

PART III

Milk and milk products

1. "Milk" means exclusively the normal mammary secretion obtained from one or more milkings without either addition thereto or extraction therefrom.

However, the term "milk" may be used:

- (a) for milk treated without altering its composition or for milk the fat content of which is standardised under Part IV;
 - (b) in association with a word or words to designate the type, grade, origin and/or intended use of such milk or to describe the physical treatment or the modification in composition to which it has been subjected, provided that the modification is restricted to an addition and/or withdrawal of natural milk constituents.
2. For the purposes of this Part, "milk products" means products derived exclusively from milk, on the understanding that substances necessary for their manufacture may be added provided that those substances are not used for the purpose of replacing, in whole or in part, any milk constituent.

The following shall be reserved exclusively for milk products.

- (a) the following names used at all stages of marketing:

- (i) whey,
- (ii) cream,
- (iii) butter,

- (b) names within the meaning of Article 5 of Directive 2000/13/EC or Article 17 of Regulation (EU) No 1169/2011 actually used for milk products.

3. The term 'milk' and the designations used for milk products may also be used in association with a word or words to designate composite products of which no part takes or is intended to take the place of any milk constituent and of which milk or a milk product is an essential part either in terms of quantity or for characterisation of the product.
4. As regards milk, the animal species from which the milk originates shall be stated, if it is not bovine.
5. The designations referred to in points 1, 2 and 3 may not be used for any product other than those referred to in that point.

However, this provision shall not apply to the designation of products the exact nature of which is clear from traditional usage and/or when the designations are clearly used to describe a characteristic quality of the product.

6. In respect of a product other than those described in points 1, 2 and 3 of this Part, no label, commercial document, publicity material or any form of advertising as defined in Article 2 of Council Directive 2006/114/EC ⁽¹⁾ or any form of presentation may be used which claims, implies or suggests that the product is a dairy product.

However, in respect of a product which contains milk or milk products, the designation 'milk' or the designations referred to in the second subparagraph of points 2 of this Part may be used only to describe the basic raw materials and to list the ingredients in accordance with Directive 2000/13/EC or Regulation (EU) No 1169/2011.
