VAT Treatment of vouchers

There are no specific rules in Dutch VAT law regarding the VAT treatment of vouchers. However, based on a Decree, a distinction is made between single purpose telephone cards and multi-purpose telephone cards. When supplying a single purpose telephone card, VAT is due when selling the card. When supplying a multi-purpose telephone card, VAT is due when the value on the card is used / redeemed.

A voucher is defined as a token, stamp or document that represents a right to receive goods or services to the value of an amount stated on it or recorded in it. When a gift voucher is sold, the same applies. The VAT is due when the value of the card is used/redeemed.

Reference to the above may be found in a Decree of the Dutch Ministry of Finance of 25 January 2013, nr. BLKB 2013/82M (prepaid telephone cards), amended by a Decree of 28 September 2015, nr. BLKB 2015/1158M and a Decree of the Dutch Ministry of Finance of 30 December 1999, nr. V1999/2649 (gift vouchers).

Exemptions - VAT Directive 2006/112/EC - Articles 132 & 135 (E-learning activities)

According to Dutch legislation the supply of education by an eligible body (i.e., school, university or registered training organization) is an exempt supply with no right to input VAT deduction. E-learning services are in principle taxable in the Netherlands unless electronic services are only used for communication between students and teachers.

However, e-learning services can also be exempt from VAT if some interaction between the student and teacher is required. A case by case assessment is required in order to determine whether e-learning is VAT exempt or VAT taxable.

Reference to the above may be found in Article 11.1 (o) of the VAT Act and Article 8 of the VAT Implementing Decree.

Exemptions - VAT Directive 2006/112/EC - Articles 132 & 135 (Gambling activities)

Gambling services are an exempt supply for VAT purposes with no right to deduct input VAT. The definition of gambling services is outlined in the Dutch Gambling Tax Act and those services include all activities with an element of chance which cannot be influenced by the participants (i.e. prize contests, lotteries, slot machines, etc.). Although, there is no clear guidance in the Dutch legislation, the exemption should in principle apply to e-gambling activities. It is however recommended that the exact VAT treatment is analyzed on a case by case basis.

There is no specific guidance in the Netherlands with regards to the VAT treatment of bonus points / credits granted as part of e-gambling activities since these activities are, in principle, VAT exempt.

Reference to the above may be found in Article 11.1 (l) of the Dutch VAT Act and the Dutch Gambling Tax Act.
