

Factsheet on 2014-2020 Rural Development Programme for the German Land Nordrhein-Westfalen

The Rural Development Programme (RDP) for Nordrhein-Westfalen was formally adopted by the European Commission on 13 February 2015, outlining Nordrhein-Westfalen's priorities for using the € 1.2 billion of public money that is available for the 7-year period 2014-2020 (€ 618.3 million from the EU budget, including € 106.2 million transferred from the German envelope for CAP direct payments, and € 557.2 million of national co-funding plus € 7.5 million of additional national funding top-ups).

The RDP for Nordrhein-Westfalen focuses mainly on two priority areas. Under the first - restoring, preserve and enhancing ecosystems related to agriculture and forestry - **27 % of farmland** will be placed under funded contracts to **improve biodiversity**, **24 %** under contracts for improving **water and soil management**. Under the second – social inclusion and local development in rural areas - **48% of the rural population** will be covered by **local development strategies** and **46%** will benefit from improved **services** thanks to fresh investment.

Support for Rural Development is the 2nd Pillar of the Common Agricultural Policy, providing Member States with an envelope of EU funding to manage nationally or regionally under multi-annual, co-funded programmes. In total, 118 programmes are foreseen in all 28 Member States. The new RD Regulation for the period 2014-2020 addresses six economic, environmental and social priorities, and programmes contain clear targets setting out what is to be achieved. Moreover, in order to coordinate actions better and maximise synergies with the other European Structural & Investment Funds (ESIF), a Partnership Agreement has been agreed with each Member State highlighting its broad strategy for EU-funded structural investment.

This document provides a brief overview of how the challenges and opportunities Nordrhein-Westfalen is facing are addressed by the RDP. In the annex, a table indicates the priorities and focus areas - each with their specific targets, and their allocated budget.

1. SITUATION AND KEY CHALLENGES

Member States with regional programmes, like Germany, may submit for approval a national framework containing common elements for the regional rural development programmes (RDPs).

Rural development is implemented in Germany through 13 separate regional RDPs, which broadly correspond to the various *Länder* (but with two joint programmes). However, elements common to regional programmes are presented in a national framework (NF) established at federal level. In addition to this, in Germany a National Rural Network Programme provides the funding for the networking of rural development actors.

Nordrhein-Westfalen has 17.8 million inhabitants and is the biggest German Land in terms of population. It is the fourth largest in territory. The region is one of the most

densely urbanised in Europe. Agriculture has a share of only 0.5% in the regional gross value added (compared to 1% in Germany as a whole). Only 0.8% of the population lives in rural areas. 25% lives in intermediate areas.

The unemployment rate is 5.9% (2012) which corresponds approximately to the federal average. Demographic change and loss of business activity in rural areas are ongoing challenges.

In addition, the region faces environmental challenges – related to soil erosion, nitrate pollution in surface and ground waters and pressure on biodiversity.

2. HOW THE RDP FOR NORDRHEIN-WESTFALEN WILL ADDRESS THESE CHALLENGES

In addressing these challenges, the RDP of Nordrhein-Westfalen will fund action under all six Rural Development Priorities – with a particular emphasis on **restoring, preserving and enhancing ecosystems related to agriculture and forestry** as well as **social inclusion and local development in rural areas**. The focus of each priority is explained briefly below.

Knowledge transfer and innovation in agriculture, forestry and rural areas

This cross-cutting will be addressed mainly through measures supporting training and advisory services for rural people and businesses (especially related to resource efficiency, the environment and climate change): **nearly 17 000 people will be trained**. There will also be support for cooperation in the framework of the **European Innovation Partnership** for Agricultural Productivity and Sustainability.

Competitiveness of agri sector and sustainable forestry

Besides the above-mentioned support for training, **2.5 % of farms** will receive funding for **investments** – focused on innovative potential, young farmers, organic farming, animal welfare and resource efficiency. This funding will also cover land consolidation and agricultural access roads. This will be complemented by support for the **European Innovation Partnership**, as well as for **processing and marketing in the wood sector**.

Food chain organisation, including processing and marketing of agricultural products, animal welfare and risk management in agriculture

11% of farms in Nordrhein-Westfalen are expected to participate in **animal welfare measures** – related mainly to **summer pasture** and **improved indoor housing** (straw bedding, increased space per animal, natural light).

Restoring, preserving and enhancing ecosystems related to agriculture and forestry

27 % of farmland will be placed under funded contracts to **improve biodiversity**, **24 %** under contracts for improving **water and soil management** – related to land management practices including organic farming, crop diversification, winter cover, buffer strips, extensive grassland farming and nature protection. Support for **environmental investments** will complement this contractual support – e.g. in relation to more eco-friendly manure treatment and more resilient forest ecosystems. € 29 million is allocated for **grassland in Natura 2000 areas**.

Resource efficiency and climate

The RDP will address this priority through support for investments in **more resource-efficient wood harvesting and processing technologies**. The above-mentioned support for **investments in farm modernisation** will also contribute when they

improve energy or water efficiency or cut greenhouse gas emissions through more eco-friendly manure treatment. **2.3 % of farmland** will be under funded contracts to **cut greenhouse gas and ammonia emissions**.

Social inclusion and local development in rural areas

The programme will fund **Local Development Strategies** drawn up by the Local Action Groups under the LEADER approach: these will cover areas containing **48% of the rural population**. There will also be support for other co-operation projects, village renewal and service improvement (especially for young people and families) and broadband infrastructure. **46 % of the rural population** will benefit from **new or improved services** thanks to fresh investment.

The four **biggest RDP measures** in budgetary terms (total public funding) are:

- € 327 million allocated to Measure 10: Agri-environment and climate measures
- € 197 million allocated to Measure 7: Basic services and village renewal in rural areas
- € 190 million allocated to Measure 4: Investments in physical assets
- € 132 million allocated to Measure 11: Organic farming

Annex 1: Indicative public support for the Rural Development Programme of Nordrhein-Westfalen

North Rhine-Westphalia: RDP strategy summary table with indicative public support			
Focus Area and targets	Measure	€ Total public	%
P1: Knowledge transfer and innovation in agriculture, forestry and rural areas (1)			
1A: fostering innovation, coop, knowledge base 3.21 % RDP expenditure	01 knowledge		
	02 advisory services		
	16 cooperation		
1B: strenghtening links (with research, etc.) 231 coop operations	16 cooperation		
1C: training 16 800 participants	01 knowledge		
P2: Enhancing farm viability and competitiveness of all types of agriculture in all regions and promoting innovative farm technologies and the sustainable management of forests		183 805 270	15.54
2A: Farm performance 2.52 % of holdings with RDP support	01 knowledge	8 444 444	0.71
	02 advisory services	7 333 333	0.62
