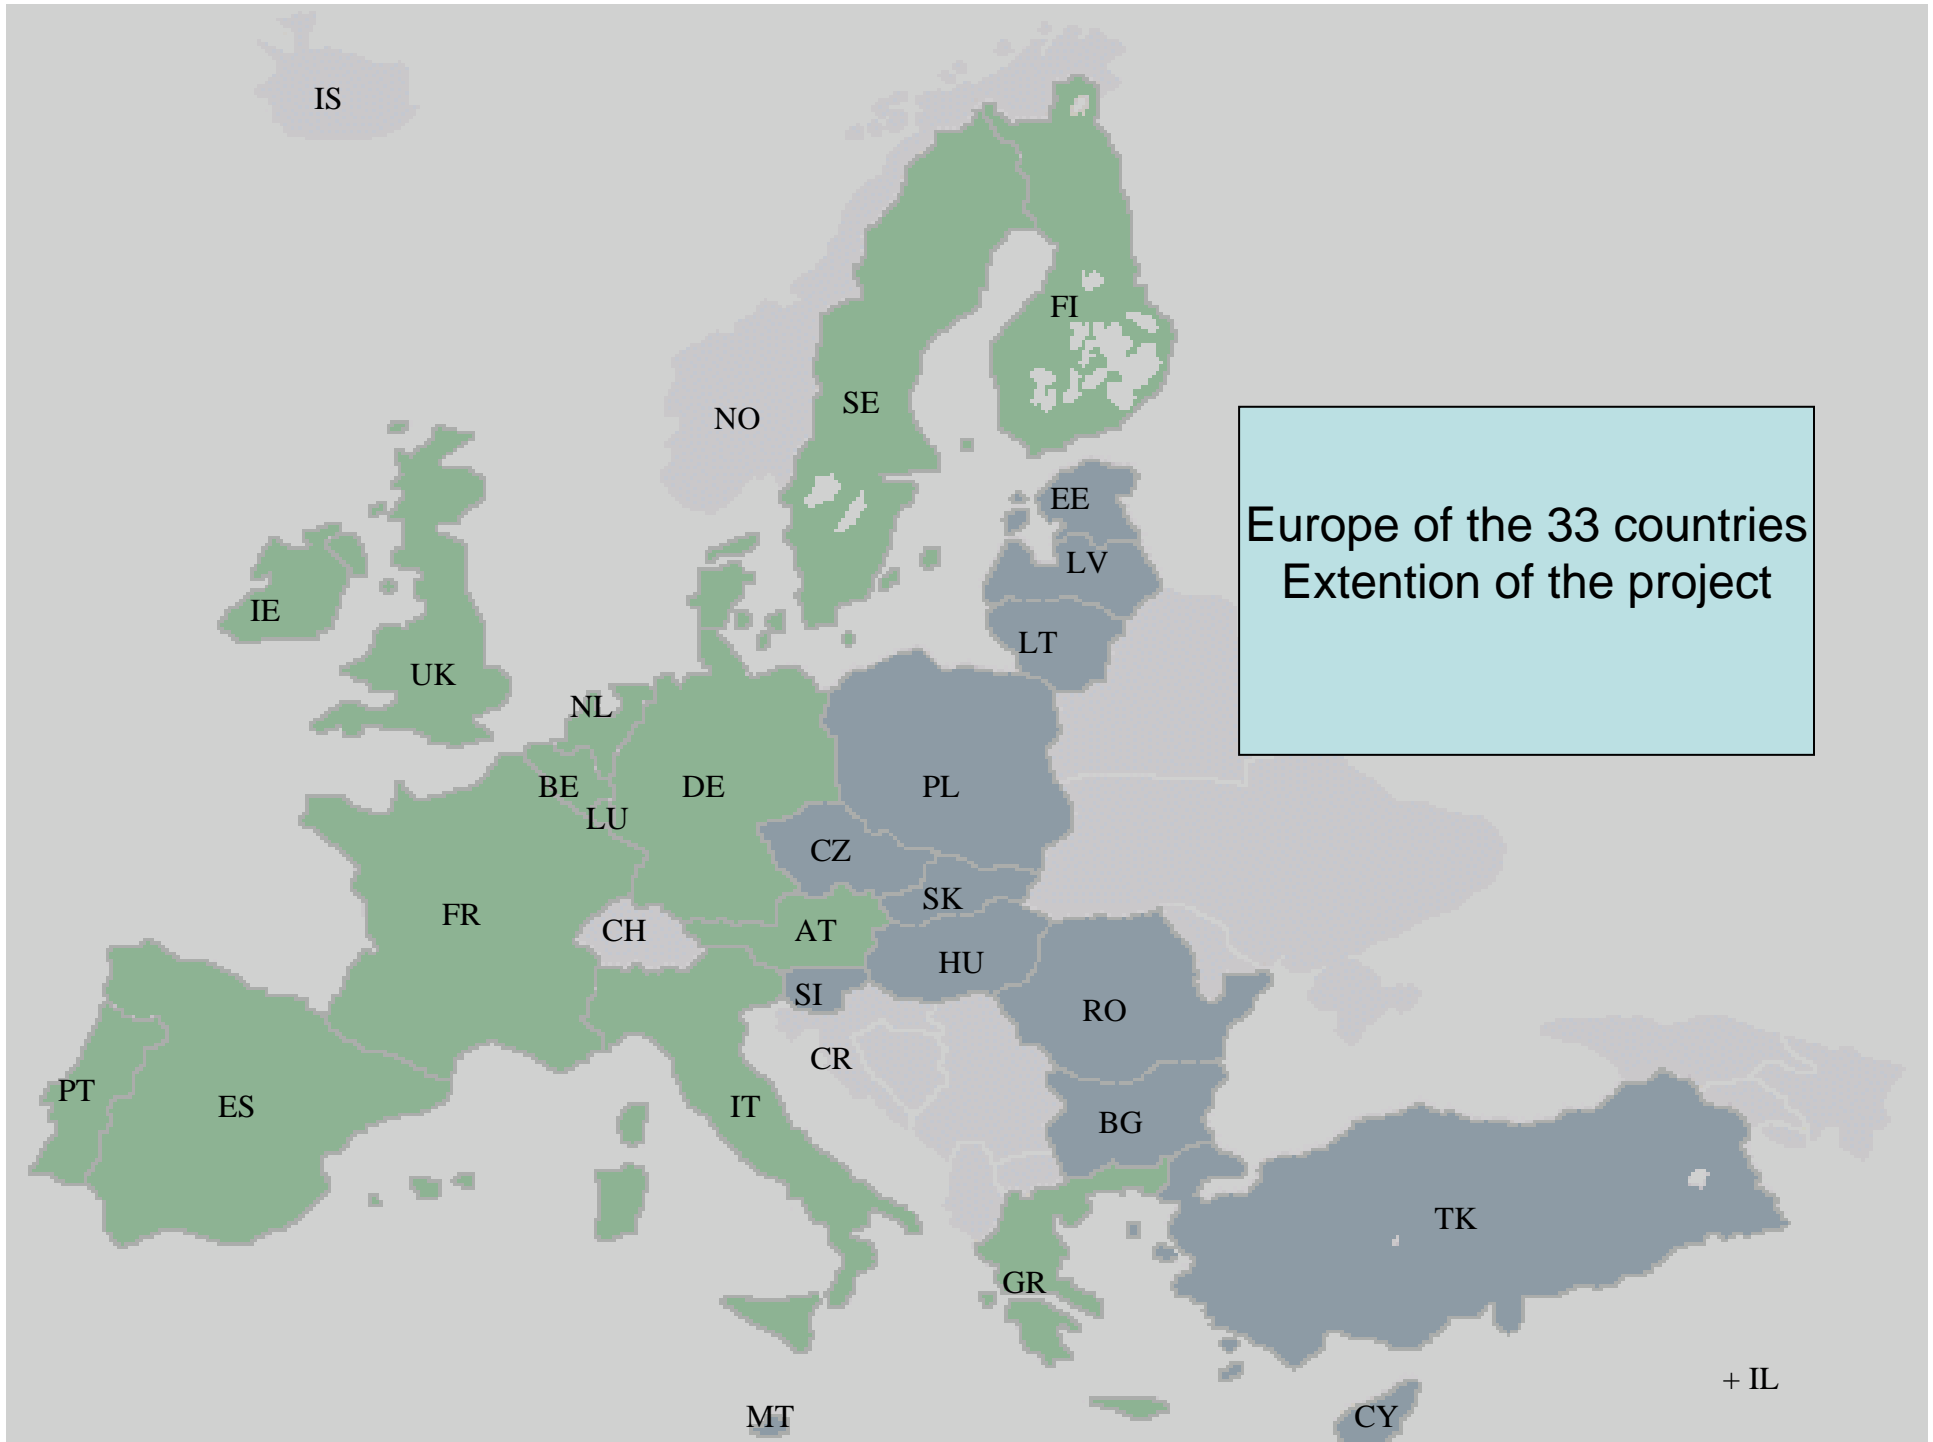

- Mapping: Introducing **an actual database** for the major agrifood research establishments in Europe (name, size, research activities)
- Investigation of **trends and needs** in agrifood research in 33 European countries
- Formulation of **recommendations** for the period from now until 2020

