That existing agreements and working relations – national as international between the National Defence and the Air Navigation Service Provider must be maintained	Norway Finland Estonia Latvia			
It must be secured that there on national territory is maintained an Area Control Centre which will maintain the control of the national area of responsibility thus the Defence can carry out surveillance and sovereignty assertion in all flight levels over the national territory.	Norway Finland Estonia (CRC capability is planned from 2014)	Finland: It must be secured that there on national territory is maintained an Area Control Centre and Airspace Management Cell which will maintain the control of the national area of responsibility thus the Defence can carry out surveillance and sovereignty assertion in all flight levels over the national territory.	Latvia: Latvia use Karmelava, Lithuania Control and Reporting Centre operating as common project for three Baltic states. Control and Reporting Centre Karmelava, Lithuania conducts operations (RAP production and Weapon Control) over three Baltic states. NATO fighters on rotational basis are deployed at the Military Airbase Siauliai, Lithuania to conduct Air policing operations over three Baltic states. Currently Latvia has Control and Reporting Post capability in Lielvārde, Latvia. It is planed that implementing ASBE (ACCS Software Based Element) Latvija will develop ARS (A - Air Command and Control, R - RAP Production Centre, S - Sensor Fusion Post) version of "super light ARS". This centre will have Control and Reporting Centre functions.	

Titel	Agree 100%	Under consideration/ modified statement	Neutral/no position	Do not agree
