

ISRAEL
ISRANOS
Israel night of Science
Galilee Region, Jerusalem and suburbs, Haifa, Tel-Aviv, Bar-Ilan

Organised by

Ministry of Science, Culture and Sport (contact: **Ilana LOWI**, ilana@most.gov.il), with MIGAL – Galilee Technology Center, The Hebrew University of Jerusalem, Bloomfield Science Museum Jerusalem, The Weizmann Institute of Science, Clore Garden of Science Technion-Israel Institute of Technology, MadaTech-Israel National Museum of Science, Technology and Space, Tel-Aviv University, Bar-Ilan University

(Jordan valley, Weizmann Institute, Haifa)

Galilee Region: lectures (research in ecology and other fields), visits in labs, visit of Jordan valley (river sites, water treatment works, research organisations) art performance on use of waste materials, hands on experiments specifically addressed to children and students

Jerusalem: *facts brought to light* (mystery behind the glow, seeing the light in different light, let's shed the light on it!), *night sky observations* (scientific look at the night sky through advanced telescopes, background and lectures) *track'n tail: getting to know the knights of the night* (nocturnal safaris: nocturnal animals watch and urban ecology) **Bloomfield museum:** *science is also for me:* (science theatre, workshop for children and parents, games, competition), *brain in the night* (panels and talks with scientists, exhibitions dedicated to brain), *science coming closer to population* (workshops, hands on experiments, exhibitions, science shows); **Weizmann Institute:** *scientific café* and *labs tours*; **Clore garden of science:** 500m *solar system model*, special night *illumination, workshops*, garden *explanation, astronomy festival*

Haifa: *science fair* (encounters between public and researchers, scientists in slippers, scientists in everyday life, themes: green is beautiful, road safety, astrophysics and space; exhibitions, presentations, competition, debates, guided telescopic observations) **Wonderland** (films, interactive exhibitions, displays, chats with scientists, hands on experiments, models to be built...

Tel Aviv: *lectures and experiments* (broad series of disciplines), *research workshops*, time illusions, time paradoxes, the five senses, *lab demonstrations*, guided *tours of campus and gardens* (zoological, botanic, entomology collection...)

Bar-Ilan: A campus lab, demonstrations, encounters and *exchanges* with researchers, *workshops* run by specialists, *exhibitions* on astronomy and nanotechnology...
