

FREQUENTLY ASKED QUESTIONS

Marie Skłodowska-Curie Actions Innovative Training Networks (ITN)

Call identifier: H2020-MSCA-ITN-2015

Closing Date: 13 January 2015 at 17:00:00
(Brussels local time)

Batch number: 1
Date: 25/11/2014

All questions and answers are also published on:
<http://ec.europa.eu/research/index.cfm?pg=faq>

CONSORTIUM

Q1: (ETN, EJD, EID) - Can organisations from Third Countries and International Organisations participate in ITN?

A: Yes. Participation of Third Countries and International Organisations in ITN is possible. To be considered as a beneficiary Third Countries (TC) are divided into two groups:

1) Those countries listed in the General Annex A of the Work Programme are eligible to receive funding provided that the minimum eligibility requirements of the consortium have been met.

2) For those TCs *not* listed in the above mentioned Annex A of the Work Programme and International Organisations, the funding of these organisations can be permitted in exceptional cases, if endorsed by the expert evaluators and if one of the two following conditions is met:

- the participation is deemed essential for carrying out the action;
- such funding is provided for under a bilateral scientific and technological agreement or any other arrangement between the Union and the country in which the legal entity is established.

Applicants wishing to include organisations from Third Countries not listed in Annex A of the Work Programme or International Organisations in their consortium should focus on demonstrating that their participation is essential for carrying out the proposed project. This will be assessed by the experts during the evaluation.

This will be based on the judgment that the participation of the entity in question in the project offers clear benefits to the consortium. These benefits may include, for example, outstanding/unique competence and expertise, access to unique research infrastructures, access to geographical environments, etc.

Q2: (ETN, EJD, EID) - Can partner organisations in ITN be from the same country as the Coordinator?

A: Yes, *partner organisations* can be from any country, any discipline and any sector.

Q3: (ETN, EJD, EID) - Is there a recommended number of partner organisations in ITN?

A: No. This will depend on each individual research training programme and on each partner organisation's added value to the programme.

Q4: (ETN, EID, EJD) - What is meant by academic and non-academic sector?

A: The definition is specific to the MSCA programme. Academic Sector consists of public or private higher education establishments awarding academic degrees, public or private non-profit research organisations whose primary mission is to pursue research and international European interest organisations as they are defined in Article 2 of the Horizon2020 Rules for Participation. Non-Academic Sector includes any socio-economic actor not included in the

academic sector and fulfilling the requirements of the Horizon2020 Rules for Participation. In case of doubts the primary objective in the status of the organisation needs to be considered.

Q5: (ETN, EJD, EID) - Is non-academic sector participation essential in an ITN proposal?

A: Yes. A meaningful exposure to the non-academic sector is considered essential. As ITN aims to improve the employability of researchers through exposure to organisations in both the academic and non-academic sectors, an essential part of any ITN is the involvement of organisations from different sectors. For EIDs, note that the participation of the non-academic sector as a beneficiary is an eligibility criterion. The quality and degree of involvement of organisations from the non-academic sector will be assessed by the expert evaluators according to the evaluation criteria.

Q6: (ETN, EID, EJD) – Can the consortium consist only of research organisations and companies? How will the PhD degree be awarded?

A: In ETNs, it is possible that consortia are composed of research organisations and companies only. However, in general practically all ITNs have also universities among the beneficiaries.

For EID, the participation of at least one academic beneficiary awarding doctoral degrees is mandatory.

For EJD, the participation of 3 beneficiaries which are academic institutions entitled to award doctoral degrees and located in 3 different Member States or Associated Countries is mandatory.

For more details please see the Guide for Applicants.

Q7: (ETN, EID, EJD) - Does ITN allow for mono-site consortia?

A: No, this is no longer the case in ITN under H2020. However, mono-site doctoral programmes can now be co-funded under the MSC COFUND action. Please refer to the Work Programme at:

http://ec.europa.eu/research/participants/data/ref/h2020/wp/2014_2015/main/h2020-wp1415-msca_en.pdf

Q8: (ETN, EID, EJD) - Can universities not offering doctoral degree programmes apply for ITN (all 3 modes)?

