Aı	Annex 2: data collection questionnaire 2010 and 2011						

#### 1. INTRODUCTION AND MAIN FINDINGS

This note presents data on the number of portable documents A1 ("PD A1"), previously E101 certificates<sup>1</sup>, issued in EU Member States (and Iceland, Norway and Liechtenstein) during 2010 and 2011. PD A1 is issued when a worker or a self-employed person is posted in another EEA country. PD A1 is further used when a person is normally employed in more than one EEA country at the same time or in alternation. PD A1 certifies which social security legislation applies to the holder. Under the EU rules on coordination of social security systems a person is only subject to the social security legislation of one country at any time.

In the course of the latest data collection exercise during summer 2012, DG Employment has requested and received data from all 27 EU Member States as well as Iceland, Liechtenstein and Norway<sup>2</sup>. The data show the number of PD A1 issued in these countries under Council Regulation (EC) No 883/2004 on the coordination of social security systems.

Almost all countries provided figures on PD A1 issued for postings to specific Member States as well as cases linked to international transport, activities in 2 or more countries or other cases under the Regulation. Out of the 30 countries replying to the questionnaire for 2011, 14 also provided a breakdown of data by sector of economic activity for posting cases.

The data originate from administrative sources from countries' ministries for labour or social affairs or social security or social insurance authorities.

The main findings emerging from the 2010-11 data collection are the following:

- In 2011, a total of 1.51 million PD A1 were recorded across the EU-27 and Iceland, Liechtenstein and Norway. Of these, around 1.21 million related to postings to specific countries. The remainder of almost 300,000 cases fell into the categories international transport, persons active in 2 or more Member States or other cases. This represents a strong increase compared to 2010 (1.33 million, among which 1.06 million related to postings to specific countries) and 2009 (respectively 1.27 million and 1 million).
- In 2011, around 60% of all postings (compared to 63% in 2010) originated in the EU-15 Member States<sup>3</sup> and almost 40% (compared to 37% in 2010) in the EU-12 Member States<sup>4</sup>. Postings originating in EEA-EFTA<sup>5</sup> countries accounted for only 0.2% of all postings.
- In 2011, the main sending countries of posted workers were Poland, Germany and France followed by Romania, Hungary, Belgium and Portugal. The main receiving countries

<sup>&</sup>lt;sup>1</sup> From 1 May 2010, E101 forms have been replaced by A1 forms due to Council Regulation (EC) No 883/2004 on the coordination of social security systems and appropriate Decisions of the Administrative Commission for the Coordination of Social Security Systems. E101 forms continued however to be used to some extent in 2010 and 2011. In replying to the questionnaire, countries were asked to sum up the E101 and A1 forms for each of the year (2010 and 2011). Throughout this report the term A1 forms therefore refers to both A1 and E101 forms.

 $<sup>^{2}</sup>$  Sweden provided data on certificates issued for posting to other countries only for the year 2011 (but not for 2010) and Switzerland did not provide any data for neither 2010 nor 2011. However, for both years, these two countries are included in this report as destination countries of workers posted from other countries.

<sup>&</sup>lt;sup>3</sup> The Member States forming part of the EU before 1 May 2004.

<sup>&</sup>lt;sup>4</sup> The Member States that joined the EU in 2004 and 2007.

<sup>&</sup>lt;sup>5</sup> Throughout this report the aggregate 'EEA-EFTA' refers to Iceland, Norway and Liechtenstein while the aggregate 'EFTA' refers to Iceland, Norway and Liechtenstein plus Switzerland.

were Germany and France followed by the Netherlands, Belgium, Spain, Italy and Austria.

- The data shows a pattern of distribution of posted workers between sending and receiving countries which largely seems to follow geographical proximity.
- Compared to 2009, the data indicate an increase in the number of postings, which occurred mainly between 2010 and 2011. The number of posted workers sent abroad has increased the most in relative terms (more than 70% increase) from Slovenia, Romania, Latvia, Estonia, Lithuania and Bulgaria. In absolute terms, the number of posted workers sent abroad has also increased strongly from Germany, Poland, Hungary and Slovakia.
- Moreover, the number of posted workers received from abroad has increased sharply (over 2009-11) in Austria, Norway and Germany (more than 40% increase) and in absolute terms also in Belgium, the Netherlands, Italy and Switzerland. On the contrary the number of workers posted to Spain and Greece has decreased, most probably in relation with the decline of labour demand subsequent to the crisis in those two countries.
- Concerning sectoral breakdown, the comparability and usefulness of the data is limited by the fact that for 2011, 16 countries did not provide figures by economic activity, including two countries with large number of postings (DE, FR). The data from the 14 countries which did provide a sectoral breakdown for 2011 suggest that on average around 71% of PD A1 issued were for industry, including 43% into the construction sector. The share of the PD A1 issued for activities in the service sector is around 27% (compared to 44% in 2009, but among a different group of countries). Agriculture and fishing make for around 2.5% of all PD A1.
- The A1 data collection fills an important information gap concerning the posting of workers. Despite some limitations (no information on duration of postings, limited data on sectors,...<sup>6</sup>) it is still the only source, to our knowledge, which allows for a comparable overview of the number of postings across EU-Member States.

