Selection Procedure (members)

ICT standardisation platform: Due to the wide range of tasks the composition of the Platform is crucial to ensure the broadest possible representation of stakeholders. Therefore, the Commission had identified several criteria based on which it proposed the organisations for membership: Members should represent interest of SMEs, consumers and other societel stakeholders such as people with disabilities and elderly people. Furthermore, to ensure that the Platform has available expertise in the development of standards in the ICT field, European, international and private standards

setting organisations and industry assocations are represented. As the private standards setting organisations are concerned the selection took into account the facts that these organisations have an open and transparent structure, that their standards are not sector specific and globally accepted by markets. All members should be active in Europe or representig respective European interests. The Members are appointed following the Article 4 of Commission Decision of 28 November 2011 (2011/C 349/04)
