

GUIDE FOR APPLICANTS

Marie Skłodowska-Curie actions

Co-funding of Regional, National and International Programmes (COFUND)

Call identifier: H2020-MSCA-COFUND-2016

Deadline: 29 September 2016 at 17:00:00
(Brussels local time)

Date of call publication: 14 October 2015

Date of call opening: 14 April 2016

Version Number: 2016.2

Note: National Contact Points (NCPs) have been set up across Europe by the national governments to provide information and personalised support to H2020 applicants in their native language. The mission of the NCPs is to raise awareness, inform and advise on H2020 funding opportunities as well as to support potential applicants in the *preparation, submission and follow-up* of the grant applications. For details on the NCP in your country please consult the website at http://ec.europa.eu/research/participants/portal/desktop/en/support/national_contact_points.html.

Neither the European Commission nor the Research Executive Agency (or any person acting on their behalf) can be held responsible for the use made of this guidance document.*

The guidance provided in the Annotated Model Grant Agreement shall prevail in case of discrepancies.

The Marie Skłodowska-Curie actions in Horizon 2020

The Marie Skłodowska-Curie actions (MSCA) aim to support the career development and training of researchers – with a focus on innovation skills – in all research disciplines through international and intersectoral mobility.

The MSCA are expected to finance around 65 000 researchers between 2014 and 2020, including 25 000 doctoral candidates. The actions will address several objectives of the Europe 2020 strategy, including the Innovation Union flagship initiative. The latter states that the EU will need at least one million new research jobs if it is to reach the target of spending 3% of EU GDP on research and development by 2020.

By funding excellent research and providing attractive working conditions, the MSCA offer high-quality professional opportunities open to researchers of any age, nationality or discipline.

The 2016 Marie Skłodowska-Curie actions are:

- **Innovative Training Networks (ITN):** Innovative doctoral-level training providing a range of skills in order to maximise employability;
- **Individual Fellowships (IF):** Support for experienced researchers undertaking mobility between countries, and also to the non-academic sector;
- **Research and Innovation Staff Exchange (RISE):** International and intersectoral collaboration through the exchange of research and innovation staff;
- **Co-funding of regional, national and international programmes (COFUND):** Co-financing high-quality fellowship or doctoral programmes with transnational mobility.

The Coordination and Support action **European Researchers' Night (NIGHT)** funded under the MSCA is a Europe-wide public event to enhance researchers' public recognition, and to stimulate interest in research careers, especially among young people.

Guides for Applicants for any other MSCA can be found by following the links on the Participant Portal at:

<http://ec.europa.eu/research/participants/portal>

The MSCA website can be found at:

<http://ec.europa.eu/msca>

This Guide is based on the rules and conditions contained in the legal documents relating to Horizon 2020 (in particular the Horizon 2020 Framework Programme and Specific Programme, the Rules for Participation, and the Work Programme), all of which can be consulted via the Participant Portal.

Definitions used throughout this Guide

Early-Stage Researchers (ESR) must at the date of the call deadline or recruitment be in the first four years (full-time equivalent research experience) of their research careers and not yet have been awarded a doctoral degree.

Experienced Researchers (ER) must at the date of the call deadline or recruitment, be in possession of a doctoral degree or have at least four years of full-time equivalent research experience.

Full-Time Equivalent Research Experience is measured from the date when a researcher obtained the degree entitling him or her to embark on a doctorate, either in the country in which the degree was obtained or in the country in which the researcher is recruited, even if a doctorate was never started or envisaged.

Mobility Rule: Researchers may not have resided or carried out their main activity (work, studies, etc.) in the country of the beneficiary/partner organisation (or — in case of international European interest organisations — with this organisation) for more than 12 months in the 3 years immediately before the call deadline or the date of recruitment unless otherwise specified in Annex 1 for existing programmes.

For Fellowship programmes supporting reintegration in Europe, career restart opportunities, or activities similar to those of the MSCA-IF Society and Enterprise Panel, researchers may not have resided or carried out their main activity (work, studies, etc.) in the country of the beneficiary/partner organisation (or — in case of international European interest organisations — with this organisation) for more than 3 years in the 5 years immediately before the call deadline or the date of recruitment, unless otherwise specified in Annex 1 for existing programmes.

Time spent as part of a procedure for obtaining refugee status under the Geneva Convention¹, compulsory national service and/or short stays such as holidays are not taken into account.

The academic sector means public or private higher education establishments awarding academic degrees, public or private non-profit research institutes whose primary mission is to pursue research, and international European interest organisations as they are defined in Article 2.1(12) of the Horizon 2020 Rules for Participation Regulation No 1290/2013.

The non-academic sector means any socio-economic actor not included in the academic sector and fulfilling the requirements of the Horizon 2020 Rules for Participation Regulation No 1290/2013.

International European Interest Organisation means an international organisation, the majority of whose members are Member States or Associated Countries, and whose principal objective is to promote scientific and technological cooperation in Europe.

Beneficiary is the legal entity that signs the Grant Agreement and has the responsibility for the proper implementation of the action.

Partner organisations contribute to the implementation of the action, but do not sign the Grant Agreement.

Europe: EU Member States (**MS**) and their overseas departments (including Overseas Countries and Territories (OCT) linked to MS) and Associated Countries (**AC**).

Associated Countries (AC) means a third country which is party to an international agreement with the Union, as identified in Article 7 of Regulation (EU) No 1291/2013.

Non-associated Third Countries (TC) are countries which are neither EU Member States (MS) nor associated to Horizon 2020 (AC).

Work Programme: General Introduction, Part 3 (Marie Skłodowska-Curie actions), and Annexes of the Horizon 2020 Work Programme 2016-2017. European Commission Decision C (2016) 1349 of 9 March 2016).

¹ 1951 Refugee Convention and the 1967 Protocol.

1. General Aspects

As detailed in the [Work Programme](#), the specific objectives of the COFUND scheme are:

The COFUND scheme aims at stimulating regional, national or international programmes to foster excellence in researchers' training, mobility and career development, spreading the best practices of Marie Skłodowska-Curie actions.

This will be achieved by co-funding new or existing regional, national, and international programmes to open up to, and provide for, international, inter-sectoral and interdisciplinary research training, as well as transnational and cross-sectoral mobility of researchers at all stages of their career.

The programmes to be implemented aim to increase the numerical and structural impact of Marie Skłodowska-Curie actions (MSCA).

This will increase the quality of research training in Europe at all career stages, including at doctoral level, foster free circulation of researchers and knowledge in Europe, and promote attractive research careers by offering open recruitment and attractive working conditions.

COFUND aims to increase the transnational, inter-sectoral and inter-disciplinary mobility of researchers, in line with the principles set out in the **European Charter for Researchers** and the **Code of Conduct for the Recruitment of Researchers**² and with the **EU Principles for Innovative Doctoral Training**³ (when appropriate).

COFUND will support **Doctoral Programmes (DP)** and **Fellowship Programmes (FP)** for the most promising [early-stage researchers](#) and [experienced researchers](#), respectively. The programmes must run a selection process based on openness, transparency, merit, impartiality and equality for the researchers who are applying.