A: Indeed, some universities of applied sciences cannot award doctoral degrees but they do carry out research.

For ETN, such universities may participate as beneficiaries, as long as they recruit, host researchers and provide research training. In such a case, the fellow may be enrolled in a PhD programme by another academic beneficiary or partner organisation entitled to award doctoral degrees.

For EID and EJD, such universities may also participate. However they do not count as one of the academic beneficiaries required for the minimum eligibility rules as they are not entitled to award doctoral degrees.

Q9: (ETN, EID, EJD) - In line with the MSCA Work Programme definition and according to the Proposal Submission System (SEP), my entity (a museum) is classified as an academic sector entity because it is non-profit research organisation. I believe it should be classified as a non-academic sector entity. What should I do?

A: The legal entity validation is managed centrally for all H2020 beneficiaries. If you believe that the validation is incorrect, the Legal Entity Appointed Representative (LEAR) of the organisation can ask for a correction and changes in the organisation's legal classification through the participant portal. The access can be found in "My Personal Area" at:
<http://ec.europa.eu/research/participants/portal/desktop/en/home.html>

PROPOSAL SUBMISSION

Q10: (ETN, EID, EJD) - Is a Participant Identification Code (PIC) mandatory in form A of ITN during proposal submission?

A: Yes. Every entity applying as a beneficiary must have at least a draft PIC number. If an entity does not yet have a draft PIC number, it can be obtained by following the instructions at:
<http://ec.europa.eu/research/participants/portal/desktop/en/funding/index.html>

Q11: (ETN, EID, EJD) - Why is it necessary to select descriptors in the proposal part A during submission of the proposal?

A: The descriptors will play a role in the identification of the most suited experts to evaluate the proposal. To help to select the most relevant descriptors, a document providing a breakdown of each research area into a number of descriptors can be found on the call page on the participant portal:
<http://ec.europa.eu/research/participants/portal/desktop/en/opportunities/h2020/calls/h2020-msca-itn-2015.html#tab2>

Q12: (ETN, EJD, EID) - Can an organisation submit a proposal to each of the three ITN modes?

A: Yes. However, applicants must demonstrate that, should they receive funding for more than one project, they have the capacity to participate in each project to the extent indicated in the proposal. In addition, the proposals cannot be overlapping since double funding is not permitted.

Q13: (ETN, EJD, EID) - Are re-submissions of FP7 ITN proposals allowed?

A: Yes. Each proposal shall be evaluated against the 2015 Work Programme evaluation criteria. In the case of proposals that have been submitted in the past 2 years in response to a call for proposals under the 7th Framework Programme, Horizon 2020 or any other EU programme, and if the work programme topics and criteria were comparable, the panel coordinator discloses to the experts the previous Evaluation Summary Report at the consensus stage. If necessary, the evaluators will be required to provide a clear justification for their scores and comments should these differ markedly from those awarded to the earlier proposal.

Q14: (ETN, EJD, EID) - What is the main difference between the ETN, EID and EJD mode?

A: While ETN should be constructed as a joint research training programme where recruited fellows may be enrolled in various local doctoral programmes, EID and EJD proposals should demonstrate a coherent doctoral programme in which all fellows participate. The doctoral programmes should contain all common features as well as mode-specific features as described in the Work Programme, including individualised research projects. The evaluation criteria of EID, EJD and ETN will be applied according to the objectives of the implementation mode in question, which are described in the Work Programme.

Q15: (ETN, EJD, EID) - Must all partner organisations be involved in the supervisory board in ITN?

A: Yes. The supervisory board will be composed of representatives of all beneficiaries and partner organisations and may also include any other stakeholders of relevance to the training programme, including those from the non-academic sector. It is also considered best practice to include a representative from among the recruited ESRs.

Q16: (ETN, EJD, EID) - Are external representatives (referred to as “any stakeholders”) in the supervisory board compulsory in an ITN proposal?

