C(2013) 778 final

COMMISSION RECOMMENDATION

of 20.2.2013

Investing in children: breaking the cycle of disadvantage

COMMISSION RECOMMENDATION

of 20.2.2013

Investing in children: breaking the cycle of disadvantage

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union, and in particular Article 292 thereof,

Whereas:

- (1) Respect for human dignity is a founding value of the European Union, whose aims include promoting the well-being of its people; the Union must protect the rights of the child, combat social exclusion and discrimination, promote social justice and protection;
- (2) Children¹ are more at risk of poverty or social exclusion than the overall population in a large majority of EU countries; children growing up in poverty or social exclusion are less likely than their better-off peers to do well in school, enjoy good health and realise their full potential later in life;
- (3) Preventing the transmission of disadvantage across generations is a crucial investment in Europe's future, as well as a direct contribution to the Europe 2020 Strategy for smart, sustainable and inclusive growth, with long-term benefits for children, the economy and society as a whole;
- (4) Early intervention and prevention are essential for developing more effective and efficient policies, as public expenditure addressing the consequences of child poverty and social exclusion tends to be greater than that needed for intervening at an early age;
- (5) Tackling disadvantage in early years is an important means of stepping up efforts to address poverty and social exclusion in general. Prevention is most effectively achieved through integrated strategies that combine support to parents to access the labour market with adequate income support and access to services that are essential to children's outcomes, such as quality (pre-school) education, health, housing and social services, as well as opportunities to participate and use their rights, which help children live up to their full potential and contribute to their resilience;
- (6) The most successful strategies in addressing child poverty have proved to be those underpinned by policies improving the well-being of all children, whilst giving careful consideration to children in particularly vulnerable situations;

¹ In line with the UN Convention on the Rights of the Child, children are understood in this context as persons under the age of 18.

- (7) The promotion of gender equality, gender mainstreaming and equal opportunities, as well as the fight against discrimination faced by children and their families on all grounds (particularly those related to sex, racial or ethnic origin, religion or belief, disability, age or sexual orientation) should underpin any efforts to address child poverty and social exclusion;
- (8) The current financial and economic crisis is having a serious impact on children and families, with a rise in the proportion of those living in poverty and social exclusion in a number of countries;
- (9) Budget consolidation efforts due to growing fiscal constraints in a number of countries present significant challenges to ensure that social policies remain adequate and effective in the short as well as the long run;
- (10) More than a decade of cooperation at EU level has led to a common understanding of the determinants of child poverty through substantial work on developing appropriate monitoring indicators, identifying common challenges and successful policy approaches, which has given political momentum to the issue; subsequently, the Commission has announced the adoption of a Recommendation on Child Poverty in the Communication on the European Platform against Poverty and Social Exclusion²;
- (11) The Europe 2020 Strategy has given new impetus to efforts to address poverty and social exclusion in the EU, by setting a common European target to reduce the number of people at risk of poverty and social exclusion by at least 20 million by 2020, as well as stepping up efforts to address early school leaving. Tackling and preventing child poverty are an essential part of the EU and Member States' efforts in this respect, and form part of the European Platform against Poverty and Social Exclusion;
- (12) The current governance under the European Semester serves to ensure implementation of the relevant Country Specific Recommendations to combat child poverty and improve children's well-being;
- (13) All EU Member States have ratified the United Nations Convention on the Rights of the Child (UNCRC). The standards and principles of the UNCRC must continue to guide EU policies and actions that have an impact on the rights of the child;
- (14) By way of the June 2012 Social Protection Committee advisory report³ and key messages, as well as the October 2012 EPSCO Council Conclusions 'Preventing and tackling child poverty and social exclusion and promoting children's well-being'⁴, Member States reaffirmed their commitment and welcomed the Commission's initiative to adopt a Recommendation on the issue;

² COM(2010) 758 final.

³ Social Protection Committee, SPC advisory report to the European Commission on tackling and preventing child poverty, promoting child well-being, 27 June 2012.