<sup>&</sup>lt;sup>6</sup> For an overview of the limitation, see note AC 019/11 from January 2011

#### 2. OVERALL PICTURE OF 2010 AND 2011 DATA ON POSTED WORKERS

#### 2.1. PD A1 issued by sending country

- Figures 1a and 1b and tables 1a and 1b below show the number of PD A1 issued in each of the 30 reporting countries in 2011 (29 in 2010). By showing postings to specific countries and PD A1 issued for persons active in international transport, active in 2 or more Member States or other categories, these figures give the view from the side of the sending countries.
- In 2011, a total of 1.51 million PD A1 were recorded across the EU-27 and Iceland, Liechtenstein and Norway. Of these, around 1.21 million related to postings to specific countries. The remainder of almost 300,000 cases fell into the categories international transport, persons active in 2 or more Member States or other cases. The overall figures were lower in 2010, respectively 1.33 million PD A1 issued, out of which 1.06 million relate to postings and 0.27 million to other cases.
- In 2011, the main sending countries were Poland with 228,000 PD A1 issued for posting, followed by Germany (227,000) and France (144,000). Four other countries (BE, RO, HU and PT) recorded a number higher than 50,000 and six others (ES, SI, SK, LU, IT, UK) issued between 30.000 and 50.000 PD A1 for postings. Numbers in most other countries were substantially lower.
- In 2011, around 60% of all postings (compared to 63% in 2010) originated in the EU-15 Member States and almost 40% (compared to 37% in 2010) in the EU-12 Member States. Postings originating in EEA-EFTA countries accounted for only 0.2% of all postings.
- Among the PD A1 issued in the EU-15 in 2011, around 64% were valid for other EU-15 countries, 6% for EU-12 countries, 9% for EFTA countries and 21% international transport, persons active in 2 or more Member States or other cases (**Table 2b**). Around 76% of PD A1 issued in the EU-12 were valid for EU-15 countries, 4% for other EU-12 countries, 2% for EFTA countries and 18% for international transport, persons active in 2 or more Member States or other cases.
- As for the EEA-EFTA countries, around 80% of PD A1 issued were for postings towards the EU-15, 7% towards EU-12 countries and 8% towards EFTA countries. The 6% remaining were issued for international transport, persons active in 2 or more Member States or other cases.
- For more detailed country breakdowns see **Tables 9 and 10** in the Annex.

## 2.2. PD A1 by destination country

- ⇒ Under the A1 data collection exercise, countries were asked to provide data on how many PD A1 were issued by their authorities for postings and other activities abroad, but not for data on workers posted to their territory from other countries. However, given that countries reported on the destination countries of those persons for whom they issued PD A1 for postings one can calculate the number of posted workers to a specific destination country by summing up the corresponding numbers by sending country.
- ⇒ By this count, the number of posted workers received in 2011 was highest in Germany (311,000), followed by France (162,000), Belgium (125,000) and the Netherlands (106,000) (see Figure 2b and table 3b). Other countries having received a substantial number (30,000-80,000) of posted workers in 2011 were Austria, Italy, Switzerland, Spain, UK and Norway.
- ⇒ Overall, 69% of all PD A1 were issued in 2011 for posting in EU-15 countries, 5% in EU-12 countries, 6% in EFTA while around 20% concern PD A1 other than posting (international transport, persons active in 2 or more Member States or other cases). For this other type of PD A1, a breakdown by individual destination countries is not possible.
- ⇒ In the following countries, more than half of the posted workers come from EU-12 countries: Finland (79%), Germany (77%) and Sweden (51%). On the other side, posted workers coming from EU-15 countries represent the overwhelming majority (>90%) of posted workers in LI, LU, CH, PT and IE.