A: No. The participation of external stakeholders (e.g. future employers) in the supervisory board is not compulsory. However, such an involvement of external stakeholders can be very beneficial as they can bring added value to the supervision of the training programme.

Q17: (ETN, EID, EJD) - What is meant by “Independent Research Premises” in the table under section 5 “Participant Organisations” of Part B of the proposal?

A: The principle is that each beneficiary must have dedicated premises – own or rented – to host the fellows, e.g. a newly established campus company/university spin-off that neither owns nor rents premises would not be considered to have independent research premises. However, please note a company with dedicated space in an incubator facility made available free of charge would be considered to have independent research premises.

Q18: (ETN) - How should individual early-stage researcher (ESR) projects be structured and described?

A: ETN should be constructed as a joint research training programme. The individual projects form a collaborative research component. The proposal has also to describe the network-wide trainings consisting of research specific and complementary skills training. In addition the fellows may use local trainings since they are typically enrolled in the local PhD programme/doctoral schools. Please follow the Part B proposal template for training and proposal structure.

Q19: (ETN, EID, EJD) - How/where is it possible to get more information on the Open Research Data?

A: As participation in the Open Research Data pilot is optional, ITN projects can freely choose to do so; in such a case a data management plan will be required. The decision to participate or not does not affect the evaluation of the proposal. The Data Management Plan is published on the Participant Portal:

http://ec.europa.eu/research/participants/data/ref/h2020/grants_manual/hi/oa_pilot/h2020-hi-oa-pilot-guide_en.pdf

Q20: (ETN, EID, EJD) - Should Table 1.1 "Work Package List" only contain the scientific / technical work packages or should it also include non-technical work packages such as Training, Management and Dissemination / Communication?

A: Good practice is to add separate work packages on management, dissemination, communication & public engagement and on training.

Q21: (ETN, EID, EJD) - Should the proposal Section 1 (Excellence) include information about individual research projects or should this be indicated in Section 3?

A: In section 1.1, in the table work package list, you can indicate the ESR involvement. Depending on your project set-up, you may generally describe the involvement of the researcher in a particular work package. Table 1.1.d will provide a more detailed description of the individual research projects. Please ensure consistency between the two tables.

Q22: (ETN, EID, EJD) - What is the role of invited visiting researchers mentioned in 4.1 of the "Guide for Applicants"? How can their related costs be reimbursed?

A: Visiting researchers are not compulsory within ITN projects. They usually are outstanding researchers in their field and their role is typically to provide specific training to the researchers, contribute to summer schools, share their experience, etc. Regarding the reimbursement of their costs, their travel and subsistence costs can be covered by the Research Training and Networking cost category.

Q23: (ETN, EID, EJD) - What is the minimum font size which would apply to tables and footnotes in the application?

A: Tables should ideally be in a uniform font to best relay the information intended. However, some tables and illustrations may contain text in different fonts and font sizes. For the Gantt chart and tables, the font size chosen must be clearly legible by the expert evaluators. The minimum font size is therefore 8 points. Literature references should be listed in footnotes, font size 8.

Q24: (ETN, EID, EJD) - Is there a template for the letter of commitment?

A: Letters of commitment are needed from all partner organisations. There is no template for the letters of commitment. The partner organisation should describe their commitment to the additional research and transferable skills training and/or secondment opportunities they will provide as described in the proposal. The letter should demonstrate the real and active participation of the partner organisations in the proposed network. It should be signed by the legal representative of the organisation. For EJD letters of commitment must also be included for each beneficiary that would award the doctoral degree. For more information please see Annex 4 point 2 of the Guide for Applicants.

PROPOSAL EVALUATION

Q25: (ETN, EJD, EID) - Are the expert evaluators allowed to read excess pages?

A: No. The evaluators are instructed to disregard any pages over the 30-page limit for sections 1 to 3 of part B of the proposal. The page limit rule is clearly explained in the Guide for Applicants and will be strictly enforced.

Q26: (ETN, EJD, EID) - Will the evaluation of the EID and EJD differ from that for ETN modes?

