Community research

# **„Food Quality and Safety Research: First Results from FP6“**

**Christian Patermann  
Brussels, 12.12. 2006**

**Conference organised by Directorate General for Research  
Directorate for Biotechnologies, Agriculture, Food**

**FOOD QUALITY AND SAFETY**

EUROPEAN  
COMMISSION

Community research

- FP6/TP5– Food Quality and Safety Research Programme 2002-2006: 4 main calls; 2948 contractors, 187 projects, 750 M€
- TP5/Call 1 (deadline April 2003): 39 projects, for a total Community contribution of some 204 million euros. 6 IPs, 6 NoEs, 11 STREPs, 1 CA and 15 SSAs.
- This Conference destined to EU stakeholders. 12 on-going projects: 6 IPs, 3 NoEs, 3 STRPs (all except one IP: from call 1). Selected on the basis of their (preliminary) outputs.
- At a time when all the research community is focussed on the forthcoming FP7, it is important to show that FP6 is delivering results.
- There is a need to reinforce the communication and dissemination of results towards the social and economic society, and its involvement in on-going and future research projects.
- Due return to all of you, as citizens, tax payers and potential beneficiaries of the progress made in science