2. Participating organisations

Participating organisations in COFUND are legal entities that fund or manage Doctoral Programmes or Fellowship Programmes for researchers, or that recruit, supervise, host or train researchers. Examples could be research funding agencies, ministries, universities, research organisations, private companies or other organisations from the [non-academic sector](#).

For the purpose of COFUND, there are two different types of participating organisations:

² Commission Recommendation of 11 March 2005 on the European Charter for Researchers and on a Code of Conduct for the Recruitment of Researchers (2005/251/EC)

³ http://ec.europa.eu/euraxess/pdf/research_policies/Principles_for_Innovative_Doctoral_Training.pdf

- **Beneficiary**

The **Beneficiary is the sole signatory to the Grant Agreement**, which receives the EU funding, claims costs, and takes complete responsibility for the proper implementation of the proposed programme. **The [beneficiary must be a legal entity established in an EU Member State or Horizon 2020 Associated Country that funds or manages Doctoral Programmes or Fellowship Programmes for researchers. It may also recruit, supervise, host or train the researchers, either on its own or in conjunction with \[partner organisations\]\(#\).](#)**

For the purpose of the COFUND action **[International European Interest Organisations](#) are considered as legal entities established in a MS or AC**. The same rule also applies to the European Commission Joint Research Centre (JRC) or to an entity 'created under Union law' (see Article 9(2) and Article 10(1)(a) of the Horizon 2020 Rules for Participation Regulation).

- **Partner Organisations**

The [Partner Organisations](#)⁴ are **legal entities that contribute to the action by implementing a Doctoral or Fellowship programme (including recruitment of researchers) or by providing training and hosting to researchers during secondments**. [Partner Organisations](#) are not signatories of the Grant Agreement. Therefore, they cannot claim costs of the programme directly from the REA. Instead, their costs for activities in the research training programme are covered by the unit costs paid to the beneficiary.

Partner organisations that recruit researchers in the context of a Doctoral or Fellowship programme must be established in an EU Member State, H2020 Associated Country, or Third Country listed in General Annex A⁵ to the H2020 Work Programme. Partner organisations providing secondments can be established in any country, i.e. in any Member State, [Associated Country](#), or [non-associated Third Country \(including those not listed in General Annex A\)](#).

It is strongly recommended that successful beneficiaries conclude a partnership agreement with all partner organisations involved in the action.

Partner organisations that **contribute to the programme funding** must **provide a letter of commitment** in Part B of the proposal which explicitly states their **commitments in terms of financial contributions**, as well as their precise **role** in the action. In addition, the Part B of the proposal must **include the overview of all these Partner Organisations' financial commitments in a separate Table** ([model provided](#) in Annex 5 "Part B

⁴ Information provided in Part A of the proposal as to the Partner Organisations, including the list of Partner Organisations, should be identical to the information provided in Part B of the proposal.

⁵ http://ec.europa.eu/research/participants/data/ref/h2020/other/wp/2016-2017/annexes/h2020-wp1617-annex-ga_en.pdf

Template", within section 5 "Letters of Commitment from Partner organisations").

The expert evaluators will be instructed to disregard the contribution of any [partner organisations](#) contributing to the programme funding for which no such evidence of commitment is submitted.

Letters of commitment are not compulsory for partner organisations that do not contribute to the funding of the programme.

Participating organisations ([beneficiary](#) and partner organisations) can belong to one of the following sectors: i) The [academic sector](#) ii) The [non-academic sector](#) (e.g. public administrations, companies, some non-profit or charitable organisations, trusts, museums, hospitals, etc.).

Before applying, the [beneficiary](#) has to register, if not yet done, for a Participant Identification Code (PIC), and is automatically classified into one of the two sectors cited above during the validation process⁶.

As previously mentioned, **COFUND is a mono-beneficiary action**. Only one legal entity established in an EU Member State or [Associated Country](#) will apply to the COFUND scheme through the Participant Portal, as [beneficiary](#), and fill the electronic A Forms.

3. Structure and features

Applicants must submit multi-annual proposals for new or existing Doctoral Programmes or Fellowship Programmes that may be run at regional, national or international level.

COFUND programmes may take one of two forms:

- | |
|--|
| A. Doctoral Programmes
B. Fellowship Programmes |
|--|

Each application can only cover one of the two types. In case applicants are willing to apply for both DP and FP, then 2 separate applications must be prepared and submitted.

⁶ Legal entities having a valid PIC number under FP7 maintain their PIC in H2020. The details of all validated organisations are stored in a Unique Registration Facility (URF). For the confirmation and, if necessary, revision of the data stored in the URF, the Commission asks each organisation to nominate a Legal Entity Appointed Representative (LEAR). The LEARs can view their organisations' legal and financial data online and ask for corrections and changes through the Participant Portal. Note that under H2020, it will be necessary for each participating organisation to submit proof documents regarding the nomination of the LEAR before a Grant Agreement can be signed. More information can be found on the Participant Portal <http://ec.europa.eu/research/participants/portal/desktop/en/funding/guide.html>

A. Doctoral Programmes

Doctoral programmes must address the development and broadening of the research competencies of [early-stage researchers](#). The training should follow the seven EU Principles on Innovative Doctoral Training⁷, namely excellent research standards, attractive employment and working conditions, interdisciplinary research options, exposure to industry and other relevant employment sectors, international networking, transferable skills training, and quality assurance of the programmes proposed.

Doctoral Programmes must concern research training activities for recruited researchers that lead to the award of a doctoral degree, which means that each researcher must be enrolled in a Doctoral Programme. The award of joint or double/multiple degrees and mutual recognition of training activities will be considered a positive feature during the evaluations. Attention will be paid to qualitative and quantitative supervision and mentoring arrangements as well as to career guidance. A supervisor with adequate experience must be appointed for each researcher to provide the researchers with academic support and a career development plan. If possible, the institution(s) awarding the PhD should be identified in the proposal.

The Doctoral Programmes to be funded **must provide for call(s)**, which would allow the [ESR](#) to apply while choosing their preferences in terms of the research topic of the PhD project to be pursued. The selection of the researchers must follow an open, transparent, merit-based, impartial and equitable selection procedure, with vacancies internationally advertised and published, including on the EURAXESS website⁸.

Collaboration with a wider set of partner organisations, including from the [non-academic sector](#), which may provide recruitment, hosting or secondment opportunities or training in research or transferable skills, as well as innovative elements of the proposed programme, will be positively taken into account during the evaluations, when relevant.

Examples of features found in a COFUND Doctoral Programme could include, inter alia,

Inter-sectoral dimension:

- Inviting experts working in industry or other organisations from the [non-academic sector](#) to deliver courses on entrepreneurship, exploitation of research results, open science, ethics, patenting, etc. to the recruited researchers;
- Mentoring the recruited doctoral candidates by researchers and/or experts from the [non-academic sector](#);
- Exposing recruited researchers to various socio-economic actors gathered in a single campus or hub;

⁷ http://ec.europa.eu/euraxess/pdf/research_policies/Principles_for_Innovative_Doctoral_Training.pdf

⁸ <http://ec.europa.eu/euraxess/>

- Offering placement opportunities for a limited, appropriate time to recruited researchers to develop their research projects (i.e. at the premises of potential future employers);
- Creating opportunities for cross-sectoral and cross-disciplinary research.

