Glossary ............................................................... 17
Introduction

During the negotiation process, certain details are agreed between the participants and the Commission, and further information is collected. Some of this information is needed to prepare the grant agreement, other information is needed for the Commission to manage and report the proposal's execution.

This document describes the application “NEF” (Negotiation Form Facility):
an online tool used during the negotiation process to collect legal and financial data as well as other background information on the participants related to the proposal.

The data collected includes:

- General information about the project (including reporting periods and eligible costs);
- Information on the coordinator:
  - Including Bank account;
- Information on the coordinator and all the participants:
  - Authorised representatives;
  - Contact persons;
  - Eligible costs and requested EC contribution.

NEF’s main actors

The coordinators and the Commission Project/scientific Officers are NEF’s main users:

- the coordinator views and modifies his information by using the online forms;
- the E.C. Officer to verify the changes and make the necessary corrections if needed.

The Coordinator’s actions

Entering NEF, the coordinator should collect and verify the accurateness of the information, about his/her organisation and about the other concerned participants from the consortium, which means:

- verify the legal data and status of all participants;
- define the authorised representative who will sign the documents;
- gather bank account data;
- adjust the eligible cost according to the negotiation parameters, or make correction of the costs;
- be aware of the reporting periods.
Systems requirements for using NEF

NEF operates on-line, without saving anything on the computer.

The systems requirements are:

- a computer with a 600 MHz processor;
- an Internet connection, preferably 512 Kb/s or higher;
- a screen with a minimal resolution of 1024 x 768;
- either Internet Explorer 6.0 (or above), Firefox (1.x or 2.x), Opera (9.0 or above) or Safari (1.3 or above), other web browsers may work but are not tested;
- either Windows (2000, XP and Vista) or Macintosh (Mac OS X), other operating systems may work but are not tested.

Where can the coordinators and participants get support?

The coordinators and participants looking for technical help with NEF can ask the FP7 Help Desk by sending an e-mail to EC-FP7-IT-HELPDESK@ec.europa.eu.

For proposal related questions (i.e. which information should be submitted?), the EC officers are the right persons to contact. Their names appear on the invitation to negotiate e-mails (see below in this text, Figure 2).

Alternatively, contact the person mentioned in the negotiation mandate accompanying the letter inviting you to negotiations.

When does the coordinator start using NEF?

The negotiation with NEF proceeds in a series of “negotiation sessions”. Each session is opened by the responsible Commission officer (EC project officer or EC administrative officer). The opening of a session will trigger an automatic e-mail invitation including a hyperlink to NEF and a session's access key.

A negotiation session is a period during which the coordinator is allowed to change the data of a proposal submitted by his/her organisation or a consortium of participants.

Figure 1 below shows the schema of the negotiation process with NEF.

The Coordinator can only access NEF while a negotiation session for his proposal is open. If a coordinator has several proposals, the proposals will each have their own negotiation sessions and their own “Access key”. During a negotiation session, the coordinator can log in and out of the system repeatedly. When all the data for the negotiation session has been entered, the coordinator can terminate the negotiation session by submitting the changes to the Commission. When the changes are submitted, the data become read only in NEF for the coordinator. The Commission will review the changes and may decide to open a new negotiation session. If the EC officer has added comments to the preceding session these comments will appear in the new invitation to negotiate 's e-mail that the coordinator will receive.
The Commission initiates the negotiation session.

An electronic mail is sent to the project coordinator, with proposal number and access key.

1. The project coordinator (CO) receives the email enabling connection to the negotiation system.

2. The project coordinator goes on the Internet and logs on to the negotiation system, NEP.

3. The project coordinator verifies or corrects the information in NEP.

4. A submission action is performed on the system by the project coordinator.

5. The project coordinator submits the information to the Commission online.

6. The Commission reviews the information and ends the cycle or initiates another negotiation session.

Figure 1
How to use NEF?

**Invitation to participate to a negotiation session**

When a negotiation session is created by the EC project officer or EC administrative officer, an invitation by e-mail is dispatched to the coordinator. The e-mail is sent to the person who submitted the proposal. If that is no longer the correct person, the new contact person should contact his/her EC officer. This invitation e-mail, entitled "Invitation to negotiate" (see Figure 2), contains a link to NEF, the proposal’s identifying number and an access key, which will be used by the coordinator to open and update the proposal:

![Figure 2](image)

By Clicking on the link given in the e-mail, the "Welcome to the negotiation" screen will appear (see Figure 3).

**Logging in**

On the "Welcome to the negotiation" screen, the coordinator copies the project number in the appropriate field and fills in the blank fields of the access key according to the key given in the e-mail (fields marked by a greyed cross remain unchanged).

