Preparation of the Green Paper on urban transport

Fourth Technical Workshop

"Integrated urban transport approaches for successful and attractive cities"

Brussels, 16 May 2007

Charlemagne building

170, rue de la Loi, B -1049 Bruxelles

Room Jean Durieux (S2), Level 1

Programme

**Please note that a background paper will be distributed to the participants in advance.
No interpretation will be provided. Presentations will be in English only.**

It is the European Commission's intention to fully interact with stakeholders, interested parties and citizens during the preparatory phase of the Green Paper. Therefore the Commission is organising an internet consultation, two public Green Paper conferences and debates on key questions involving European stakeholder organisations during targeted technical workshops. Information about these events and summaries of the results will be made available on DG TREN's Europa website (under the Clean Urban Transport section). In addition, the Commission welcomes contributions in writing or by e-mail.

To ensure that the technical workshops will be fully interactive, and due to space limitations, it has been decided that participation in these workshops will be 'by invitation only'. The Commission has invited specific European stakeholder organisations and experts for the workshops. It is the Commission's intention to present and discuss the results of the workshops during the final Green Paper conference on 4 June 2007.