⁴ Preventing and tackling child poverty and social exclusion and promoting children's well-being, EPSCO Council Conclusions, 4 October 2012, 14437/12.

- (15) Various EU policies have addressed issues linked to child poverty and the inter-generational transmission of disadvantage, in particular in the fields of education and training, health, children's rights and gender equality⁵;
- (16) While policies addressing child poverty are primarily the competence of Member States, a common European framework can strengthen synergies across relevant policy areas, help Member States review their policies and learn from each other's experiences in improving policy efficiency and effectiveness through innovative approaches, whilst taking into account the different situations and needs at local, regional and national level;
- (17) In the context of the upcoming Multiannual Financial Framework, such guidance can also provide a basis for further cooperation and a focus for using relevant financial instruments, particularly the Structural Funds, to deliver on the proposed objective of 'Promoting social inclusion and combating poverty'.

RECOMMENDS THAT MEMBER STATES: Organise and implement policies to address child poverty and social exclusion, promoting children's well-being, through multi-dimensional strategies, in accordance with the following guidelines:

1. BE GUIDED BY THE FOLLOWING HORIZONTAL PRINCIPLES

- Tackle child poverty and social exclusion through integrated strategies that go beyond ensuring children's material security and promote equal opportunities so that all children can realise their full potential;
- Address child poverty and social exclusion from a children's rights approach, in particular by referring to the relevant provisions of the Treaty on the European Union, the Charter of Fundamental Rights of the European Union and the UN Convention on the Rights of the Child, making sure that these rights are respected, protected and fulfilled;
- Always take the child's best interests as a primary consideration and recognise children as independent rights-holders, whilst fully acknowledging the importance of supporting families as primary carers;
- Maintain an appropriate balance between universal policies, aimed at promoting the well-being of all children, and targeted approaches, aimed at supporting the most disadvantaged;
- Ensure a focus on children who face an increased risk due to multiple disadvantage such as Roma children, some migrant or ethnic minority children, children with special needs or disabilities, children in alternative care and street children, children

⁵ See in particular: An updated strategic framework for European cooperation in education and training, COM(2008) 865 final, Solidarity in Health: reducing health inequalities in the EU, COM(2009) 567 final, An EU Agenda for the Rights of the Child, COM(2011) 60 final, Strategy for equality between women and men 2010-2015, COM(2010) 491 final.

of imprisoned parents, as well as children within households at particular risk of poverty, such as single parent or large families;

- Sustain investment in children and families, allowing for policy continuity and long-term planning; assess how policy reforms affect the most disadvantaged and take steps to mitigate any adverse effects.

2. DEVELOP INTEGRATED STRATEGIES, BASED ON THREE KEY PILLARS

2.1. Access to adequate resources

Support parents' participation in the labour market — Acknowledge the strong link between parents' participation in the labour market and children's living conditions, and in accordance with the principles outlined in the Commission Recommendation on Active Inclusion⁶ and the Barcelona targets⁷, take all possible measures to support parents' participation in the labour market, in particular for those at a distance from the labour market and in households at particular risk:

- Make sure that work 'pays' by identifying and tackling the specific disincentives parents face when entering, remaining or progressing in the labour market, including those related to the design and interaction of tax and benefits systems;
- Support the employability and participation of single parents and second earners in paid work, promoting gender equality in the labour market and in family responsibilities;
- Provide enhanced support to parents' reintegration into the labour market following parental leave through training measures and job search support, focusing specifically on those at particular risk;
- Intensify efforts to ensure that all families, including those in vulnerable situations and living in disadvantaged areas, have effective access to affordable, quality early childhood education and care;
- Adapt the design and eligibility criteria of childcare services to increasingly diverse working patterns, thereby helping parents maintain their work commitments or find a job, whilst keeping a strong focus on the child's best interests;
- Promote quality, inclusive employment and a working environment that enables parents to balance their work and parenting roles on an equal footing, including through parental leave, workplace support and flexible working arrangements.