He has only to fill in the empty cells with the corresponding number of each missing position. Each time he connects, he will get different cells to fill in with four different digits. To avoid double usage of a same access key, for recent proposals the coordinator will receive also a Participant's access key in the invitation email. This way the coordinator can give the participant access key to a participant who wishes it keeping his own key & making the double login possible (figure 5). **However, the participant will NOT be able to Submit any filled in & saved data to the E.C. Only the coordinator with his login can submit data to the E.C.**

![figure 2 bis](image)
See the following example:

Project number 201474 and Access key 86257-49115-10535-11831

By pressing the “Login” button, the coordinator enters the negotiation session. The session being opened, only the coordinator is allowed to add/verify/change the data & then close this negotiation session. When logging in, NEF opens on the main Project screen (see Figure 5).
NeF User’s Guide for Coordinators and Participants (2008-12-01) 8

Before explaining how to fill in, correct or verify the data, here is some information valid throughout the application. It concerns field explanations, calendar, error messages, and mandatory fields, saving of the data and printing of PDF files.

**Field explanations**
A blue question mark at the right side of a field contains an explanation regarding this field. The explanation appears when placing the cursor on the question mark (see Figure 6):

![Figure 6](image)

**Calendar**
Some dates have to be inserted in NEF.

For this purpose, a small calendar icon appears on the screen (see Figure 7):

![Figure 7](image)

Clicking on it allows selection of the appropriate date (see Figure 8):

![Figure 8](image)

The double quotation marks to the left or to the right allow the navigation to the previous or to the next years while the single quotation marks to the left or to the right allow the navigation to the previous or to the next months.

**Error messages**
Data consistency is checked. Any incoherent data is marked with a red exclamation mark and refused at saving (see Figure 9):

![Figure 9](image)
**Mandatory fields**
Mandatory fields are marked up in red or with an exclamation mark besides. (see Figure 10):

![Figure 10](image)

**Saving**
Changes are saved by clicking on the “Save Changes” button on the top of the screen (see Figure 11):

![Figure 11](image)

This action is followed by a return to the summary accessible by clicking on the “Return to Summary” button on the top of the screen. **Clicking on “Return to Summary” without first clicking on “Save” means that the modified data hasn't been saved and will therefore be lost.**

**Printing PDF files**
When a negotiation session is open, the coordinator can generate a Grant Agreement Preparation Forms file in PDF format (and if required, print it) activating the link “PDF preview” on the Project screen (see Figure 12) which brings him/her to the Grant Agreement Preparation Forms (GPF).

![Figure 12](image)
How to verify and correct general project data?

1. Follow the link “General information” under the heading “Project” on the Project screen;

2. The “General information” screen appears (see Figure 13):

3. Fill in, verify or correct the project
   – Acronym *;
   – Title *;
   – Starting date;
   – Duration;
   – Abstract *;
   – Call (part) identifier *;
   – Activity codes *;
   – and Free keywords fields respecting the constraints if any (see Figure 14):

(*) These fields should only be changed in exceptional cases; check with your EC officer.

4. Save the changes and return to the summary.
How to verify and correct the reporting periods?

1. Follow the link “Reporting periods” under the heading “Project” on the Project screen;

2. The “Reporting periods” screen appears (see Figure 15):

![Figure 15](image)

3. Change the project duration if necessary by filling in the appropriate field (see Figure 16):

![Figure 16](image)

4. Add a new period by clicking on the “New period” button or delete a selected period by clicking on the “Delete selected period” button (see Figure 17):

![Figure 17](image)

Please see also the Negotiation Guidance Notes:

5. Save the changes and return to the summary.

Note that financial information is changed as part of the coordinator or participant data.
How to verify and complete the coordinator's data?

1. Follow one of the links under the heading “Coordinator” on the Project screen (see Figure 18):

![Figure 18](image)

2. Each of these links leads to a further detailed information screen with information about the coordinator from the Commission participant database PDM and from the proposal stage;

3. In each of the subsidiary screens, fill in, verify or correct the field(s) when necessary. Inform your EC officer as soon as possible if there are any changes to the preset legal or organisation status information. Where there are form fields for two authorised representatives, you may, if you wish, give two names instead of one. The signature of at least one of the two persons is compulsory.

4. If there is a “Participant Identity Code” associated to the Organisation in the “Legal data” and its status is validated, but the data is not correct, the coordinator has to contact the EC officer.

### Availability of PIC (Participant Identity Code)

The PIC is available when the organisation has already registered for FP7 through URF. (Figure 19)

The status of a participant is displayed in the NEF interface (Legal Data field Status of validation) as follow:

- **UNKNOWN** - this is the normal status of an entity when a PIC is not present. It means either that this participant has not registered yet in the PDM-URF website (thus not having obtained a temporary PIC) or that a PIC has not been introduced in the NEF interface yet

- **DRAFT** - The temporary PIC has been created via the registration in the PDM-URF website and it has been introduced in NEF. The validation of the participant by the CVT team (namely the check of the documents submitted) is ongoing. Obtaining a PIC when registering in the PDM-URF website does not mean that an entity is validated in fact.