Figure 2a: Postings by destination country, 2010 (in 1,000)

Note: Figures do not include postings from SE as this country did not provide data for 2010. 'EU-14' refers to EU-15 countries minus Sweden.

Figure 2b: Postings by destination country, 2011 (in 1,000)

Source: Administrative data from EU Member States, IS, LI and NO on PD A1 issued according to Council Regulation (EC) No 883/2004 on the coordination of social security system.

## 2.3. Country by country distribution of postings

- ⇒ **Tables 9 and 10** of the annex show the detailed distribution of PD A1 between the sending and receiving countries.
- ⇒ The figures show a rather clear pattern in the distribution of posted workers, which is rather close to the situation for 2009 (described in the previous note 019/11 from January 2011). The country destination seems to follow geographical location and historical and business traditions, though some countries have one or two leading destinations, and some tend to spread the workers across several countries (see **Table 5** below for a simplified presentation based on the 2011 situation):
  - Posted workers from *Belgium*, *France*, *Germany*, *Luxembourg* and *the Netherlands* spread into neighbouring countries: posted workers from Germany went mostly to Austria, the Netherlands, France and Belgium; from Belgium mainly to France and the Netherlands; from Luxembourg to France and Belgium; and from the Netherlands to Belgium and Germany (however the Netherlands continue to report an extraordinarily high number of PD A1 for persons active in 2 or more Member States which cannot be classified in any destination country).
  - Posted workers from *France* tended to go to Belgium, Germany, Italy, UK and Spain.
  - Posted workers from *Austria* went mainly to Germany and Italy; from *Italy* to France, Germany and Spain; and those from *Liechtenstein* mostly to Germany and Austria.
  - Posted workers from *Iceland* tended to go to Norway; posted workers from *Norway* to the UK, the Netherlands and Sweden.
  - Main destinations for posted workers coming from *Denmark* are Norway and Sweden and for those coming from *Finland*, it is Sweden and Spain.
  - Posted workers from the *UK* mainly tended to go to France but also to Germany, Italy and the Netherlands, while the ones from *Ireland* went mainly to UK, the Netherlands, Sweden and Germany.
  - The main destinations for posted workers from *Portugal* were France and Spain, while for those from Spain mainly went to France followed by Italy and Portugal. For posted workers from *Greece* the main destination country was Romania, Germany and Bulgaria.
  - *Cyprus* posted workers mainly to Greece and those from *Malta* mostly to the Netherlands and to a lesser extent to Greece.
  - For *Czech Republic*, *Hungary*, *Poland*, *Slovakia*, *Slovenia*, *Romania and Bulgaria*, the main recipient country was Germany. The secondary destinations of posted workers from these countries are France, Belgium, the Netherlands, Austria and Italy.
  - A main destination for posted workers from *Estonia* is Finland, while for those from *Latvia* it was Germany and Sweden. Finally, those coming from *Lithuania* mainly went to Norway, Germany and France.

Note: CH is not included in the table as it did not provide any data on PD A1 issued for posting abroad.

- ⇒ Figures 3a and 3b gives an overview of the net balance of postings by country by showing the number of postings originating in a country (excluding PD A1 issued for international transport, activity in 2 or more states and other cases) minus the number of postings received from other countries.
- ⇒ By this account, the Netherlands, Germany, Belgium and Austria were, both in 2010 and 2011, the countries who received the highest number of posted workers in net terms. It should be noted that the Netherlands reported, both in 2010 and 2011, an extraordinarily high number of PD A1 for persons active in 2 or more Member States which cannot be classified in any destination country and taken into account for the net posting balance overview.
- ⇒ On the other hand, **Poland** was by far the main (net) sending country, followed by Portugal, Hungary and Luxembourg in 2010 and by Romania, Hungary, Portugal and Slovenia in 2011.

Figure 3a: Net balance between posted workers sent and posted workers received, 2010 (in thousand)

Source: Administrative data from EU Member States, IS, LI and NO on PD A1 issued according to Council Regulation (EC) No 883/2004 on the coordination of social security system. Notes: Figures do not include postings from SE

Figure 3b: Net balance between posted workers sent and posted workers received, 2011 (in thousand)

Source: Administrative data from EU Member States, IS, LI and NO on PD A1 issued according to Council Regulation (EC) No 883/2004 on the coordination of social security system.

