Having regard to Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002², and in particular Article 84(2) thereof,

Whereas:

- (1) Pursuant to Regulation (EU) No 1144/2014, both direct and shared management are to be used for the implementation of information provision and promotion measures.

For appropriations under budget line 05 02 10 02, the annual work programme shall constitute a financing decision within the meaning of Article 84 of Regulation (EU, Euratom) No 966/2012.

**Regulation (EU) No 1144/2014 of the European Parliament and of the Council of 22
October 2014 on information provision and promotion measures concerning
agricultural products implemented in the internal market and in third countries**

1.1. Introduction

On the basis of the objectives set out in Regulation (EU) No 1144/2014, this work programme contains the actions to be financed with the following breakdown for year 2018:

- (a) for grants (implemented under direct management and shared management, point 1.2 below): EUR 179.100.000;
- (b) for procurement (implemented under direct management, point 1.3 below): EUR 9.500.000.

1.2. Grants

Legal basis:

Regulation (EU) No 1144/2014

Budget Lines:

Information provision and promotion programmes may consist of ‘simple’ programmes or ‘multi’ programmes. Simple programmes are programmes submitted by one or more proposing organisations which are all from the same Member State. Multi programmes are programmes submitted by at least two proposing organisations which are from at least two Member States or one or more Union organisations.

Simple and multi programmes have different management modes, different financing modes and are included in two different budget lines:

05.02.10.01: for simple programmes

05.02.10.02: for multi programmes

Description of the activities to be funded under the call for proposals

Information and promotion programmes shall consist of a coherent set of operations and shall be implemented over a period of at least one year but not more than three years. They shall in particular consist of public relation work and information campaigns and may also take the form of participation in events, fairs and exhibitions of national, European and international importance.

Implementation

The present work programme shall be implemented, for simple and multi programmes through the publication of two calls for proposals organised, launched and managed by the Consumers, Health, Agriculture and Food Executive Agency (CHAFAEA).

Proposals for simple and multi programmes shall be evaluated on the basis of the criteria laid down in Annex II and Annex III, respectively.

Afterwards, the financing of simple programmes shall be implemented by the Member States and multi programmes by the CHAFAEA.

Maximum rates of Union financing of the eligible costs

(a) Simple programmes

The Union financial contribution to simple programmes in the internal market shall be 70 % of the eligible expenditure. For proposing organisations established in Member States in receipt of financial assistance in accordance with Articles 136 and 143 TFEU on or after 1 January 2014, the percentage shall be 75 % for programmes decided upon by the Commission before the date from which the Member State concerned no longer receives such financial assistance.

The Union financial contribution to simple programmes implemented in third countries shall be 80 % of the eligible expenditure. For proposing organisations established in Member States in receipt of financial assistance in accordance with Articles 136 and 143 TFEU on or after 1 January 2014, the percentage shall be 85 % for programmes decided upon by the Commission before the date from which the Member State concerned no longer receives such financial assistance.

(b) Multi programmes

The Union financial contribution to multi programmes shall be 80 % of the eligible expenditure. For proposing organisations established in Member States in receipt of financial assistance in accordance with Articles 136 and 143 TFEU on or after 1 January 2014, the percentage shall be 85 % for programmes decided upon by the Commission before the date from which the Member State concerned no longer receives such financial assistance.

(c) Special co-financing rate to simple and multi programmes

The Union financial contribution to simple and multi programmes shall be 85 % of the eligible expenditure in the event of serious market disturbance, loss of consumer confidence or other specific problems. For proposing organisations established in Member States in receipt of financial assistance in accordance with Articles 136 and 143 TFEU on or after 1 January 2014, the percentage shall be 90 % for programmes decided upon by the Commission before the date from which the Member State concerned no longer receives such financial assistance.