Overall approach

Organization of the project

- Lead: olivier.chartier@euroquality.fr
- Partners:
 - **Experts** to facilitate the communication to SCAR, for bibliometric analysis etc.
 - **4 subcontractors** for EU 15 + 4 associated countries (Iceland, Israel, Norway, Switzerland)
 - **14 teams** of representatives for EU 10 + 4 candidate countries (Bulgaria, Croatia, Romania, Turkey)

Work Programme

- **Duration: 01.01.2006 – 31.12.2007**
- **Workflow:**
 - - **Methodology:** Completed
 - - **Database and Web tool:** Completed
 - - **Trends and Needs:** Ongoing
 - - **Mapping:** Ongoing
 - - **Recommandations:** Planned
- **Please contact the national SCAR-Representatives!**

Definition of Agrifood

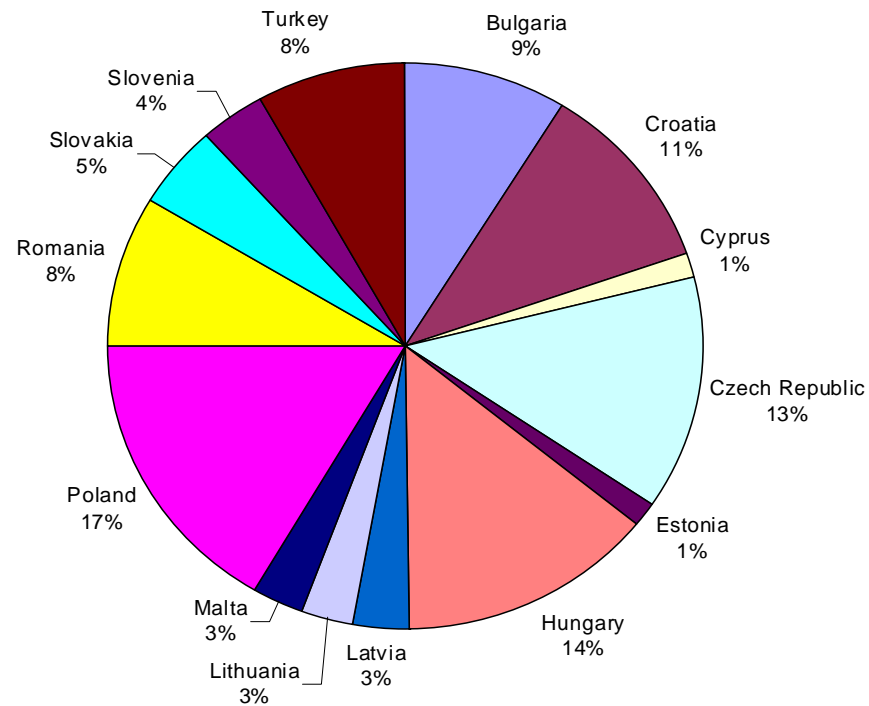

- **Subtitles**

- Plant breeding and biotechnology
- Plant production and protection
- Animal production and husbandry
- Animal health and welfare

- Aquaculture and fisheries
- Forestry and landscape
- Management of natural and biological resources
- Engineering, mechanisation, ICT
- Food technology, human nutrition and consumer concerns

Example of ongoing work

Distribution of research groups

EURAGRI 28.09.2006

Overview

AgriFoodResearch.net is an information platform on the European agricultural and food research landscapes. The project is supported by the European Commission (DG Research), its implementation is followed by the Standing Committee for Agricultural Research ([SCAR](#)).

This web site is under construction. The full version will be available in September 2006. The current version of the web site contains:

- A [Database](#) of research groups and researchers in the New Member States and in the Candidate Countries
- An overview of running [European initiatives](#) that contribute to define the future of the European agrifood research landscape
- [Information](#) on the project

Researchers are invited to register their profile into the database [here](#)

Expected results

- A good **mapping concept** for the EU member states, including the actual candidate and associated countries in the field of agrifood research
- **Improvement (efficiency and effectivity) of agrifood research** in Europe through better international co-operation of researchers
- **Strengthening of the competition of European agrifood research in the context of global challenge**