#### 3. COMPARISON WITH 2009 DATA

- ⇒ Figure 4 and table 6 show a comparison of PD A1 issued in the reporting countries in the years 2009, 2010 and 2011.
- ⇒ Compared to 2009, the data indicate an increase in the number of postings, which occurred mainly between 2010 and 2011.
- ⇒ Over 2009-11, the number of posted workers sent abroad has increased the most in relative terms from Slovenia (+138%), Romania (+127%), Latvia (+117%), Estonia (+83%), Lithuania (+73%) and Bulgaria (+70%). In absolute terms, the number of posted workers sent abroad has also increased strongly from Germany (+57,000), Poland (+24,000) and Hungary (+21,000).
- ⇒ On the other side of the spectrum, decreases have been recorded (over 2009-11) in the case of workers posted by Luxembourg (-18,000), France (-17,000) and Portugal (-11,000). Moreover, the number of posted workers sent abroad has sharply decreased in Finland (-46%) and Greece (-61%) but the initial levels (2009) were quite low in absolute terms (respectively 5,000 and 2,000).

#### Figure 4: Postings by sending country, 2009 - 2011 (in thousand)

Source: Administrative data from EU Member States, IS, LI and NO on PD A1 issued according to Council Regulation (EC) No 883/2004 on the coordination of social security system.

Notes: Figures for postings originating in the UK relate for 2009 data to April 2009 to March 2010. Figures for Germany relate for 2009 data to 1 January 2009 to 30 November 2009. No data for Sweden for 2010

# Table 6: PD A1 certificates by sending country, 2009 – 2011

Source: Administrative data from EU Member States, IS, LI and NO on PD A1 issued according to Council Regulation (EC) No 883/2004 on the coordination of social security system.

Notes: Figures for postings originating in the UK relate, for 2009 data to April 2009 to March 2010. Figures for Germany relate, for 2009 data to 1 January 2009 to 30 November 2009. No data for Sweden for 2010

Figure 5 and table 7 show a comparison of postings by destination country between 2009 and 2011.

- ⇒ The comparison over time by destination country shows a rather stable pattern in the order of main destination countries. From 2009 to 2011, the following trends can however be noted: strong increase in the number of posted workers received for Austria (+32,000 or +71%), Norway (+9,000, or +42%) and Germany (+90,000 or +41%). In absolute terms, strong increases also occurred towards Belgium (+30,000), the Netherlands (+24,000), Italy (+14,000) and Switzerland (+11,000).
- ⇒ On the contrary the number of posted workers has decreased towards Spain (-16,000 or -25%) and Greece (-3,000 or -26%), most probably in relation with the decline of labour demand subsequent to the crisis in those two countries.

Figure 5: Postings by destination country, 2009 - 2011 (in thousand)

Source: Administrative data from EU Member States, IS, LI and NO on PD A1 issued according to Council Regulation (EC) No 883/2004 on the coordination of social security system.

Notes: Figures for postings originating in the UK relate for 2009 data to April 2009 to March 2010. Figures for postings originating in Germany relate for 2009 data to 1 January 2009 to 30 November 2009. Workers posted from Sweden are included only for 2011.

#### 4. BREAKDOWN BY SECTOR OF ECONOMIC ACTIVITY

- ⇒ **Table 8** shows the sectoral distribution of PD A1 for the 14 countries which provided data by sector breakdown in 2011.
- ⇒ Due to the fact that many countries (including France and Germany, two of the three most important sending countries) did not provide a breakdown by economic activity conclusions on the distribution of posted workers by sectors of economic activity are rather difficult.

- ⇒ The data from those 14 countries which did provide a sectoral breakdown suggest that on average in 2011 around 71% of PD A1 certificates issued were for industry, including 43% into the construction sector<sup>7</sup>. The share of the PD A1 issued for activities in the service sector is around 27% and agriculture and fishing make for around 2.5% of all PD A1.
- ⇒ Poland, the largest sending country overall, displayed in 2011 a quite large share in the construction sector (47%). It is also the case for posted workers from Portugal (67%) and Estonia (77%).

#### Table 8: PD A1 by economic activity, 2011

Source: Administrative data from EU Member States, IS, LI and NO on PD A1 issued according to Council Regulation (EC) No 883/2004 on the coordination of social security system.

Notes: For missing countries no sectoral breakdown of PD A1 certificates available. Note that the shares are calculated among the total of the three main sectors (Agriculture, Industry and Services) and that PD A1 for which the sector was not mentioned were therefore excluded from the total.

<sup>&</sup>lt;sup>7</sup> These are much larger shares than in 2009, though the distribution is also influenced by which countries reported data with a sectoral breakdown (i.e.: the fact that UK is not included in table 8 has a large impact on the overall share of industry – including construction - versus services).