A: All EID and EJD proposals will be evaluated by experts in the scientific field(s) of the proposal like in ETN. In all cases, the evaluation criteria will be used by the experts according to the implementation mode as indicated in the Work Programme. EID and EJD proposals will be ranked in two separate lists, since there is a specific budget allocation for these two implementation modes in the Work Programme. Therefore, EID proposals will only compete against each other and not against ETN or EJD proposals. The same principle applies to EJD proposals. ETN proposals are ranked according to the scientific panel.

Q27: (ETN, EJD, EID) - What is meant with operational capacity assessment during the evaluation?

A: Operational capacity assessment is carried out during the evaluation. The experts will indicate whether the participants have the operational capacity to participate in the action, based on what is presented in the proposal. Information contained in the table “Data for non-academic beneficiaries” and Section 5 in the proposal Part B (Participating Organisations) will be assessed in this context. The applicants are advised to fill in these data completely and accurately in order to ensure a proper assessment.

BUDGET

Q28: (ETN, EJD, EID) - How will the ITN call budget be distributed?

A: The call budget distribution is indicated in the relevant Work Programme. EID and EJD proposals will be ranked in two separate lists since there is a specific budget allocation indicated in the Work Programme. For ETN, the proposals are ranked under eight major panels (areas of research). The budget for ETN is allocated to each of these panels in proportion to the number of eligible proposals submitted to the panel.

Q29: (ETN, EJD, EID) - What happens if more researcher-months are requested than the maximum indicated in the ITN Guide for Applicants?

A: For MSCA funding, the 540 person months is the upper limit which may not be exceeded in ETN, EJD and EID with a minimum of 3 beneficiaries, while 180 person months is the upper limit for EID with two beneficiaries. If the proposal contains person months in excess of these limits, the applicants run the risk of negatively affecting the evaluation of their proposal in the absence of a clear indication that own sources will be used to finance the excess person months.

Q30: (ETN, EJD, EID) - Is the EU contribution calculated the same way for EID and EJD compared to ETN mode?

A: Yes. All researcher unit costs (monthly living allowance, mobility allowance, family allowance) and institutional unit costs (research, training and networking costs, management and indirect costs) are calculated in the same way for the three modes.

Q31: (ETN, EJD, EID) - Are applicants required to indicate the amount of the estimated EU contribution in the ITN proposal?

A: No. The EU contribution will be automatically calculated from the recruitment information provided in Part A of the proposal.

Q32: (ETN, EJD, EID) - Can partner organisations in ITNs be reimbursed for the costs of training and/or hosting of seconded researchers?

A: Yes. Costs incurred by partner organisations can be reimbursed by a beneficiary. The costs are then covered by the EU contribution under the cost category relevant for the activity/ies carried out by the partner organisations.

Q33: (ETN, EJD, EID) - Are the costs related to face to face meetings, joint workshops between doctoral candidates and their supervisors (like travelling) eligible?

A: Yes. These costs can be covered by the institutional unit cost “Research, Training and Network Costs”. For more details, please see the Guide for Applicants.

Q34: (ETN, EID, EJD) – How will be Management and indirect costs distributed between the beneficiaries?

A: The unit costs related to management and indirect costs are calculated based on the units declared by each beneficiary. The beneficiaries may agree to redistribute this budget category within the network according to their needs. As this is the internal decision of the network no information or request has to be submitted to the REA. Therefore, it is possible that e.g. the coordinator will receive a larger share of management and indirect budget to cover its higher managerial expenses. It is advisable to address this issue already at the proposal stage with the administrators of all beneficiaries in the project and eventually address it in the Consortium Agreement if applicable.

RECRUITMENT

Q35: (ETN, EJD, EID) - Has the definition of Early-Stage Researcher (ESR) changed from FP7 to H2020?

A: No, the definition of Early-Stage Researchers (ESR) has not changed. ESRs shall, at the time of recruitment by the host organisation, be in the first four years (full-time equivalent research experience) of their research careers and have not been awarded a doctoral degree. Full-time equivalent research experience is measured from the date when a researcher obtained the degree which would formally entitle him or her to embark on a doctorate, either in the country in which the degree was obtained or in the country in which the researcher is recruited. Part-time research experience will be counted pro-rata.

