| Other sources |  IMPROVER (subproject 1: Sports Utility Vehicles)  IMPROVER (subproject 3: Cruise control)  IMPROVER (subproject 4: Road signs)  Final Report subproject 2 |

The IMPROVER project is a study commissioned by the European Commission (Directorate General Energy and Transport) to examine the following aspects of road safety:

- the impact on road safety due to the increasing use of sports utility and multipurpose vehicles,
- the impact assessment of measures improving the road safety of light vans,
- the impact of Cruise Control on traffic safety, energy consumption, and environmental pollution and
- the harmonisation of road signs and road markings from a safety point of view.

According to the tasks the project is divided into four subprojects.