Interdisciplinary dimension:

- Proposing shared courses or projects to the recruited doctoral candidates from different disciplines;
- Creating multi-disciplinary projects involving different research teams from the same or from different institutions;
- Offering possibilities for laboratory rotations or visits.

International dimension:

- Offering possibilities to take courses abroad to acquire specific sets of skills;
- Developing partnerships, collaborations and/or implementation of joint degree awarding with research institutions, companies or other relevant socio-economic actors based in different countries;

The involvement of different participating organisations should exploit synergies between them to further strengthen the aforementioned international, interdisciplinary and inter-sectoral training and the transferable skills component of the doctoral training programme, in order to best prepare researchers for a wide range of career options.

B. Fellowship Programmes

Fellowship Programmes will fund individual-driven research training and career development fellowships for experienced researchers. The programmes supported ***can have a single call or in the case of several calls must have regular selection rounds following fixed deadlines or regular cut-off dates*** allowing a fair competition between applying researchers. There must be no more than 4 deadlines or cut-off dates per year. Calls for proposals must be advertised as wide as possible, including at international level, and on the EURAXESS website⁹.

Researchers must be selected following an open, transparent, merit-based, impartial and equitable selection procedure, based on international peer review. In particular, there must be substantial involvement, at all stages of the selection process, of independent evaluators from other countries, with no conflict of interest. Selection committees must bring together diverse expertise, have an adequate gender balance and include members with relevant experience to assess the candidates.

Mobility types supported by the Fellowship Programmes may be similar to those supported under Marie Skłodowska-Curie Individual Fellowships. Applicants are

⁹ <http://ec.europa.eu/euraxess/>

encouraged to also include elements of cross-sectoral mobility in their programmes.

Fellowship Programmes must be based on individual-driven mobility, which means that researchers should be able to freely choose a research topic and the appropriate host organisation fitting their individual needs.

Programmes which predefine the fellow's research work at a given location do not conform to this principle. In any case, Fellowship Programmes under COFUND will not support "recruitment schemes" to fill regular research vacancies.

For fellowships where the main part of the research training activity does not take place in an EU Member State or a Horizon 2020 Associated Country, the return phase to a Member State/Associated Country may not be more than 50% of the total duration of the research training activity.

Topic and Duration of the Programmes (DP & FP)

Applicants are encouraged to offer high-quality research options to researchers and to cover as many research disciplines as possible ("bottom-up" approach) with respect to excellence of the proposed research, but they can also focus on specific disciplines, especially for the doctoral programmes.

Please note that programmes that prioritise specific research disciplines based on national or regional Research and Innovation Strategies for Smart Specialisation (RIS3 strategies¹⁰) may also be supported.

The duration of the programmes can vary between 36 and 60 months from the starting date specified in the Grant Agreement. In practice, **the majority of the programmes tend to have the maximum duration (60 months)**, as it allows for the organisation of several calls (if applicable), ensures enough time for the selection and recruitment of the researchers, and their respective implementation within the whole programme lifecycle.

Applicants should present their strategy towards involving the supported researchers in **the communication of their results**. Such activities aim at creating awareness, among the general public, of the research work performed and its implications for citizens and society. The type of outreach activities could range from press articles and participating in European Researchers' Night events to presenting science, research and innovation activities to students from primary and secondary schools or universities in order to develop their interest in research careers. Applicants should explain in the proposal how they intend to implement such activities within their programmes.

¹⁰http://ec.europa.eu/regional_policy/sources/docgener/informat/2014/smart_specialisation_en.pdf

Open Science under Horizon 2020

Open Science¹¹ refers to the objective under Horizon 2020 of increasing openness at all stages of the research life cycle. It notably reflects the ongoing evolution in the *modus operandi* of doing research and organising science, which promotes the use of new tools and workflows by researchers for transparency, reproducibility, dissemination and transfer of new knowledge. It also reflects the globalisation and enlargement of the scientific community to new actors. Examples of what open science encompasses include open access to publications, open access to research data, the use of new scientific reputation systems, the use of big data and citizen science. Hence, incorporating such elements of open science in the training programme of MSCA COFUND researchers could allow them to gain the knowledge and skills to implement these new ways of doing and organising research and help them to position themselves as leaders of the new generation of researchers.

All research activities supported by Horizon 2020 must respect fundamental ethics principles and the relevant H2020 rules (see Annex 5, section 4).

Equal opportunities are to be ensured in the implementation of the actions by a balanced participation of women and men, both at the level of supported researchers and that of decision-making/supervision/management structure.

Applicants having benefited from COFUND under previous calls (under Seventh Framework Programme or under Horizon 2020) must explain how their proposal adds value in relation to previous grant(s). This will be evaluated under the Impact award criterion and can *inter alia* take the form of enhancing the researchers' working conditions compared to what has been implemented before, of diversifying their training options or it can also take the form of increased networking with organisations in less represented countries or capacity building measures there.

"Less represented countries" in this context means EU Member States and Associated Countries which are not or have not been COFUND beneficiaries under FP7 or H2020. These are: Bulgaria (BG), CY (Cyprus), Greece (EL), Lithuania (LT), Latvia (LV), Malta (MT), Romania (RO), Slovenia (SI) and Albania (AL) as well as Bosnia and Herzegovina (BA), Faroe Islands (FO), Georgia (GE), Israel (IL), Moldova (MD), Montenegro (ME), the former Yugoslav Republic of Macedonia (MK), Serbia (RS), Tunisia (TN) and Ukraine (UA).

This list will be updated before every new COFUND call to take account of possible new actions in these countries.

The activities can include but are not limited to secondment opportunities from the beneficiary or partner organisation implementing the action to other partner organisations located in these countries.

¹¹<http://ec.europa.eu/research/openscience/index.cfm>

Eligible Researchers (DP & FP)

Researchers to be recruited within either programme are required to undertake trans-national mobility (i.e. move from one country to another, see definition of the [mobility rule](#) of this guide).

If an **existing programme** intends to deviate from the [mobility rule](#), for instance if a different definition for trans-national mobility was previously applied within the existing programme, it must be justified in the proposal. For new programmes, no exception to this rule is allowed.

Restrictions on nationality of eligible researchers should be avoided, as well as limitations regarding the researchers' origins and destinations. Programmes limiting their access will have to provide justifications of the added value to do so, and will be carefully assessed by the expert evaluators. However, if the programme is implemented by a partner organisation established in a [TC listed in General Annex A to the H2020 Work Programme](#) or if a secondment to an organisation in any TC constitutes the main part of the research training activities, researchers must be nationals or long-term residents of a MS or [AC](#). Long-term residence means a period of at least 5 consecutive years of full-time research activity in MS or [AC](#).

