## Conclusions

We the participants of the Cork 2.0 European Conference on Rural Development urge the policy makers of the European Union to:

- **Improve public awareness of the potential of rural areas and resources** to deliver on a wide range of economic, social, and environmental challenges and opportunities benefiting all European citizens;
- **Invest in the identity of rural communities**, the potential for rural growth and to make rural areas attractive for people to live and work in throughout the different stages of their lives;
- **Build on this momentum and further develop the agricultural and rural policy** towards a result-oriented, simple, and flexible approach, based on partnership and reflecting Union objectives as well as the needs and aspirations on the ground;
- **Systematically review other macro and sectorial policies through a rural lens**, considering potential and actual impacts and implications on rural jobs and growth and development prospects, social well-being, and the environmental quality of rural areas and communities;
- **Support this 10-point programme and incorporate its vision and orientations** into future policy development.