⁶ Commission Recommendation on the active inclusion of people excluded from the labour market (2008/867/EC).

⁷ Presidency conclusions, Barcelona European Council, 15-16 March 2002, SN 100/1/02 REV 1.

Provide for adequate living standards through a combination of benefits — Make it possible for children to enjoy adequate living standards that are compatible with a life in dignity, through an optimal combination of cash and in-kind benefits:

- Support family incomes through adequate, coherent and efficient benefits, including fiscal incentives, family and child benefits, housing benefits and minimum income schemes;
- Complement cash income support schemes with in-kind benefits related in particular to nutrition, childcare, education, health, housing, transport and access to sports or socio-cultural activities;
- Ensure that the design of and eligibility to financial support for children reflects the development of living arrangements and provides adequate redistribution across income groups;
- Create more effective access to the benefits to which children or their families are entitled by facilitating easy take up and developing beneficiary outreach services;
- Deliver means-tested or other targeted benefits in a way that avoids stigmatisation, differentiates between children's needs and reduces the risk of poverty traps whilst avoiding the creation of disincentives to work for second earners and single parents;
- Use discretion when making family benefits conditional on parenting behaviour or children's school attendance and assess the potential negative impact of such measures;
- Set up regular and responsive delivery mechanisms that provide maximum coverage and benefit children most, such as advance payments.

2.2. Access to affordable quality services

Reduce inequality at a young age by investing in early childhood education and care — Further develop the social inclusion and development potential of early childhood education and care (ECEC), using it as a social investment to address inequality and challenges faced by disadvantaged children through early intervention:

- Provide access to high-quality, inclusive early childhood education and care ; ensure its affordability and adapt provision to the needs of families;
- Incentivise the participation of children from a disadvantaged background (especially those below the age of three years), regardless of their parents' labour market situation, whilst avoiding stigmatisation and segregation;
- Support parents in their role as the main educators of their own children during the early years and encourage ECEC services to work closely with parents and

community actors involved in the child's upbringing (such as health and parenting support services);

- Raise parents' awareness of the benefits of participation in ECEC programmes for their children and themselves; Use ECEC as an early-warning system to identify family or school-related physical or psychological problems, special needs or abuse.

Improve education systems' impact on equal opportunities — *Increase the capacity of education systems to break the cycle of disadvantage, ensuring that all children can benefit from inclusive high quality education that promotes their emotional, social, cognitive and physical development:*

- Provide for the inclusion of all learners, where necessary by targeting resources and opportunities towards the more disadvantaged, and adequately monitor results;
- Recognise and address spatial disparities in the availability and quality of educational provision and in educational outcomes; foster desegregation policies that strengthen comprehensive schooling;
- Create an inclusive learning environment by strengthening the link between schools and parents, and provide if necessary personalised support to compensate for specific disadvantages, through for instance training for parents of migrant and ethnic minority children;
- Address barriers which stop or seriously hinder children from attending or completing school (such as additional financial fees in compulsory education) by providing targeted educational aid in a supportive learning environment;
- Improve the performance of students with low basic skills by reinforcing the learning of literacy, numeracy and basic maths and science, and ensuring early detection of low achievers;
- Develop and implement comprehensive policies to reduce early school leaving which encompass prevention, intervention and compensation measures; ensure that these policies include measures for those at risk of early school leaving;
- Strengthen equality legislation and guarantee the most marginalised learners the basic right to receive a quality minimum qualification;
- Revise and strengthen the professional profile of all teaching professions and prepare teachers for social diversity; deploy special cultural mediators and role models to facilitate the integration of Roma and children with an immigrant background.

