Training and mentoring of science shops (TRAMS)

FP6 Coordination Action
(1 May 2005 – 1 May 2008)

Directorate Science and Society
Unit Education and Science

Living Knowledge
The International Science Shop Network

TRAMS objectives

- encourage development of emergent science shops through provision of training and mentoring support
- support ongoing professional development of existing science shops and similar organisations through sharing training materials and experiences from daily practices
- update professional development
- provide structural activities for Living Knowledge network
