Preparation of the Green Paper on urban transport

Third Technical Workshop
"Public transport, intermodality and intelligent transport"
Szentendre, Hungary, 7 March 2007

Programme

Organised with the support of:

The Hungarian Ministry for Economy and Transport
The Regional Environmental Center (REC)
The PARAMOUNT project¹

It is the European Commission's intention to fully interact with stakeholders, interested parties and citizens during the preparatory phase of the Green Paper. Therefore the Commission is organising an internet consultation, two public Green Paper conferences and debates on key questions involving European stakeholder organisations during targeted technical workshops. Information about these events and summaries of the results will be made available on DG TREN's Europa website (under the Clean Urban Transport section). In addition, the Commission welcomes contributions in writing or by e-mail.

To ensure that the technical workshops will be fully interactive, and due to space limitations, it has been decided that participation in these workshops will be 'by invitation only'. The Commission has invited specific European stakeholder organisations and experts for the workshops. It is the Commission's intention to present and discuss the results of the workshops during the final Green Paper conference on 4 June 2007.

¹ The PARAMOUNT support action is financed by the Directorate General for Energy and Transport of the European Commission under the Sixth RTD Framework Programme. Its aim is to disseminate the results of RTD projects, best practices and innovative policy approaches in the field of urban transport.

- 9.15 Opening, welcome
- Mr Zoltan Kazatsay, Deputy Director General, Directorate for Energy and Transport, European Commission
 - Mrs Marta Szigeti Bonifert, Executive Director, REC
- 9.40 First session - efficiency and effectiveness of public transport
3 x 15 minute presentations, 40 min debate and statements
