-  [F8 - Thematic Report - Institutional Organisation](#) (606 kB)
-  [F9 - Thematic Report - Post accident care](#) (678 kB)

The goal of SUPREME is to collect, analyse, summarise and publish best practices in road safety in the Member States of the European Union as well as in Switzerland and Norway.

The target audiences of the project are decision and policy makers at all levels, from European to local, as well as the scientific community and practitioners in the field.

The aim is to provide user specific information on outstanding safety measures with a view to implementation in other countries or at the European level. Measures will be looked at from different perspectives: classes of road users concerned, scope of implementation and type of organisation implementing the measure.