Support cannot be awarded to researchers who are already permanently employed at any of the participating organisations. However, researchers with permanent positions could still benefit from a COFUND programme, if moving to another organisation and complying with the [mobility rule](#) during, for instance, a sabbatical leave.

The lengths of the individual researchers' appointments must be at least 3 months. However, recruitment should take into account the specificities of the programmes. **Doctoral programmes** may take into account the national context in which the doctoral training is provided. For instance, *it is expected that Doctoral Programmes would offer recruitment of [ESRs](#) corresponding to the typical time needed to complete a PhD in the corresponding country.* **For Fellowship Programmes, the typical duration of the individual researchers' appointments of [ERs](#) varies from 12 to 36 months.**

In any case the length of the recruitment should be sufficient to have a meaningful impact on enhancing skills and career perspectives of the involved researchers.

The [beneficiary](#) may, in parallel and through other resources than COFUND (for example, European Structural and Investment Funds), support researchers that do not comply with the [mobility rule](#) to participate in the Programme.

Researchers must be dedicated full time to the research training activities unless duly justified for personal or family reasons and they cannot combine several activities. This also means that a researcher cannot benefit from two MCA/MSCA grants at the same time. Complementary skills training (e.g. a teaching activity as part of the research training) are not incompatible, but must not jeopardise the implementation of the research training activities.

4. Examples of a COFUND programme

Note: We emphasise that any example given in this Guide for Applicants does not imply that there will be a preference shown to similar programmes.

A. Doctoral Programmes

Doctoral Programmes are typically proposed by funding bodies, universities, research institutions or a member of a network of organisations offering doctoral training programmes/schools, and ensuring an **international, interdisciplinary and inter-sectoral training for doctoral candidates**. Collaborations with a wider set of [partner organisations](#), including from the [non-academic sector](#), as well as innovative elements of the proposed training, will be taken into account during the evaluations.

Example 1:

A centre of excellence at a Dutch university proposes a Doctoral Programme in the field of neuroscience. The programme will bring together departments of medicine, physics and engineering and will recruit 10 eligible [ESRs](#) in order to build upon an existing doctoral programme and offer an innovative combination of research and transferable skills training. Eight [partner organisations](#), including a strong [non-academic sector](#) presence, will also contribute to the researchers' training. Although the departments themselves will host and provide the infrastructure and day-to-day training for the recruited researchers, they will exploit a series of complementarities with partner organisations from both the academic and [non-academic sector](#) in order to offer secondments and training. Secondments to these [partner organisations](#), based in both EU Member States and [Associated Countries](#), will ensure exposure to the [non-academic sector](#) as well as specialised training modules that the departments would not otherwise be able to offer.

In this example, the [beneficiary](#) takes full responsibility for executing the proposed training programme, while the recruited researchers are expected to benefit from the informal network with the [partner organisations](#) during the training period. Although most of their training period will be spent at the [beneficiary's](#) premises, active mobility of the recruited researchers towards the [partner organisations](#) in the form of secondments will be expected.

Example 2:

In their Smart Specialisation Strategy, a regional authority has identified as a weakness a lack of international human resources at universities in its region. As one of the measures to tackle this issue, it decides to set up a funding programme for doctoral candidates from abroad. The main research funding agency in this region applies for MSCA COFUND for in total 50 research positions to be divided over the 5-6 universities that are located in this region. Job vacancies are drawn up by the universities and are widely advertised, including a description of the work that has an international, interdisciplinary and

inter-sectoral dimension. The programme itself is managed by the research funding agency, which is also the [beneficiary](#) of the COFUND action.

The following example would not fulfil the minimum requirements of a COFUND proposal:

A university established in a Member State proposes a doctoral school, selecting 10 [ESRs](#) who are residents in that very same Member State, every year, without advertising its vacancies internationally.

In this example, restricting the doctoral school to residents, not respecting the [mobility rule](#), and having the selection of researchers done internally without publishing the vacancies do not meet the requirements and philosophy of the COFUND Doctoral Programmes.

B. Fellowship Programmes

Similarly Fellowship Programmes are typically proposed by funding bodies, universities, research institutions or a member of a network of organisations offering fellowship training programmes/schools, and ensuring an **international, interdisciplinary and inter-sectoral training for researchers**. Collaborations with a wider set of [partner organisations](#), including from the [non-academic sector](#), as well as innovative elements of the proposed training, will be taken into account during the evaluations.

A national or regional fellowship programme set up in a Member State that aims to attract experienced researchers working in other Member States, [Associated](#) or [non-associated Third Countries](#) to the country or region of the programme.

A governmental organisation established in an [Associated Country](#) that offers a special scheme for the reintegration of researchers who have spent at least three years in a [non-associated Third Country](#).

A fellowship programme operated by a private non-profit organisation established in a Member State that so far funded only fellowships of experienced researchers within the country, now decides to open for trans-national mobility and offers fellowships in other Member States, [Associated](#) or [non-associated Third Countries](#).

The following example would not fulfil the minimum requirements of a Fellowship Programme:

A programme where a pre-defined number of positions would be offered by a research institute, with no option for the researcher to choose her/his project and/or host organisation. This programme would clearly not respect the principle of an open call and individual-driven mobility, required for the Fellowship Programmes, as it would offer jobs rather than having a competitive call for proposals.

Programmes must provide for an evaluation process where the pre-selection of candidates is avoided.

5. Examples for combining COFUND with European Structural and Investment Funds (ESIF)

Example 1

A new research centre is being created in a specific region of a certain MS, the building of its large research infrastructures being financed by the ESIF. It aims at attracting promising researchers in several fields of expertise and in particular in recruiting young researchers. However, no PhD programmes exist in this Region to support training of researchers in those scientific areas. The research centre therefore decides to apply for COFUND, to help establish new doctoral programmes at the local University covering training in those scientific fields of interest. As part of their doctoral training, the recruited researchers shall follow some research training abroad in order to gain international experience and to diversify their skills and working methods.

Example 2

An existing fellowship programme run by a University established in a MS is lacking an international and inter-sectoral dimension in the current training it proposes and consequently failing to recruit sufficient researchers who will meet the increasing and diversified needs triggered by its evolving research activities. In order to address this issue, the University decides to apply for ESIF to fund national and international researchers who will experience working in the private sector, while applying for COFUND to support further international researchers recruitment and to improve the quality and streamlining of the selection and recruitment procedures of the programme.

For more information about synergies between European Structural and Investment Funds follow this link:

[Enabling synergies between European Structural and Investment Funds, Horizon 2020 and other research, innovation and competitiveness-related Union programmes](#)

6. Financial Regime

The financial support for COFUND takes the form of "unit costs", i.e. fixed amounts per unit of measure. In the case of COFUND, the unit of measure is the eligible person-month.

The unit costs cover researcher unit costs and institutional unit costs.

