

## **Factsheet on 2014-2020 Rural Development Programme for Greece**

The Rural Development Programme (RDP) for Greece was formally adopted by the European Commission on 11 December 2015, outlining Greece's priorities for using the € 5.9 billion of public money that is available for the period 2014-2020 (€ 4.7 billion from the EU budget and € 1.2 billion of national co-funding).

The Greek RDP focuses mainly on enhancing farm viability and competitiveness, preserving and enhancing ecosystems and promoting local development in rural areas. Farmers will receive support to put 10.3% of the Greek farmland under contracts to preserve biodiversity, 12.1% to improve water management and 10.7% to improve soil management and/or prevent soil erosion. Investment support for restructuring and modernisation will be provided to 6 300 agricultural holdings and 23 900 young farmers will receive start up aid. In addition, over 8 300 agricultural holdings will receive support to develop short supply chains, local markets and to carry out promotional activities and about 600 agri-food businesses will receive support for investments in processing and marketing of agricultural products. Support for knowledge and innovation activities makes up over 6% of the planned public expenditure and the programme will create around 86 640 training places for farmers and other rural businesses. The RDP will also support local development via LEADER Local Action Groups covering nearly half of the country's rural population and improve access to basic services for approximately 10% of the rural population, including IT infrastructures (e.g. broadband internet).

Support for Rural Development is the 2nd Pillar of the Common Agricultural Policy, providing Member States with an envelope of EU funding to manage nationally or regionally under multi-annual, co-funded programmes. In total, 118 programmes are foreseen in all 28 Member States. The new RD Regulation for the period 2014-2020 addresses six economic, environmental and social priorities, and programmes contain clear targets setting out what is to be achieved. Moreover, in order to coordinate actions better and maximise synergies with the other European Structural & Investment Funds (ESIF), a Partnership Agreement has been agreed with each Member State highlighting its broad strategy for EU-funded structural investment.

This document provides a brief overview of how the challenges and opportunities Greece is facing are addressed by the RDP. In the annex, a table indicates the priorities and focus areas each with their specific targets, and their allocated budgets.

## **1. SITUATION AND KEY CHALLENGES**

Greece will implement a single national Rural Development Programme. The country covers an area of 131 621 km<sup>2</sup>, of which 82.2% is rural and where 44.1% of the population live. Over half of the country's 723 010 agricultural holdings have less than 2 hectares and the small and fragmented land parcels constitute one of the main characteristics of Greek agriculture. The lack of a skilled workforce is a barrier to growth for farms. Only 12.6% of farm managers is less than 35 years old and merely 3.5% of all farm managers have agricultural training. The indicator measuring the standard of living of farmers stands at 64.4% of the standard of living of persons employed in other sectors.

Agriculture contributes 3.7% of the Greek Gross Value Added (2013) of the country. In terms of employment, agriculture accounts for 13.2% and the agri-food sector for 3.3% of the total. The economic importance of the sector is therefore significant and enhancing its competitiveness by overcoming its structural, environmental and climatic limitations remains a key challenge.

Areas with natural constraints make up 78.1% of the Utilized Agricultural Area (UAA), of which 53.9% is mountainous regions. Forests make up 50% of the total land area of the country and organic farming covers 3.8% of the UAA. Irrigated land accounts for 19.8% of the UAA and 86% of water use in Greece is consumed in agriculture, often with considerable water losses. Greece's unemployment rate is 27.3% (2013) and lies above the EU average.

## **2. HOW THE GREEK RDP WILL ADDRESS THESE CHALLENGES**

In addressing the abovementioned challenges, the Greek RDP will fund actions under all six Rural Development priorities – with a particular emphasis on the competitiveness of the agricultural sector and sustainable forestry, and on restoring, preserving and enhancing ecosystems related to agriculture and forestry. The focus of each priority is explained briefly below.

### Knowledge transfer and innovation in agriculture, forestry and rural areas

Under this priority the Greek RDP aims at supporting 530 cooperation projects, including the framework of the European Innovation Partnership, as well as by stimulating the development of supply chain partnerships in the agri-food sector. About 86 640 training places will be made available to enhance knowledge transfer in the fields of environmental awareness, innovative technologies, and research to encourage practical implementation on farms and in forests.