Indicative timetable and indicative amount of the calls for proposals

Calls for proposals for the co-financing of the implementation of information provision and promotion programmes in the internal market and in third countries i.e. actions under thematic priorities 1, 2, 3 and 4 referred to in point 1.2.1 shall be launched before the end of January 2018. If necessary, additional calls for proposals could be published in the case of market disturbance, loss of consumer confidence or other specific problems, as referred to in point 1.2.2. and 1.2.3., as soon as possible after the beginning of that market disturbance.

The overall amount for information provision and promotion programmes to be awarded in 2018 amounts to EUR 179.100.000. This amount is split between:

- (a) simple programmes: EUR 100.000.000;
- (b) multi programmes: EUR 79.100.000.

The allocation for the simple programmes under shared management establishes the maximum amount that could be granted when selecting these programmes in 2018. Given the fact that appropriations for simple programmes are non-differentiated and implemented over several years, that amount shall not necessarily correspond to the commitment appropriations entered in the general budget of the Union for 2018.

1.2.1. Actions for proposal for simple and multi programmes, in the internal market and in third countries

1.2.1.1. Actions under thematic priority 1: **simple** programmes in the **internal market**

In addition, only 23% of European consumers recognise the EU logo of organic farming.</p> <p>The expected ultimate impact is to enhance the</p>

<u>Topic 2-</u> Information provision and promotion programmes aiming at highlighting the specific features of agricultural methods in the Union and the characteristics of European agricultural and food products, and quality schemes defined in Article 5(4)(d) of Regulation (EU) No 1144/2014	7.000.000 EUR	<p>The objective is to highlight at least one of the specific features of agricultural production methods in the Union, particularly in terms of food safety, traceability, authenticity, labelling, nutritional and health aspects (including proper dietary practices and responsible consumption of eligible alcoholic beverages), animal welfare, respect for the environment and sustainability, and the characteristics of agricultural and food products, particularly in terms of their quality, taste, diversity or traditions.</p> <p>The expected ultimate impact is to increase the awareness of the merits of Union agricultural products by the European consumers and to enhance the competitiveness and consumption of Union agri-food products, raise their profile and increase their market share.</p>
<u>Topic 3-</u> Information provision and promotion programmes aiming at highlighting the <u>sustainable</u> aspect of the sheep/goat meat production*	2.000.000 EUR	<p>The sheep/goat meat sector is a very fragile sector: sheep/goat meat consumption is declining, and is under strong competition from cheaper imports.</p> <p>The objective is to highlight the sustainable aspect of sheep/goat sector which counts as the most extensive livestock production system and plays an important role in nature protection and keeping biodiversity. Small ruminants' herds graze around 80% of areas facing natural handicap in the EU and have an active role in keeping rural population and maintaining grassland and pastures. Actions shall highlight the environmental sustainability of the production, stressing its beneficial role for climate action and the environment.</p> <p>Actions may for example address how the product(s) promoted and its/their production method(s) contribute to: climate change mitigation (e.g. reduction in greenhouse gas emissions) and/or adaptation; biodiversity, conservation and sustainable use (e.g. landscape, genetic resources); sustainable water management (e.g. water use efficiency, reduction of nutrients or pesticides load); sustainable soil management (e.g. erosion control; nutrient balance; prevention of</p>

They may also highlight the active role of the extensive sheep/meat breeding in keeping rural population and in maintaining grassland and/or transhumance grazing pastures.</p> <p>The expected ultimate impact is to increase the awareness of the merits of Union agricultural products by the European consumers and to enhance the competitiveness and consumption of the concerned Union agri-food products, raise their profile and increase their market share.</p>

* sheep/goat meat is also eligible under Topic 1 and Topic 2. For sheep/goat meat programmes proposed under Topic 2, to avoid overlaps, the message shall be different than the sustainable aspect of the sheep/goat meat production (except if sheep/goat meat is associated with (an) other product(s)).

1.2.1.2. Actions under thematic priority 2: **simple programmes in third countries**¹

Third country markets offer major growth potential. Arrangements are therefore needed in order to encourage a larger number of information provision and promotion measures for Union agricultural products in third countries, focusing not only on the capitals of these countries but also on other cities. This is why the annual work programme for 2018 allocates a substantial part of the budget to information provision and promotion programmes in third countries.