Q36: (ETN, EJD, EID) - Can Experienced Researchers be recruited in ITN?

A: No. Experienced Researchers cannot be recruited in any of the ITN modes: ETN, EID and EJD in H2020.

Q37: (EJD, EID) - Is it mandatory to appoint fellows for the maximum 36-month period under the -EID and the EJD modes?

A: Although not mandatory, these modes are designed to fund doctoral research programmes and therefore Early-Stage Researchers are generally be appointed for the maximum 36-month period. Shorter appointments (the minimum duration is 3 months) would have to be carefully explained and justified and would be assessed by the expert evaluators during the evaluation procedure.

Q38: (ETN) - What is the recommended role of organisation in ETN, when it does not wish to recruit?

A: If an organisation in ETN does not recruit, its tasks (such as offering secondment opportunities and/or training) are identical to that of a partner organisation. Therefore, such an entity should participate as a partner organisation.

Q39: (ETN, EJD, EID) - Project duration is normally 4 years. Are longer or shorter durations possible? If EID and EJD are doctoral programmes, why can Early-Stage Researchers only be appointed for a maximum of 36 months when many will take longer than this to complete their PhDs?

A: Project duration is limited to 4 years. This gives the consortium sufficient time to recruit the fellows and to appoint them for the maximum 36-months period. Shorter durations of the grant agreement are theoretically possible but not recommended since experience has shown that a project duration of 4 years offers the consortium a useful margin for manoeuvre. In those countries where the duration of PhD study is formally 4 years, additional funding from other sources should be secured by the participant in order to fund the 4th year of doctoral studies.

Q40: (ETN, EID, EJD) - Shall the beneficiaries provide full-time contracts to the researchers?

A: As a rule the researcher should be recruited under a full-time employment contract. Part-time employment must be agreed in advance by the REA and is allowed only for personal or family reasons of a researcher. Part-time employment for professional reasons is not allowed.

Q41: (ETN, EID, EJD) - What is the definition of the date of recruitment and how does the mobility rule apply to it?

A: Normally, the "time of recruitment" means the first day of the employment of the fellow for the purpose of the project (i.e. the starting date indicated in the employment contract or equivalent direct contract). However, as there are differences in the procedure of employment between countries, the definition of this date may be adjusted if necessary. It can be also the date on the formal letter offering the position under the action or the date of the signature of the employment contract.

It has to be kept in mind that it is the beneficiary who is finally responsible versus the REA for verifying the eligibility rules and has to ensure that sufficient evidence of eligibility is kept for any potential check or audit.

Q42: (ETN, EID, EJD) - How is the family status taken into account during the recruitment and is it possible to modify it in the course of the project (e.g. if a researcher has a child)?

A: Family is defined as persons linked to the researcher by (i) marriage, or (ii) a relationship with equivalent status to a marriage recognised by the legislation of the country where this relationship was formalised; or (iii) dependent children who are actually being maintained by the researcher. The family status of the individual ESR is determined at the time of recruitment and does not change during the lifetime of the project.

Q43: (ETN, EID, EJD) - Is it compulsory for the ESRs enrolled in a PhD to defend their thesis within 3 years?

A: No. In EID and EJD the researchers must be enrolled in the doctoral programme. In case of EJD it shall be a joint doctoral programme leading to the award of joint, double or multiple doctoral degrees. However, in cases when a doctoral degree is awarded after 3 years or even after the end of the project the REA may check if the commitment to provide doctoral training was fulfilled.

Q44: (ETN, EID, EJD) - Is it possible in a ITN action that a third party hires the fellows on behalf of the beneficiary?

A: In H2020 MCSA there are no third parties to the grant agreement. It must be the beneficiary that gives the employment contract to the researchers and there are no exceptions to this rule.

The beneficiary must recruit, host at its premises and provide training to the researchers.

SECONDMENTS

Q45: (ETN) - Are secondments important in ETN mode?