### Competitiveness of agricultural sector and sustainable forestry

About 23 900 Greek farms will benefit from business development plan support for Young Farmers and about 6 300 farms will benefit from support for restructuring and modernising their businesses. It should be noted that young farmers will also benefit from training and a higher support rate for their investments under the corresponding measures of the programme.

### Food chain organisation, including processing and marketing of agricultural products, animal welfare and risk management in agriculture

Over 8 300 agricultural holdings will receive support to set up short supply chains, develop local markets and launch promotion activities, and 600 agri-food businesses will receive support for investments in the processing and marketing sector.

### Restoring, preserving and enhancing ecosystems related to agriculture and forestry

Greece aims at bringing 10.3% of agricultural land under contracts to preserve biodiversity, 12.1% to improve water management and 10.7% to improve soil

management. Measures to support agro-forestry and afforestation aim at bringing a small part of Greece's forest land under management contracts.

#### Resource efficiency and climate

This priority aims at supporting a more efficient use of natural resources, in particular water, and the development of renewable energy sources in Greece. Almost 5% of the irrigated land will contribute to better water efficiency through public and private investments in irrigation infrastructure. It is expected that approximately 51 000 hectares of irrigated land will switch to more efficient irrigation systems. Integrating this support with measures, such as investments in physical assets and knowledge transfer activities and advisory services, is expected to improve water efficiency reduce and agriculture's share in overall water consumption.

#### Social inclusion and local development in rural areas

Nearly half of Greece's rural population is expected to be covered by a local development strategy while over 10% of the rural population will benefit from improved services and ICT infrastructure. LEADER aims at creating 2 000 new jobs. Furthermore, about 3 140 beneficiaries will receive support for investments in non-agricultural activities in rural areas thus contributing to the creation of 2 860 jobs.

The five **biggest RDP measures** in budgetary terms (total Public contribution) are:

- € 1 490 million allocated to Investments in physical assets
- € 1 101 million allocated to Areas facing natural or other specific constraints
- € 801.2 million allocated to Organic farming
- € 472.2 million allocated to Agri-environment and climate measures
- € 438.1 million allocated to Farm and business development

## Annex: Indicative public support for the Rural Development Programme in Greece

Target	Measure	€ Total Public	%
<b>Priority 1: Knowledge transfer and innovation in agriculture, forestry and rural areas<sup>1</sup></b>			
1A - Innovation, cooperation, knowledge  6.14% of RDP expenditure	M01 - Knowledge transfer		
	M02 - Advisory services		
	M16 - Cooperation		
1B - Research and innovation  530 cooperation projects	M16 - Cooperation		
1C - Lifelong learning and vocational training  86 640 participants trained	M01 - Knowledge transfer		
<b>Priority 2: Enhancing Farm viability and competitiveness in agriculture and promoting innovative farm technologies and the sustainable management of forests</b>			<b>834 664 199</b>
2A - Farm performance  0.87% farms with RDP support  6 300 agricultural holdings receiving support for investments in restructuring and modernisation	M01 - Knowledge transfer	23 628 819	0.40
	M02 - Advisory services	8 985 809	0.15
	M04 - Investments	447 521 653	7.61
	M06 - Farm and business development	30 050 995	0.51
	M16 - Cooperation	16 679 167	0.28
2B - Young farmers  3.31% farms with RDP support for YF  23 900 agricultural holdings receiving support for business development plans for young farmers	M06 - Farm and business development	307 797 756	5.23
<b>Priority 3: Promoting food chain organisation, including processing and marketing of agricultural products, animal welfare and risk management in agriculture</b>			<b>471 954 875</b>
3A - Competitiveness of producers  8 305 (1.15%) farms supported for participating in quality schemes, local markets and short supply circuits  600 agri-food enterprises supported for investment in processing and	M01 - Knowledge transfer	6 393 681	0.11
	M03 - Quality schemes	51 860 054	0.88
	M04 - Investments	290 409 291	4.94
	M09 - Producer groups / organisations	27 798 611	0.47
	M14 - Animal welfare	12 980 584	0.22