A. Researcher Unit Costs

The EU contribution to the researcher costs must be used exclusively for the living allowance provided for the benefit of the researcher appointed under the

programme. These amounts are indicated in the table below, for early-stage researchers in Doctoral Programmes, and for experienced researchers in Fellowship Programmes, respectively:

Researcher category	EU contribution to living allowance for researchers recruited under an employment contract ¹² (EUR/person-month)
Early-Stage Researchers (ESR)	1 855 ¹³
Experienced Researchers (ER)	2 625 ¹⁴

Additionally, according to the specifications provided in the MSCA [Work Programme](#), the sum of the living allowance (salaries, social security contributions, taxes and other costs included in the remuneration) and the mobility allowance, offered by the programme to the researcher must in no case be lower than the following figures:

- For the [early-stage researchers](#), recruited under an employment contract/equivalent direct contract, a minimum of EUR 2 597/person-month;
- For the [experienced researchers](#), recruited under an employment contract/equivalent direct contract, a minimum of EUR 3 675/person-month.

These amounts represent the minimum total costs to be paid to the researcher.

In practice, this means that the [beneficiary](#) must, at a minimum, ensure the necessary funds to cover the difference between the EU contribution (EUR 1 855 or EUR 2 625/person-month, for [ESR](#) and [ER](#), respectively) and the minimum amounts for living and mobility allowances (EUR 2 597 or EUR 3 675/person-month, for [ESR](#) and [ER](#), respectively).

Note that all applicants have to specify and **explain in their proposal the total amounts that will be provided for the benefit of the researcher and for the organisation(s) that is hosting the researcher**. This information will be needed for the expert evaluators to assess the adequacy of employment and working conditions of the researchers.

The [beneficiary](#) or the partner organisation implementing the programme must recruit each eligible researcher under an employment contract or other direct contract with equivalent benefits, including social security coverage. ***For both the Doctoral and the Fellowship Programmes fixed-amount fellowships are only permitted where national law would prohibit the possibility of an employment contract/equivalent direct contract*** and only with the prior approval of the Research Executive Agency. In such cases, the [beneficiary/partner organisation](#) must ensure that minimum social security coverage is provided to the researcher for at least sickness, parental

¹² Or other direct contract with equivalent benefits, including social security coverage.

¹³ This figure represents the EU contribution as established in Commission Decision No C(2013) 8194.

¹⁴ This figure represents the EU contribution as established in Commission Decision No C(2013) 8194.

benefits, invalidity and accidents at work and occupational diseases. This cover does not necessarily have to be paid from the EU contribution for the fixed-amount fellowship.

When employment contracts/equivalent direct contracts are prohibited by law, and fixed-amount fellowships would be foreseen, then the EU contribution on the basis of unit costs mentioned in the table above and the minimum allowances for the benefit of the researchers would be reduced by half. The European Charter for Researchers and the Code of Conduct for the recruitment of researchers offer a reference framework for the employment of researchers.

B. Institutional Unit Costs

In addition to the researcher unit cost, there will be an EU contribution for institutions on the basis of unit costs, which amounts to **EUR 325/person-month for each eligible researcher**¹⁵. These costs must be used towards the management of the programme. This EU contribution is expected to be shared between the [beneficiary](#) and the partner organisation(s).

Other cost items (such as mobility allowance, family allowance, research, training and networking costs, travel, and indirect costs) may be funded through other resources, including other EU funds such as the European Structural and Investment Funds, but not through funding from the Horizon 2020 Framework Programme.

Budget Calculations

Applicants are not required to indicate the amount of the estimated EU contribution in their proposal. This will be automatically calculated from the information provided in the Part A forms of the proposal using the number of person-months requested in the proposal and the respective unit costs indicated in the [Work Programme](#).

It is critical that the information given in Part A Forms is identical to the information given in proposal Part B. In case of discrepancy, the information provided in the Part A will take precedence, unless there is an obvious clerical error.

NB: For this call, the maximum EU contribution is EUR 10 million per [beneficiary](#).

Financial statements must be drafted in euro.

¹⁵ This figure represents the EU contribution as established in Commission Decision No C(2013) 8194.

Example of Budget:

In this example, the amount proposed for [living allowance + mobility allowance] for ER complies with the minimum requirement: **[€ 4800+ € 500 = € 5300] > € 3675**

As a reminder, required minimum amounts :
ER: € 3675
ESR: € 2597

Other cost items than the living allowance and the management costs must be funded through other resources (including ESIF funds)

Example (Fellowship programme – ER)

Cost item	Total cost [€ per person-month]	EU contribution [€ per person-month]
Living allowance	4800	2625
Mobility allowance	500	
Research costs	500	
Management costs	600	325
Indirect costs	600	
Total	7000	2950

COFUND Key Points

Common features

- One single [beneficiary](#) from an EU Member State or [Associated Country](#), filling the A Forms electronically and submitting the proposal Part B. Partner organisations that recruit researchers in the context of a Doctoral or Fellowship programme must be established in an EU Member State, H2020 Associated Country, or Third Country listed in General Annex A to the H2020 Work Programme. Partner organisations providing secondments can be established in any country, i.e. in any Member State, Associated Country, or non-associated Third Country (including those not listed in Annex A). Partner organisations, which contribute to the programme funding, must provide a letter of commitment to be added to the Part B proposal.
- Eligibility of researchers applies at the date of recruitment/the call deadline.
- Researchers must be offered employment contracts or other direct contracts with equivalent benefits, including social security coverage. Fixed-amounts fellowships would only be allowed in exceptional cases, where the national law would prohibit employment contracts/equivalent direct contracts.
- Trans-national [mobility rule](#) applies to all researchers supported, unless otherwise clearly specified and explained in the proposal, for existing programmes only.

Doctoral Programmes

- Programmes aim at the selection of [early-stage researchers](#) as doctoral candidates.
- Selection of researchers must follow an open, transparent, merit-based, impartial and equitable procedure.
- Vacancies must be internationally advertised and published.
- Recruitment of researchers corresponding to typical time needed to complete a PhD in the corresponding country.
- Candidates to the programmes should be given freedom to choose among research projects of their preference.

Fellowship Programmes

- Programmes aim at the selection of [experienced researchers](#).
 - Fellowships must be granted via a single call for proposals or regular calls for proposals, internationally advertised and published, with fixed deadlines or regular cut-off dates (max. 4 per year).
- Selection of researchers must follow an open, transparent, merit-based, impartial and equitable procedure, based on international peer review.
- Typical recruitment of researchers duration: from 12 to 36 months.
- Candidates to the programmes should be able to submit proposals, with the freedom to draft their research project and to choose in which host organisation they wish to carry out their research work.

NB

- Programmes tend to have a total duration of 60 months (i.e. the maximum duration).
- Each application can only cover one of the two types of programmes. In case applicants would like to apply for both DP and FP, two separate applications must be submitted.
- Note that under H2020, there will no longer be a phase of project negotiation. Evaluators will therefore not make recommendations for improvements. This implies that proposals must clearly conform to the requirements of the COFUND scheme (e.g. open and international publication, free choice of topic and host, etc.) to be evaluated positively.