- **VALIDATED** - the Participant has been validated by the URF team. Usually the temporary PIC remains the same. If the entity was already valid before the opening of the negotiation, once the PIC is introduced the status of the entity passes straight from Unknown to Validated

- **SUSPENDED** - NEF interface displays ‘SUSPENDED’ and sends the following to the Project Officer: "Attention, this legal entity has been suspended, please contact CVT (Central validation team) for more information at RTD-URF-VALIDATION@EC.EUROPA.EU" This option is used when an already validated entity ceases to exist, goes bankrupt or it was not legally existing after all. As the CVT team cannot delete it from the registry, it is put in a suspended status.
All organisation's data is in read-only, whether there is a PIC or not. All this information may be changed via the Unique Registration Facility (URF) only. The LEAR is the only authorized person to request changes through URF to the Central Validation Team.

If there is an obvious error in the choice of a PIC (i.e. the organisation displayed in NEF is not the actual partner), the coordinator should contact the responsible EC officer.

---

**Legal data**

- **Participant identity Code**: N99999997
- **Legal name**: OOPD OOPD
- **Short name**: OOPD
- **Status of validation**: DRAFT

If the legal information is not validated or the status of validated is not correct, supporting documents will have to be provided to the Commission. Legal supporting documents include an identification certificate and depending on your legal status, supporting documents (see application form-Legal entities page on Europa).

**Legal address of the participant**

- **Streetname**: My Fictional Street
- **Street number**: 9
- **Town**: Brussels
- **Postal code**: 1000
- **Country**: Belgium
- **Internet homepage**:

**Registration data of the participant**

- **Legal registration number**: 723456
- **Place of registration**: DH4481
- **Date of registration**: 2001-02-27
- **VAT Number**: 665996666
- **Legal form**:

---

**Figure 20**

5. Save changes done to the organisation's acronym if there are any changes and return to the Project screen by clicking on the proposal's number on top of the page.

**How to add, verify, and delete participants?**

On the Project screen, you can either follow the link entitled at a participant name or add a participant by clicking on the following link. **Add new participant**

Adding a new participant requires a Participant Identification Code (PIC). PICs of already registered entities can be retrieved in the URF search function: http://ec.europa.eu/research/participants/urf. If the new participant to be added to the Consortium does not yet have a PIC, the participant should self-register at the URF. By doing this, they will immediately receive a provisional PIC that can be used in NEF.
Not only beneficiaries themselves but also third parties covered by Special Clause 10 have to be identified in NEF with a PIC. Third parties are added as new participants and explicitly identified as third parties belonging to a certain participant by selecting the respective options on the "Add a new participant" screen (Figure 21):

More details about the Participants are available by clicking on the PIC link (Figure 22):

1. On the individual participant screen, you can either remove a participant by clicking on or follow one of the links on the participant screen (see Figure 23):

2. Save the changes and return to the summary.
How to end the negotiation session?

When you wish to make the data available for the Commission, close the negotiation session by clicking on "Submit" on the Project screen (see Figure 24):

Figure 24

NEF asks you to confirm the end of the session (see Figure 25):

Figure 25

Confirm your wish to submit this version of the GPF by clicking on the button "OK" (see figure 20). At the same time, the EC officer receives an e-mail declaring that you have closed the session.

You can still access NEF, but in a read only version to view the data submitted. You are not allowed to modify the proposal unless the EC officer opens a new negotiation session, for which you receive a new invitation e-mail with a new access key. When you wish to do so, leave NEF by clicking on the "Logout" link right above on the proposal's screen (see figure 26). This action will bring you back on the "Welcome to the negotiation" screen (see figure 3).

Figure 26
How to finalise the GPFs?
When the definitive version of the GPFs is agreed between the Consortium and the Commission, the EC officer closes the entire negotiation in NEF. The EC Officer will then save and send the final GPFs in a PDF file to the coordinator for printing and signature.

Which forms have to be signed manually?
Three forms out of the Grant Agreement Preparation Forms have to be signed with original signatures:

– form A2.5, “Our commitment”, has to be signed by the authorised representative(s) of the coordinator and all the participants;
– form A2.6, “Data protection & Coordination Role”, has to be signed by the coordinator’s authorised representative(s);
– form A4, "Bank account", must be completed by the account holder (with date and signature) and, unless accompanied by a copy of a bank statement, also by the bank (with bank stamp and signature of the bank representative).

There may be additional information to be provided for specific project types; if the appropriate forms are not available in NEF, the Commission will advise the coordinators on how to provide this information.

The coordinators send the signed hard copies of the GPF and scan the GPF and send them by e-mail or by fax to the Commission.
<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Acronym</td>
<td>Short name of a project as given in the submitted proposal.</td>
</tr>
<tr>
<td>Activity code</td>
<td>Structured reference of an activity in FP7. This code is set out in the letter opening the negotiation; it is followed by the code(s) given in the proposal, if any.</td>
</tr>
<tr>
<td>Call (part) identifier</td>
<td>Reference number given in the call (or part of the call) one is addressing, as indicated in the publication of the call in the Official Journal of the European Union.</td>
</tr>
<tr>
<td>FP7</td>
<td>7th Framework Programme of Research and Technological Development of the European Commission</td>