Improve the responsiveness of health systems to address the needs of disadvantaged children — *Ensure that all children can make full use of their universal right to health care, including through disease prevention and health promotion as well as access to quality health services:*

- Address the obstacles to accessing healthcare faced by children and families in vulnerable situations, including costs, cultural and linguistic barriers, lack of information; improve the training of health care providers in this respect;
- Invest in prevention particularly during early childhood years, by putting in place comprehensive policies that combine nutrition, health, education and social measures;
- Tackle the social gradient in unhealthy lifestyles and substance abuse by giving all children access to balanced diets and physical activity;
- Devote special attention to children with disabilities or mental health problems, undocumented or non-registered children, pregnant teenagers and children from families with a history of substance abuse.

Provide children with a safe, adequate housing and living environment — *Allow children to live and grow up in a safe, healthy and child-friendly environment that supports their development and learning needs:*

- Make it possible for families with children to live in affordable, quality housing (including social housing), address situations of exposure to environmental hazards, overcrowding and energy poverty;
- Support families and children at risk of homelessness by avoiding evictions, unnecessary moves, separation from families as well as providing temporary shelter and long-term housing solutions;
- Pay attention to children’s best interests in local planning; avoid ‘ghettoisation’ and segregation by promoting a social mix in housing as well as adequate access to public transport;
- Reduce children’s harmful exposure to a deteriorating living and social environment to prevent them from falling victim to violence and abuse.

Enhance family support and the quality of alternative care settings — *Strengthen child protection and social services in the field of prevention; help families develop parenting skills in a non-stigmatising way, whilst ensuring that children removed from parental care grow up in an environment that meets their needs:*

- Ensure that poverty is never the only justification for removing a child from parental care; aim at enabling children to remain in or return to the care of their parents by, for example, tackling the family’s material deprivation;
- Ensure adequate gate-keeping to prevent children being placed in institutions and provide for regular reviews in the event of such placements;

- Stop the expansion of institutional care settings for children without parental care; promote quality, community-based care and foster care within family settings instead, where children’s voice is given due consideration;
- Ensure that children without parental care have access to quality services (both mainstream and specific services) related to their health, education, employment, social assistance, security and housing situation, including during their transition to adulthood;
- Provide appropriate support to children left behind when one or both parents migrate to another country to work, as well as to their replacement carers.

2.3. Children’s right to participate

Support the participation of all children in play, recreation, sport and cultural activities — Acknowledge the influence children have over their own well-being and their resilience in overcoming adverse situations, in particular by providing opportunities to participate in informal learning activities that take place outside the home and after regular school hours:

- Address barriers such as cost, access and cultural differences to ensure that all children can participate in play, recreation, sport and cultural activities outside school;
- Provide safe spaces in children’s environment and support disadvantaged communities by means of specific incentives;
- Encourage schools, community actors and local authorities to create better after-school activities and facilities for all children, regardless of their parents’ work situation and background;
- Enable all families to participate in social activities that boost their parental skills and foster positive family communication;
- Promote approaches to participation that build on the potential for community volunteering and foster solidarity between generations.

Put in place mechanisms that promote children’s participation in decision making that affects their lives — Enable and encourage children to express informed views, ensuring that those views are given due weight and are reflected in the main decisions affecting them:

- Use and further develop existing tools to involve children in the running of services such as care, healthcare and education, as well as to consult them on relevant policy planning through mechanisms adapted to their age;
- Support the involvement of all children in existing participation structures; reach out to and support the participation of children from disadvantaged backgrounds;

- Encourage professionals working with and for children to actively involve them, raising awareness of related rights and obligations;
- Implement the child’s right to be heard in all justice-related decisions and promote child-friendly justice, in particular by giving children effective access to court and judicial proceedings.

3. FURTHER DEVELOP NECESSARY GOVERNANCE, IMPLEMENTATION AND MONITORING ARRANGEMENTS

Strengthen synergies across sectors and improve governance arrangements — Ensure that policies effectively address child poverty and social exclusion through comprehensive design and enhance coordination between key actors:

- Develop regular and systematic links between policy areas of high relevance to the social inclusion of children and strengthen synergies between key players, particularly in the fields of education, employment, health, equality and children’s rights;
- Work towards mainstreaming children’s policies and rights into key policies through, for example, specific institutional arrangements;
- Promote close cooperation and regular dialogue between public authorities at all levels, social partners, local communities and civil society organisations;
- Support and further develop the involvement of children, including in the implementation of the present Recommendation.

