Selection Procedure (members)

Since this group concerns the implementation of Directive 2010/63/EU, all Member states are permanent members of this group. Animal experimentation is highly specialised and relatively limited field of expertise. The organisations have been selected on the basis of their field of interest, its relevance to the Directive and their geographical (EU-wide) representation. Furthermore, a balanced representation of different interests within the group is a prerequisite. We used special invitations, based on the best of our knowledge and past experience in the field.

Internal Rules of Procedure

Expert groups usually operate in an informal setting without any formal rules of procedure. This is the case for this group
