Association of Ukraine to the Euratom Research and Training Programme (2014-2018)

**Version 1.1
02 December 2016**

The Agreement for scientific and technological cooperation between the European Atomic Energy Community and the Government of Ukraine associating Ukraine to the Euratom Research and Training Programme (2014-2018) was signed in Brussels on 27 June 2016 and entered into force on 28 October 2016.

According to the terms of this Agreement, Ukrainian legal entities can participate in indirect actions for nuclear fission, safety and radiation protection of the Programme, as well as in the activities of the Joint Research Centre, **funded from the 2016 budget and onwards**, as entities from an Associated Country (i.e. under the same conditions as those applicable to legal entities of Member States).

The Agreement also provides for participation of Ukrainian legal entities as entities from an Associated Country in indirect actions for fusion research and development of the Programme **funded from the 2017 budget and onwards** in the framework of the EUROfusion consortium's activities. The Euratom fusion energy research programme is implemented through a 'European Joint Programme (EJP) co-fund action', to which only legal entities established or designated by Member States and Associated Countries to the Euratom Research and Training Programme (2014-2018) can participate.

Given that the EU does not recognise the illegal annexation of Autonomous Republic of Crimea and the City of Sevastopol, under the terms of this Agreement, legal persons established in the Autonomous Republic of Crimea or the city of Sevastopol are not eligible to participate. Should the illegal annexation of the Autonomous Republic of Crimea and the City of Sevastopol end, the Agreement will be revised accordingly.