Strengthen the use of evidence-based approaches — Strengthen evidence-based policy development and social policy innovation, making sure to take due account of the potential impact of policies on children:

- Make full use of existing statistics and administrative data to monitor the impact of policies on children and their families; reinforce statistical capacity (including by disaggregating by gender) where needed and feasible, particularly concerning child deprivation, access to quality and affordable childcare, children’s health and the situation of the most vulnerable children;
- Improve the timeliness of data availability to monitor the situation of children, and promote the use of methods and models such as micro-simulation to support a more systematic ex ante assessment of the potential impact of policies on children;
- Strengthen links between the policy and research community and test relevant policy innovations; encourage evidence-based evaluation of programme outcomes, including in the long term through tools such as longitudinal surveys; promote visibility and sharing of results;

- Promote the exchange of good practice and knowledge, the roll-out of tried and tested intervention models, measures to foster solidarity in the wider community and empower local communities to work together;
- Evaluate the impact of temporary policies introduced in response to the economic crisis before deciding to make these policies part of structural reforms.

4. MAKE FULL USE OF RELEVANT EU INSTRUMENTS

Address child poverty and social exclusion as a key issue within the Europe 2020 Strategy
 — *Mobilise the range of tools and indicators available within the Europe 2020 Strategy to give new impetus to joint efforts to address child poverty and social exclusion:*

- Firmly place child poverty and social exclusion as key issues in the Europe 2020 Strategy and National Reform Programmes, as part of the overall effort to reduce poverty and social exclusion, taking into account relevant Country Specific Recommendations adopted by the European Council;
- Consider, where appropriate, the added value of setting national targets for reducing child poverty and social exclusion, taking national specificities into account;
- Fully exploit the tools provided by the Europe 2020 Strategy and the Social Open Method of Coordination to improve the monitoring and evaluation of policies addressing child poverty and well-being, making full use of the proposed indicator-based monitoring framework annexed to the present Recommendation;
- Strengthen synergies with relevant EU policies, in particular in the fields of education, health, gender equality and children’s rights.

Mobilise relevant EU financial instruments — *Make appropriate use of the opportunities provided by EU financial instruments to support the policy priorities outlined above:*

- Support the development of more evidence-based policies and social innovation through the Programme for Social Change and Innovation, the European Social Fund and Horizon 2020, and use these programmes to test, evaluate and scale up possible policy innovations;
- Make full use of the Fund for European Aid to the Most Deprived (addressing children’s food and material deprivation), the European School Fruit and Milk Schemes (providing products with positive nutritional value and encouraging good eating habits) and the Erasmus for All Programme (promoting children’s access to education, informal learning and sport);
- Exploit opportunities provided by the Structural Funds to support children and families when drawing up the European Social Fund and the European Regional Development Fund Operational Programmes 2014-2020, in line with Country Specific Recommendations;

- Make appropriate use of thematic objectives related to promoting employment and supporting labour mobility, promoting social inclusion and combating poverty, investing in education, skills and lifelong learning as well as the relevant investment priorities within them. These include in particular early childhood education; reducing early school leaving; reconciliation between work and private life; access to services, including health care and social services; community-led local development strategies; support to the regeneration of deprived areas and transition from institutional to community-based services;
- To ensure that 2014-2020 Structural Funds interventions are effective, pursue evidence-based strategies to reduce early school leaving, involving relevant stakeholders and measures to support the transition from institutional to community-based care;
- Promote partnership in the programming of and access to Structural Funds by involving relevant stakeholders at national, regional and local levels, in particular the relevant public authorities, social partners and non-governmental organisations, in order to mobilise action to combat child poverty.