Annexes

- Annex 1 Timetable and Specific Information for this Call
- Annex 2 Evaluation Criteria and Procedures to be applied for this Call
- Annex 3 Instructions for Completing Part A of the Proposal
- Annex 4 Instructions for Drafting Part B of the Proposal
- Annex 5 Part B template

Annex 1 – Timetable and Specific Information for this Call

The **Marie Skłodowska-Curie actions [Work Programme](#)** provides the legal background and conditions to be considered when submitting a proposal to this call. It describes the content of the topics to be addressed and the details of how it should be implemented. The [Work Programme](#) is available on the Participant Portal call page, where the conditions for the call are described. Please consult these documents.

Indicative timetable for this call:

Call Opening	<i>14 April 2016</i>
Deadline for submission of proposals	<i>29 September 2016 at 17:00:00, Brussels local time</i>
Evaluation of proposals	<i>December 2016</i>
Information on the outcome of the evaluation	<i>March 2017</i>
Indicative date for the signing of grant agreements	<i>May 2017</i>

Indicative call budget: € 80 million.

€ 30 million is allocated to the Doctoral Programmes.

€ 50 million is allocated to the Fellowship Programmes.

Annex 2 – Evaluation Criteria – Procedures to be applied for this Call

1. General

The evaluation of proposals is carried out by the Research Executive Agency (REA) with the assistance of independent experts.

REA staff ensures that the process is fair and in line with the principles contained in the Commission's Guidelines¹⁶ and the relevant sections of the MSCA Work Programme.

Experts perform evaluations on a personal basis, not as representatives of their employer, their country or any other entity. They are independent, impartial and objective, and behave in a professional manner. In addition, an independent observer will be appointed by the REA to observe and report on the evaluation process. The observer gives independent advice to the REA on the conduct and fairness of the evaluation sessions, on the way award criteria are applied by the experts and provides recommendations on how to improve the evaluation procedures. The observer will not express views on the proposals under examination or on the experts' opinions on the proposals.

Proposals are submitted in a single stage and evaluated in one step by the experts against all award criteria.

Conflicts of interest: under the terms of the expert contract, all experts must declare beforehand any conflict of interest and must immediately inform the responsible REA staff member if they detect a conflict of interest during the course of the evaluation.

Confidentiality: the expert contract also requires experts to maintain strict confidentiality with respect to the whole evaluation process. They must follow any instruction given by the REA to ensure this. Under no circumstance may an expert attempt to contact an applicant on his/her own account, either during the evaluation or afterwards.

2. Before the Evaluation

Once received by the REA, proposals are registered and acknowledged and their contents entered into a database to support the evaluation process. Admissibility and eligibility criteria for each proposal are also checked by REA staff before the evaluation begins. Proposals which do not fulfil these criteria will not be included in the evaluation.

For this call a proposal will only be considered **admissible** if it meets all of the following conditions:

¹⁶ http://ec.europa.eu/research/participants/data/ref/h2020/grants_manual/pse/h2020-guide-pse_en.pdf

- It is submitted in the electronic submission system before the call deadline;
- It is readable, accessible and printable.

Incomplete proposals may be considered inadmissible. Therefore, the proposal must include the requested administrative forms in Part A and the proposal description in Part B (with all sections and supporting documents).

A proposal will only be considered **eligible** if it meets all of the following conditions:

- It involves one [beneficiary](#) from a MS or [AC that funds or manages Doctoral Programmes or Fellowship Programmes for researchers](#);
- The content of the proposal corresponds to the topic(s) and funding scheme(s), including the specific conditions set out in the relevant parts of the MSCA Work Programme.

3. Selection criteria

The operational capacity of the beneficiary is assessed at the proposal stage. Operational capacity shows whether an applicant has the basic operational resources and capacity to implement the action, and, in particular, the parts in the proposal for which it is responsible. Please note that this assessment is based on the following information to be provided in the proposal:

- A description of administrative, technical and human resources to implement the programme;
- A description of any [partner organisations](#) (when known) that will be contributing to the action by implementing a Doctoral or Fellowship programme (including recruitment of researchers).

If the experts evaluating the proposal reach a consensus that the applicant lacks sufficient operational capacity, then the proposal would be rejected.

4. Award Criteria

Each proposal will be assessed independently by at least three experts chosen by the REA from the pool of experts taking part in this evaluation. An expert will be designated as the proposal 'rapporteur' and will assume additional responsibilities during the evaluation process.

Each criterion will be scored out of 5. Decimal points may be given. The scoring table is the following:

- 0 – **The proposal fails** to address the criterion or cannot be assessed due to missing or incomplete information.
- 1 – **Poor.** The criterion is inadequately addressed, or there are serious inherent weaknesses.
- 2 – **Fair.** The proposal broadly addresses the criterion, but there are significant weaknesses.
- 3 – **Good.** The proposal addresses the criterion well, but a number of shortcomings are present.
- 4 – **Very good.** The proposal addresses the criterion very well, but a small number of shortcomings are present.
- 5 – **Excellent.** The proposal successfully addresses all relevant aspects of the criterion. Any shortcomings are minor.

An example of the evaluation forms used by the experts will be made available on the Participant Portal.

Evaluation scores will be awarded for each of the three criteria (and not for the sub-elements of each criterion). However, these elements are considered by the experts in the assessment of the criteria.

The proposal will be evaluated against the award criteria defined in the [Work Programme](#), as follows:

Excellence	Impact	Quality and efficiency of the implementation
Quality of the selection / recruitment process for the researchers (transparency, composition and organisation of selection committees, evaluation criteria, equal opportunities)	Enhancing the potential and future career perspectives of researchers; Strengthening human resources on regional, national or international level	Coherence, effectiveness and appropriateness of the work plan
Quality of the research options offered by the programme in terms of science, interdisciplinarity, intersectorality and level of transnational mobility	Aligning practices of participating organisations with the principles set out by the EU for human resources development in research and innovation	Appointment conditions of researchers
Quality of career guidance and training , including supervision arrangements, training in transferable skills	Quality of the proposed measures to exploit and disseminate the results	Competence of the participant to implement the programme
	Quality of the proposed measures to communicate the results to different target audiences	
Weighting		
50%	30%	20%
Priority in case of ex aequo		
1	2	3

An overall threshold of 70% will be applied to the total weighted score.

Annex 3 – Instructions for Completing "Part A" of the Proposal

Proposals for this call must be submitted electronically, using the electronic submission service of the European Commission accessible from the call page on the Participant Portal.

In Part A the applicant will be asked for administrative details and information that will be used in the evaluation and further processing of the proposal. Part A constitutes an integral part of the proposal. Details of the work the applicant intends to carry out will be described in Part B (see Annex 4 and 5 of this guide).

