Project funded under the Socio-economic Sciences and Humanities

# Feeding the use of foresight

- Identification of new issues, not addressed by policy
- Concise reports on emerging issues
- Connection to the actual use by policymakers
- Diverse dissemination activities on
  - Emerging issues
  - Methodological results

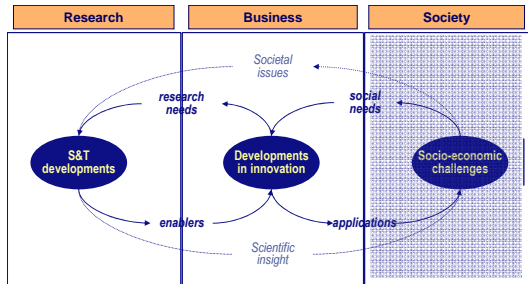

Project funded under the Socio-economic Sciences and Humanities

# Forward looking and great challenges

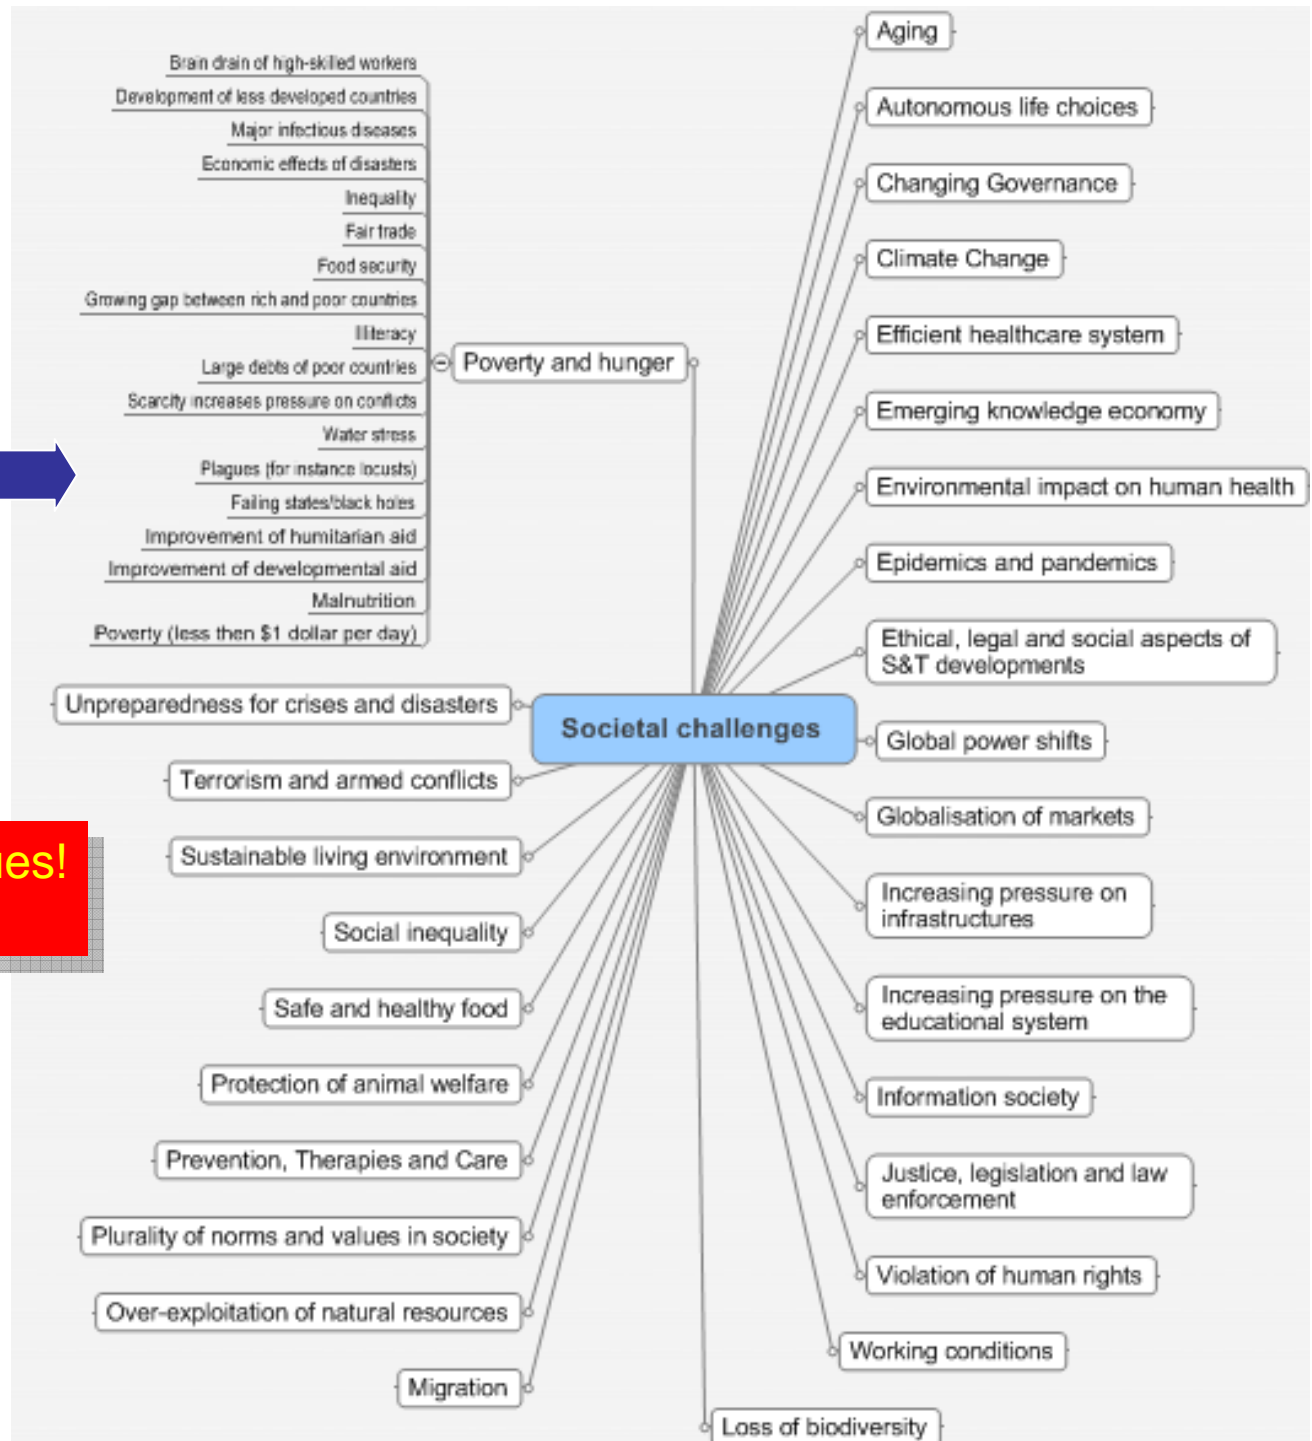

Project funded under the Socio-economic Sciences and Humanities

Over 400 societal issues!

Project funded under the Socio-economic Sciences and Humanities

# How to organize forward looking process

- Create a sound Great Challenges taxonomy
- Create an content oriented infrastructure for mutual learning
- Translate available information (reports) to “knowledge” (accessible)
- Set up EC teams for national and ERA support