Member of the Commission

ANNEX

Indicator-based monitoring framework

The proposed monitoring framework highlights indicators that are relevant for monitoring the Recommendation's implementation. Proposals for further development are highlighted in the annexes to the Social Investment Package.

Overall objective of combating child poverty and social exclusion and promoting child well-being

Europe 2020	Definition	Breakdowns	Source	primary/ secondary/context ⁸	Comments
At risk of poverty or social exclusion for children (breakdown of the Europe 2020 poverty and social exclusion headline target)	The sum of children who live in a household which is at risk of poverty and/or severely materially deprived and/or a household with very low work intensity (for the definition of these 3 indicators, see below)	By age (0-17, 0-5, 6-11, 12-17)	Eurostat - EU-SILC	primary	Comparison with the working-age population (18-64) and the elderly population (65+) is recommended
Indicator	Definition	Breakdowns	Source	primary/ secondary/context	Comments
At-risk-of-poverty rate for children (to be analysed together with the value of	Share of children living in a household with an equivalised disposable income below 60% of the	By age (0-17, 0-5, 6-11, 12-17) and	Eurostat - EU-SILC	primary	Comparison with the working-age population (18-64) and the elderly

⁸ Primary indicators are lead indicators which cover the broad fields that have been considered the most important outcome elements whereas secondary indicators support the lead indicators by describing in greater detail the nature of the problem or by describing other dimensions of the problem. Context indicators provide additional detail and contextual information: the list proposed is indicative and leaves room for other background information considered relevant to better frame and understand the national context. .

the poverty threshold in PPS for a household consisting of 2 adults and 2 children aged below 14)	national median equivalised disposable income	household type			population (65+) is recommended
Severe material deprivation rate	Proportion of children who live in a household whose living conditions are severely constrained by a lack of resources, i.e. it experience at least 4 out of 9 of the following deprivation items: cannot afford i) to pay rent or utility bills, ii) to keep the home adequately warm, iii) to pay unexpected expenses, iv) to eat meat, fish or a protein equivalent every second day, v) a week's holiday away from home, vi) a car, vii) a washing machine, viii) a colour TV, or ix) a telephone.	By age (0-17, 0-5, 6-11, 12-17)	Eurostat - EU-SILC	primary	Comparison with the working-age population (18-64) and the elderly population (65+) is recommended
Share of children living in very low work intensity households	Share of children living in a household where working-age adults (18-59) have worked less than 20% of their total work potential during the past year (i.e. during the income reference period)	By age (0-17, 0-5, 6-11, 12-17)	Eurostat - EU-SILC	primary	Comparison with the working-age population (18-64) and the elderly population (65+) is recommended
Child deprivation indicator	Under discussion		Eurostat -EU-SILC	n.a.	Under development
Dispersion of child poverty risk around the poverty risk threshold: At-risk-of-poverty rate calculated with 50% and 70% thresholds	Share of children living in a household with an equivalised disposable income below 50% and below 70% of the national equivalised median income	By age (0-17, 0-5, 6-11, 12-17)	Eurostat - EU-SILC	secondary	Comparison with the working-age population (18-64) and the elderly population (65+) is recommended

Persistent at-risk-of-poverty rate for children	Share of children living in a household with an equivalised disposable income below the poverty threshold in the current year and in at least two of the preceding 3 years	0-17	Eurostat - EU-SILC (longitudinal)	secondary	Comparison with the working-age population (18-64) and the elderly population (65+) is recommended
At-risk-of-poverty rate anchored at a fixed moment in time for children	Share of children living in households with an equivalised disposable income below 60% of the national median equivalised disposable income, where the threshold is anchored at a fixed moment in time	0-17	Eurostat - EU-SILC	context	Comparison with the working-age population (18-64) and the elderly population (65+) is recommended