A: Yes. Secondments are strongly encouraged and expected. Secondments can contribute to the inter-sector experience and may also contribute to the multi/inter-disciplinary experience of the researchers. They will be assessed by the expert evaluators under the criterion "excellence". Secondments may not, however, exceed 30% of a fellow's recruitment period.

Q46: (ETN, EID, EJD) - Is it possible to arrange secondments to partner organisations in the same country where the PhD is hosted?

A: Yes, it is. However, please remember that the international, intersectoral and interdisciplinary dimension is an important part of ITN.

EUROPEAN JOINT DOCTORATES

Q47: (EJD) - What is the objective of EJD European Joint Doctorates?

A: EJDs have the objective of promoting international, intersectoral and multi/interdisciplinary collaboration in doctoral-level training in Europe through the creation of joint doctoral programmes, leading to the delivery of joint, double or multiple doctoral degrees. At the crossroads between higher education and research, they are an excellent instrument to promote the development of, and create bridges between, the European Higher Education Area and the European Research Area. This will be achieved by promoting greater structural co-operation between universities in terms of programme design and mutual recognition of qualifications.

Q48: (EJD) - What is the difference between a joint and a double or multiple degree in EJD mode?

A: A joint degree refers to a single diploma issued by at least two higher education institutions offering an integrated programme and recognised officially in the countries where the degree-awarding institutions are located. A double or multiple degree refers to two or more separate national diplomas issued by two or more higher education institutions and recognised officially in the countries where the degree-awarding institutions are located.

Q49: (EJD) - Is joint supervision mandatory in the EJD mode?

A: The joint supervision of fellows is mandatory, as is the creation of a joint governance structure with joint admission, selection, supervision, monitoring and assessment procedures. The participation from the non-academic sector is strongly encouraged.

Q50: (EJD, EID) - Will it be checked whether the doctoral degree has actually been awarded in EID and EJD modes?

A: Fellows recruited under EID and EJD must be enrolled in the doctoral programme and are expected to complete their studies and for EJD receive the joint, double or multiple doctoral degrees. A formal commitment to award joint/double/multiple doctoral degrees is required in the proposal. Since the doctoral degree may be awarded after the EID or EJD project has finished, it may not be feasible in all cases to check during the project lifetime as to whether the final degree was actually awarded. However, such checks may take place after the conclusion of the project.

Q51: (EJD) - Are two countries sufficient or is it necessary that the doctoral degree is accepted in all countries involved in an EJD project?

A: The doctoral degrees awarded within EJD shall be recognised at least in two different countries.

Q52: (EJD) - Can former applicants to Erasmus Mundus programme apply to the EJD mode?

A: Yes. Please note that previous applications are not considered as resubmissions. When designing your project please take into account the MSCA ITN implementation and budget structure.

EUROPEAN INDUSTRIAL DOCTORATES

Q53: (EID) - In EID mode, can a research institution act as coordinator?

A: Yes. It is possible to propose a research institution to act as a coordinator. However, it should be kept in mind that the minimum requirement of the academic sector participation in an EID is to include at least one academic sector beneficiary that can award doctoral degrees. Since the ESR's enrolment in a doctoral programme is a requirement for EID, the proposal will have to clearly describe the role of each participant in the programme.

Q54: (EID) - In EID mode, what would be the benefit of being employed by more than one of the participants? How would the 50% rule then be monitored and enforced?

A: It is up to the participants to decide if the employment will be provided by one or more participants and if one set-up is more feasible than the other. Bear in mind the effects such a decision has on the country correction coefficient applied to the living allowance of the fellow and the time he/she spends in different countries.

The recruited researchers must spend at least 50% of their time in the non-academic sector (at beneficiaries or partner organisations). The time period spent in the non-academic sector has to be declared in the reports. If requested, the participants should be able to provide auditors with evidence (e.g. lab note books, travel documents) of the time spent by the researchers in each location.

Q55: (EID) - Can NGOs be partners together with academic institutions?

A: Yes. If it is the only non-academic sector beneficiary, the applicant must check that the legal validation result is consistent with the non-academic sector definition in the MSCA work programme.
