Activity Report

The "Expert Group on Forest Fires" has been established in 1998 by DG Environment. The expert group created the European Forest Fire Information System (EFFIS), which is managed by JRC and DG ENV. More information can be found on the website : http://ec.europa.eu/environment/forests/home_en.htm Other relevant information about the group, in particular the working documents of each session, can be found here attached or on the CIRCABC link below. When renaming this group in "Informal Commission expert group on forest information", this group became a sub-group, on equal footing with the new sub-group on "Forest Health and Pests", both contributing to the FISE's module on forest disturbances. Each of the sub-groups will meet at least once a year.

Activity Report

The Subgroup on Forest Health and Pests is also contributing to the FISE's module on forest disturbances. Each of the sub-groups will meet at least once a year.

<https://circabc.europa.eu/w/browse/8e32f4f3-b1f2-45d8-8da8-cff16d3f35cb>

Selection Procedure (members)

The members of the group are nominated by the competent authorities of the member states and countries outside Europe. We have contacted the Permanent Representations with a request to point out skilled experts.

Internal Rules of Procedure

Expert groups usually operate in an informal setting without any formal rules of procedure. This is the case for this group.

Other

Additional information: EGFI: The Commission Expert Group on Forest Information is composed of two sub-groups, one on Forest Fires (EGFF) and a second one on Forest Health and Pests (EGFH). EGFF: Contribution to the development of the Forest Information System for Europe (FISE) through the development and maintenance of the European Forest Fires Information System (EFFIS). Exchange of information as regards lessons learned and forest fire prevention practices and drafting of a yearly report on forest fires in Europe, Middle East and North Africa. Task: coordinate with Member States, collecting forest fire data, exchange of views and lessons learnt, contributing in drafting reports. EGFH: Contribution to the development of the Forest Information System for Europe (FISE). Exchange of information as regards existing practices to increase forest resilience, early detection and prevention of new threats and challenges affecting forest health, monitoring tree health and, when appropriate, development of an early warning system for harmful biotic agents (fungi, bacteria, viruses, insects,...) affecting specific tree species. Support in formulation of eradication/containment measures. Task: Coordinate with Member States, exchange of views and lessons learnt, contributing in drafting reports.
