Topics

1. Policies for innovation

Includes role of FET in value chain, entrepreneurship, start-up creation, IPR, open access (data and publication), regional aspects, education, communication.

2. Making FET effective

Includes scientific priorities for next call(s), lessons learnt from current FET recommendations with relation to current structure, requirements of calls, project evaluation and selection.

3. Long term vision for FET

Includes how FET should relate to other programmes and instruments in the EU and national landscapes (e.g. ERC, EIT), where and how it should make most impact, boundaries of the programme, mutual impacts between science, technology and society.
