EURO-RS WEB

A website on awareness raising campaigns in the field of road safety

Project details	
Domain	Training, education and campaigns
Duration	from 22/12/2003 until 21/12/2006
Website	http://www.roadsafetyweb.net/
Other sources	

RoadSafetyWeb is a website centralising data of awareness raising campaigns in the field of road safety. Its aim is to create a platform promoting the different campaigns and facilitating the exchange of information about them. The participating organisations can use the campaigns in the database as a source of inspiration for new campaigns. Moreover, RoadSafetyWeb constitutes a forum for exchanging knowledge and experiences between the participating organisations.

RoadSafetyWeb does not only allow for the centralisation of campaign data using a common structure, it also facilitates searching and looking into these data. By using a single template for organising the data, it is for example possible to have a quick and extensive overview of what is done in the different countries.