In order to define priorities for third markets, the Commission's services made a macro-economic analysis on projected increase in imports for a selection of products suitable for inclusion in promotion programmes on existing or emerging markets, peered with imports' growth potential. The macro-economic results were crossed with a policy evaluation on Free Trade Agreements and expected removal of sanitary and phytosanitary barriers.

According to this analysis, the most encouraging markets are considered.

- China and South East Asia continue to be attractive markets with promising prospects for increasing imports of EU agricultural products due to continued GDP growth, population growth and past as well as forecasted import growth. The regions make up a large share of world imports for many agricultural products such as beef, sheep, dairy, pig meat and poultry, which further underlines their importance as destinations for EU exports. Japan and South Korea, even though imports are not growing at large rates, are very relevant markets for EU agricultural products - in particular pork - and deserve particular emphasis also due to the fact that new generation FTAs are in place (South Korea) or just agreed (Japan). Other promising markets are Singapore and Vietnam, with whom FTAs could enter into force soon.
- North America absorbs the largest share of agricultural exports from the EU and remains an attractive market, with the CETA agreement and the ongoing modernisation of the agreement with Mexico, which are expected to provide increased export opportunities. The high level mission to Canada in May 2017 put a particular focus on this country as an agri-food export destination. The same logic

¹ The composition of region follows the United Nations country and regional classification. For more details on list of countries composing geographical area, see: <http://unstats.un.org/unsd/methods/m49/m49regin.htm>

applies for Mexico and Columbia. Regarding the US, even if TTIP negotiations are currently frozen the US market has an enormous potential for EU exporters.

- Other geographical areas: a special interest is underlined for the Middle East. Middle East may not be displaying huge growth rates but is a destination to pay particular attention to for several important products, especially for sheep meat where the region is the world's largest importer, as well as for poultry and dairy. It should also be kept in mind that the area has played an important role as alternative destination for agri-food products when the Russian ban affected export opportunities. Africa so far absorbs only a moderate share of world imports of agricultural products. However, prospects on certain particular African markets should be taken into consideration. Central and South American countries do not show the greatest growth potential but may be attractive for specific products and in order to diversify markets also in the context of the advancing trade negotiations with Mercosur. Eastern Europe and Central Asia is also not in the strongest growth category and exports to Russia continue to pose a particular problem due to the import embargo. Other countries from the region should, however, not be neglected as they still provide opportunities for exports. Furthermore, the Russian ban does not concern all agri-food products. With the prospect of future trade agreements with New Zealand and Australia, EU exporters may want to anticipate future market opportunities.

Simple programmes in third countries may consist in information provision and promotion programmes highlighting the specific features of agricultural methods in the Union and the characteristics of EU agri-food products and quality schemes mentioned in Article 5(4)(d) of Regulation (EU) No 1144/2014, and/or information programmes aiming at increasing the awareness and recognition of Union quality schemes mentioned in Article 5(4)(a), (b) and (c) of Regulation (EU) No 1144/2014.

Type of actions: Grants following a call for proposals

Third country markets offer major growth potential. Arrangements are therefore needed in order to encourage a larger number of information provision and promotion measures for Union agricultural products in third countries, focusing not only on the capitals of these countries but also on other cities. This is why the annual work programme for 2018 allocates an important part of the budget to multi programmes in third countries.

Multi programmes under Topic D can target any third country(ies). Applicants may notably consider targeting the most encouraging markets identified under section 1.2.1.2.

Multi programmes in third countries may consist in information provision and promotion programmes highlighting the specific features of agricultural methods in the Union and the characteristics of EU agri-food products and quality schemes mentioned in Article 5(4)(d) of Regulation (EU) No 1144/2014, and/or information programmes aiming at increasing the awareness and recognition of Union quality schemes mentioned in Article 5(4)(a), (b) and (c) of Regulation (EU) No 1144/2014.