#### 5. STRENGTHS AND WEAKNESSES OF THE A1 DATA

- ⇒ The A1 data collection fills an important information gap concerning the posting of workers. To our knowledge, it is still the only source which allows for a comparable overview of the number of postings across EU-Member States. DG Employment therefore recommends continuing this exercise in the future and plans next data collection exercise in 2014 to cover years 2012 and 2013.
- ⇒ However, the usefulness and the quality of the data remain limited in a number of ways. We repeat here the main limits already pointed in the previous notes 409/09 prepared in October 2009 and 019/11 from January 2011 :
  - While almost all countries transmitted figures, two countries (Sweden for 2010, Switzerland for 2010 and 2011) did not provide any data and therefore prevented the calculation of a complete sending by destination country matrix.
  - At a more methodological level, the available data only provide the number of PD A1 certificates issued in each country, but do not contain any information on the duration of postings or the hours worked. In other words, the present data are not really an indicator for labour input. It is therefore not possibly to use these figures to calculate the impact of postings on the level and structure of employment and wages in the sending and receiving countries.
  - Moreover, a structural analysis of the labour market impact of postings is prevented by the lack of sectoral breakdown for the data of the main sending countries and a general lack of detail by economic activity. While postings tend to concentrate on a few specific activities (e.g. construction), the available data are not detailed enough to allow any deeper analysis.
  - In addition, there is still some uncertainty to what extent the number of PD A1 recorded by countries is a precise proxy of the actual number of postings taking place. Firstly, it is not known how many PD A1 translate into actual postings. Secondly, there is no information on undocumented postings, i.e. workers posted by their employers without having applied for a PD A1.
  - The presented data are not data on postings according to the "posting" definition of Directive 96/71/EC concerning the posting of workers in the framework of the provision of services. The conditions which must be fulfilled in order to qualify as posted worker according to EU rules on the coordination of social security systems are fundamentally different from those under Directive 96/71/EC (e.g. strict time limitation of maximum 24 months applies in the social security field). A posted worker in the framework of the provision of services must not always fulfil the condition for issuing PD A1 confirming that s/he will remain subject to the social security legislation of the state s/he were posted from. Such a worker is a posted worker in accordance with Directive 96/71/EC but without PD A1 and does not therefore appear in the reported data.
  - ⇒ Some of these limitations can be addressed by further improving the coverage of the present data collection exercise. Other limitations, in particular concerning labour input, sector detail or undocumented postings would require a further investigation.

## ANNEX 1: DETAILED COUNTRY-BY-COUNTRY DATA TABLES ON PD A1

#### Table 9a: PD A1 issued in 29 reporting countries by destination, 2010

Source: Administrative data from EU Member States, IS, LI and NO on PD A1 issued according to Council Regulation (EC) No 883/2004 on the coordination of social security system. Note: Figures do not include PD A1 issued by SE as this country did not provide data for 2010. 'EU-14' refers to EU-15 countries minus Sweden. CH is only included as a destination country as it did not report any data on PDA1 issued for neither 2010, nor 2011.

Table 9b: PD A1 issued in 29 reporting countries by destination, 2010 (column %)

Source: Administrative data from EU Member States, IS, LI and NO on PD A1 issued according to Council Regulation (EC) No 883/2004 on the coordination of social security system. Note: Figures do not include PD A1 issued by SE as this country did not provide data for 2010. 'EU-14' refers to EU-15 countries minus Sweden. CH is only included as a destination country as it did not report any data on PDA1 issued for neither 2010, nor 2011.

# Table 9c: PD A1 issued in 29 reporting countries by destination, 2010 (row %)

Source: Administrative data from EU Member States, IS, LI and NO on PD A1 issued according to Council Regulation (EC) No 883/2004 on the coordination of social security system. Note: Figures do not include PD A1 issued by SE as this country did not provide data for 2010. 'EU-14' refers to EU-15 countries minus Sweden. CH is only included as a destination country as it did not report any data on PDA1 issued for neither 2010, nor 2011.

Table 10b: PD A1 issued in 30 reporting countries by destination, 2011 (column %)

Source: Administrative data from EU Member States, IS, LI and NO on PD A1 issued according to Council Regulation (EC) No 883/2004 on the coordination of social security system. Note: CH is only included as a destination country as it did not report any data on PDA1 issued for neither 2010, nor 2011.