The electronic submission service provides guidance on how to complete the Part A, which includes the following sections:

- Section 1: General information about the proposal (including the abstract)
- Section 2: Administrative data on the participating organisation ([beneficiary](#))
- Section 3: Budget (request for funding in terms of researcher person-months)
- Section 4: Ethics issues table
- Section 5: Call specific questions (including information on partner organisations)

1. The Concept of Panels

The evaluation is organised in two different panels:

- A) Doctoral Programmes; and
- B) Fellowship Programmes.

In the electronic submission tool, the applicant chooses the panel to which the proposal will be associated.

2. Budget

The budget of the proposal will be calculated automatically by the system when the applicants enter the total number of person-months requested for the programme (i.e. the result of the multiplication of the number of researchers to be recruited by the duration of the researchers' appointments, multiplied with the rates defined in the [Work Programme](#)). Care should be taken when entering this data.

Expert evaluators will score the appropriateness of the proposed number of person-months for the programme under the "Quality and efficiency of the implementation" criterion.

Annex 4 – Instructions for Drafting "Part B" of the Proposal

This annex provides guidelines for drafting Part B of your COFUND proposal. It will help you to present important aspects of your planned work in a way that will enable the experts to make an effective assessment against the award criteria (see Annex 2).

A maximum length of 30 pages is applicable to Part B (Section 1 to 3) of the proposal. You must keep your proposal within these limits. Expert evaluators will be instructed to disregard any excess pages.

Part B of the proposal contains the details of the proposed research and training programmes along with the practical arrangements planned to implement them. They will be used by the independent experts to undertake their assessment. We would therefore advise you to address each of the award criteria as outlined in the sections below. Please note that the explanatory notes below serve to explain the award criteria without being exhaustive.

Applicants must structure their proposal according to the headings indicated in the Part B proposal template

Please note that this call will be a single-stage proposal submission and evaluation procedure. A Word version of the submission template can be downloaded from the electronic submission services of the Commission. Applicants must ensure that proposals conform to this layout and to the instructions given in this Guide for Applicants.

The **minimum font size** allowed is **11** points. The page size is A4, and all **margins** (top, bottom, left, right) should be at least **20 mm** (not including any footers or headers). Ensure that the font chosen is clearly readable (e.g. Arial or Times New Roman).

Please make sure that **Part B of your proposal carries as a header to each page the proposal acronym and the scheme to which you are applying (i.e. DP or FP)**. All pages should also be numbered in a single series on the footer of the page to prevent errors during handling. It is recommended that you use the numbering format "Part B - Page X of Y".

Incomplete proposals considered inadmissible will not be evaluated. You will only be able to upload one single PDF file which should include the sections 1 to 5 (see below). If you upload twice the second file will overwrite the first.

Scientific Misconduct

Please note that the REA takes the issue of scientific misconduct very seriously. In line with the Horizon 2020 Rules for Participation, appropriate action will be taken against any applicants found to have misrepresented, fabricated or plagiarised any part of their proposal. Applicants will be required to make a "declaration on honour" in Part A of the proposal.

[delete as appropriate]**

Part B - Page X of Y

Table of Contents

In drafting PART B of the proposal, applicants must follow the structure outlined below.

0. GENERAL DESCRIPTION OF THE PROGRAMME (Maximum 2 pages)

LIST OF PARTICIPATING ORGANISATIONS

START PAGE COUNT

1. EXCELLENCE

2. IMPACT

3. QUALITY AND EFFICIENCY OF THE IMPLEMENTATION

STOP PAGE COUNT

4. ETHICS ASPECTS

5. LETTERS OF COMMITMENT FROM PARTNER ORGANISATIONS

NB: Applicants must ensure that sections 1-3 do not exceed the limit of 30 pages.

Please note that the principles of the European Charter for Researchers and Code of Conduct for the Recruitment of Researchers promoting open recruitment and attractive working conditions are recommended to be endorsed and applied by all the funded participating organisations in the MSCA. Some of these principles are reflected as obligations in the Grant Agreement and are therefore contractually binding.

0. General description of the programme (Maximum 2 pages, not evaluated)

LIST OF PARTICIPATING ORGANISATIONS

Name of Beneficiary	Beneficiary short name	Country	Academic (Y/N)

For partner organisations, please provide additional data as indicated in the table below.

Partner organisation name	Partner organisation short name	Country	Academic (Y/N)	Department / Division / Laboratory

Note that:

- Any relationship between different participating organisations or individuals (e.g. family ties, shared premises or facilities, joint ownership, financial interest, overlapping staff, etc.) **must** be declared and justified;
- The data provided relating to the financial capacity of the beneficiary will be subject to verification during the grant preparation phase.

Under each sub-criterion it is advised to develop at least the following points:

1. Excellence

1.1 Quality of the selection/recruitment process for the researchers (transparency, composition and organisation of selection committees, evaluation criteria, equal opportunities)

Demonstrate the transparency of the selection process of the researchers

- Dissemination of the calls in appropriate ways;
- Information provided to the candidates (e.g. conditions of the fellowship, host institution, evaluation process, results, review/appeal, etc.);
- Eligibility criteria and application requirements;
- Any other relevant point.

Describe the organisation of selection process

- Composition of committees involved in the different stages of the process (i.e. eligibility check, evaluation, selection);
- Selection of experts;
- Fellows/Researchers' selection workflow and powers entrusted to the different actors;
- Any other relevant point.

List the Evaluation Criteria

- Criteria/sub-criteria for the selection of researchers;
- Any other relevant point (scoring, thresholds, etc.).

Ensure equal opportunities

- Equal opportunities are to be ensured in the implementation of the actions by a balanced participation of women and men, both at the level of supported researchers and that of decision-making/supervision/management structure;
- Any other relevant point.

1.2. Quality of the research options offered by the programme in terms of science, interdisciplinarity, intersectorality and level of transnational mobility

- Excellence of the research programme;
- Quality of the research options in terms of interdisciplinary research options, intersectorality (mobility between the academic and non-academic sector) and international networking;
- Any other relevant point.

1.3. Quality of career guidance and training, including supervision arrangements, training in transferable skills

Describe the supervision arrangements

- Specific mentoring or support schemes in place to support career development;
- Any other relevant point.

Describe the training

- Training on skills within the chosen discipline and/or to gain new skills;
- Support and/or additional training in non-research oriented transferable skills;
- Any other relevant point.

2. Impact

2.1 Enhancing the potential and future career perspectives of researchers; strengthening human resources on regional, national or international level

- Describe how the potential and future career perspectives of selected researchers will be enhanced;
- Outline how the proposed programme will impact on strengthening research human resources on regional, national or international level;
- Any other relevant point.

2.2 Aligning practices of participating organisations with the principles set out by the EU for human resources development in research and innovation

- Describe how the programme will contribute to the implementation of principles set out by the EU for the human resources development in R&I (such as Charter and Code¹⁷, or the Principles for Innovative Doctoral Training for DP) at the participating organisations;
- For applicants having benefited from COFUND under previous calls (under Seventh Framework Programme or under Horizon 2020): explain how the new proposal adds value in relation to previous grant(s). This could for example take the form of enhancing the researchers' working conditions or of diversifying their training options. Added value could also take the form of increased networking with organisations in less represented countries or capacity building measures there.
- Any other relevant point.