Access to adequate resources

Indicator	Definition	Breakdowns	Source	primary/ secondary/context	Comments
In-work poverty rate of people living in households with dependent children	Share of individuals (with dependent children) who are defined as in work and have an income below the poverty threshold (60% of the national median equivalised disposable income)	By age (0-17, 18-64, 0-64); by household type (single parents, two adults with dependent children)	Eurostat - EU-SILC	primary	
At-risk-of-poverty rate for children by work intensity of the household	Share of children living in households with an equivalised disposable income below 60% of the national median equivalised disposable income according to the work intensity of the household	0-17, work intensity of the household (very high [0.85 – 1], high [0.55 – 0.85], medium	Eurostat - EU-SILC	primary	

		[0.45 – 0.55], low [0.2 – 0.45])			
At-risk-of-poverty rate for children in households at work	Share of children living in households with an income below the poverty threshold (60% of the national median equivalised disposable income) and with a work intensity above 0.2	By household type	Eurostat - EU-SILC	primary	
Relative median poverty gap for children	Difference between the median equivalised income of persons below the at-risk-of poverty threshold and the at-risk-of poverty threshold, expressed as a percentage of the at-risk-of poverty threshold	0-17	Eurostat - EU-SILC	primary	Comparison with the working-age population (18-64) and the elderly population (65+) is recommended
Child care	Children cared for (by formal arrangements ⁹ other than the family) as a proportion of all children in the same age group	Less than 3 years, between 3 years and mandatory school age; less than 30h, 30h or more a week	Eurostat - EU-SILC	secondary	Relevance of breakdown by income quintile to be assessed
Employment impact of parenthood	Difference in percentage points (pp) between – employment rate of people aged 20-49 living in households in which there are no children aged 0-6 and	Total, by gender	Eurostat - LFS	context	Looking at children aged 0-3 and 3-6 separately is recommended

⁹ Formal arrangements are defined as the following services: pre-school or equivalent, compulsory education, centre-based services outside school hours, a collective crèche or another day-care centre, including family day-care and professional certified childminders. The care provided by family members, neighbours or non-certified childminders is therefore not included under this definition of 'formal arrangements'.

	– employment rate of people aged 20-49 living in households in which there is at least one child aged 0-6				
Part-time employment due to care responsibilities	Persons employed part-time because of looking after children or incapacitated adults, as a percentage of total employed persons	Total, by gender	Eurostat - LFS	context	
Impact of social transfers (other than pensions) in reducing child poverty	Difference between the children at-risk-of poverty rate before and after social transfers (excluding pensions)		Eurostat - EU-SILC	secondary	Comparison with the working-age population (18-64) and the elderly population (65+) is recommended
Housing cost overburden	Percentage of the population living in a household where total housing costs (net of housing allowances) represent more than 40% of the total disposable household income (net of housing allowances)	By age (0-17, 0-5, 6-11, 12-17), poverty status (above or below the at-risk-of-poverty threshold)	Eurostat - EU-SILC	secondary	Comparison with the working-age population (18-64) and the elderly population (65+) is recommended

Access to quality services

Indicator	Definition	Breakdowns	Source	primary/ secondary	Comments
Early school education	Share of children between age 4 and the start of compulsory education who participate in early childhood education	By gender	UOE ¹⁰	primary	
Proficiency in reading, maths and science	Share of 15-year olds who score 1 or below (on a scale from 1 (lowest) to 5 (highest)) in PISA tests	By parental background (educational attainment, country of birth)	OECD-PISA ¹¹	primary	No data for CY and MT are available in current data collections.
Young people not in employment, education or training (NEET) rate	Young people not in employment, education or training (NEET) rate	By gender, 15-19	Eurostat - LFS	primary	
Early leavers from education and training	Population aged 18-24 years with lower secondary education at most and not in further education or training	By gender, highest educational level completed	Eurostat - LFS	secondary	
Self-declared unmet need for medical care	Proportion of people aged 16-25 reporting not having accessed medical services due to cost,		Eurostat - EU-