2.3 Quality of the proposed measures to exploit and disseminate the results

- Describe plans and procedures for dissemination and exploitation of results;
- Intellectual Property Rights issues (if relevant);
- Any other relevant point.

2.4 Quality of the proposed measures to communicate the results to different target audiences

- Communication and public engagement strategy of the programme to the different target audiences;
- Any other relevant point.

¹⁷ <http://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=CELEX:32005H0251&from=EN>

3. Quality and efficiency of the implementation

3.1 Coherence, effectiveness and appropriateness of the work plan

- Describe the management plan of the programme and the resources; include a timeline or Gantt chart giving an overview of at least the:
 - Expected start and end date of the action (number of months);
 - Number of Calls;
 - Opening/Closing date of the call(s);
 - Number of fellowships offered per call;
 - Evaluation timeline;
 - Expected/planned start/end date of researchers' appointments.
- Financial management and risk management/contingency plans of the programme;
- Any other relevant point.

3.2 Appointment conditions of researchers

- Amounts that will be provided for the benefit of the researcher (e.g. living, mobility, travel and family allowances) and for the organisation that is hosting the researcher (contribution to research, training and networking costs, indirect costs);
 - Working conditions, institutional administrative support, and available services/facilities;
 - Employment conditions, including statutory working practices, social security coverage and social benefits;
 - Compare the proposed working conditions proposed through the programme with the regional and/or national and/or sectoral ones;
 - Any other relevant point.

3.3 Competence of the participant to implement the programme

- Description of administrative, technical and human resources to implement the programme, and, if known, description of [partner organisations](#) contributing/recruiting/hosting the researchers;
- Support offered to candidate researchers during the application/recruitment/implementation;
- Any other relevant point.

The following table (or similar) should be used to detail the financial aspects of the programme. Please note that the amounts for the living allowance and for the mobility allowance must be specified individually.

Cost categories	EU contribution (EUR/person-month)	Total cost = EU contribution + own resources (EUR/person-month)
Living allowance	1 855 (for ESR)* 2 625 (for ER)*	***
Mobility allowance**	N/A	***
Family allowance**	N/A	
Travel allowance**	N/A	
Research costs**	N/A	
Other (training, etc.) **	N/A	
Management costs	325	
Indirect costs**	N/A	

*Choose the applicable rate, and delete the other.

** If applicable, delete otherwise. Other lines can be included for categories not shown in the template above.

*** The sum of living and mobility allowances must not be lower than EUR 2597 for [ESR](#) and EUR 3675 for [ER](#).

The following work packages and pre-filled deliverables are mandatory. (Add the additional ones that you consider relevant)

Work package number	1	Start date or starting event:	
		Final date:	
Work package title	Management		

<p>Deliverables</p> <p>D1.1 Researcher Declaration to be submitted within 20 days of the start of the research training activities, one for each researcher;</p> <p>D1.2 Periodic Report to be submitted within 60 days following the end of each reporting period.</p> <p>D1.3 Final Report.</p>

Work package number	2	Start date or starting event:	
		Final date:	
Work package title	Dissemination of the Programme and its Calls		

<p>Deliverables</p> <p>D 2.1 Report/s on communication and dissemination activities (containing at least the following information):</p> <ul style="list-style-type: none"> – Dates of Call Publication and places where it was published (Supporting documents required). – Flyers, brochures, or other information produced – Presentations, conferences and meetings or other events – Published articles in the press (please list and attach only main articles) – Any other means of advertising the programme <p>D 2.2 Inform for each call the Project Officer by sending the link to the Euraxess website where the Call has been published</p>
<p>M 2.1 Milestone</p> <p>Publication of the Call</p>

Work package number	3	Start date or starting event:	
		Final date:	
Work package title	Evaluation and Selection		

Deliverables

D3.1 Report for each call on evaluation and selection

(containing at least the following information):

- Number of applications received (how many eligible/ineligible?)
- Date when the evaluation and selection took place
- Names and affiliations of experts involved (from which countries? gender? sectors?)
- Was the evaluation done remotely or onsite?
- Was there a briefing of the experts?
- Number of experts evaluating each proposal
- Number of proposals passing/failing evaluation
- Number of researchers finally selected under the specific Call (and in the reserve list, if relevant).

...

Work package number	4	Start date or starting event:	
		Final date:	
Work package title	Ethics Issues		

Deliverables

D.4.1 Report for each call on ethics issues

The beneficiary has to submit an Ethics Report **after each call and a Final Ethics Report** together with the Final Report. These reports will form the Ethics Work Package.

The Ethics Reports after each call should contain at least the following information:

- A short description on how the ethics procedure in place (as described in Annex I of the Grant Agreement) was followed and the adaptations made if relevant. This part should also include a description of the role and composition of the ethics committee if such a committee was involved.
- An overview table based on the following structure (only for the successful researchers and for those research projects having ethics issues)
 - name of the researcher
 - the title of research project with ethics issues
 - the ethics area(s) concerned
 - conditions to be fulfilled for funding and ethics requirements to be monitored during implementation; follow-up during the implementation.
- The Final Ethics Report should summarise the ethics procedure followed during the entire project lifecycle and focus on the adaptation made and lessons learned. The report should also confirm that all required

approvals/authorisations were obtained and that the research was conducted in compliance with the ethics principles and applicable international, EU and national law.

STOP PAGE COUNT – MAX 30 PAGES

4. Ethics Aspects

All research activities in Horizon 2020 must respect fundamental ethics principles, including those reflected in the Charter of Fundamental Rights of the European Union¹⁸ and the relevant ethics rules of H2020. These principles include the need to ensure the freedom of research and the need to protect the physical and moral integrity of individuals and the welfare of animals.

Ethics is important for all research domains. Informed consent and confidentiality are as important for a sociological study as they are for clinical research.

In this context, please be aware that it is the applicants' responsibility to identify any potential ethics issues, to handle the ethics aspects of their proposal, and to detail how they plan to address them.

COFUND programmes often follow a bottom-up approach and it is often not known in advance if the fellowships to be funded will raise ethics issues. Therefore, it is important to describe how the proposal meets the European as well as the national legal and ethics requirements of the country or countries where the tasks raising ethics issues are to be carried out. In particular, applicants should take care to describe the ethics procedures that they will enforce in the execution of the programme.

In practice, this means that the successful COFUND programmes, when opening their calls for proposals, will have to detail the procedure to be followed for addressing proposals raising ethics issues.

5. Letters of Commitment from Partner organisations

Please use this section to insert scanned copies of the letters of commitment from the [partner organisations](#). For [partner organisations](#) that contribute to the funding of the programme, it is mandatory to provide the details of their contribution by filling up the summary table below. In addition, the letter of commitment must specify their precise role in the programme.

Letters of commitment are not compulsory for partner organisations that do not contribute to the funding of the programme.

Legal Entity	Financial Contribution

¹⁸ Charter of Fundamental Rights of the European Union, 2000/C 364/01.
