

Factsheet on 2014-2020 Rural Development Programme for Basilicata

The Rural Development Programme (RDP) for the Region of Basilicata was formally adopted by the European Commission on 20th November 2015, outlining Basilicata's priorities for using the nearly € 671 million of public money that is available for the 7-year period 2014-2020 (€ 406 million from the EU budget and € 265 million of national co-funding).

The RDP for Basilicata focuses mainly on three areas. As part of its efforts to preserve and enhance ecosystem and resources efficiency and climate around 240 000 hectares will come under management contracts to improve biodiversity, water management and soil quality. In order to improve the competitiveness of farmers, the region will support 323 investment projects to restructure and modernize farms and over 639 young farmers will be granted business start-up aid. In addition to this 10% of the rural population will benefit from local strategies to improve living conditions in rural areas and around 2.5 % of the rural population will have better access to ICT infrastructure.

Support for Rural Development is the 2nd Pillar of the Common Agricultural Policy, providing Member States with an envelope of EU funding to manage nationally or regionally under multi-annual, co-funded programmes. In total, 118 programmes are foreseen in all 28 Member States. The new RD Regulation for the period 2014-2020 addresses six economic, environmental and social priorities, and programmes contain clear targets setting out what is to be achieved. Moreover, in order to coordinate actions better and maximise synergies with the other European Structural & Investment Funds (ESIF), a Partnership Agreement has been agreed with each Member State highlighting its broad strategy for EU-funded structural investment. The Partnership Agreement of Italy was approved on 29 October 2014.

This document provides a brief overview of how the challenges and opportunities Basilicata is facing are addressed by the RDP. In the annex, a table indicates the priorities and focus areas each with their specific targets, and their allocated budgets.

1. SITUATION AND KEY CHALLENGES

In Italy rural development is implemented through 22 separate RDPs – one at national level and 21 regional RDPs. In addition, the National Rural Network Programme provides the funding for the networking of rural development actors in Italy.

Basilicata is categorized as a less developed region. It covers an area of 10 073 km²; the whole region is rural. 576 194 inhabitants live in the region, with an average population density of 54.7 inhab/Km².

Of the total area, agricultural land covers 50% and forest land 35%. The utilized agricultural area (UAA) is around 519 000 ha. 60% of farm land is used for arable crops. The region's 51 760 farms produce cereals (35%) as well as fruit and vegetable, olive-oil

and wine. Organic farming is still relatively unimportant, covering 44 390 ha (2.3% of the farms). Animal husbandry is quite extensive in mountains. Dairy cattle, sheep and goat are farmed for meat and dairy in mountains areas.

Basilicata has an average employment rate of 46.9% (55% national average); unemployment rate of 14.5% (year 2013) and the youth unemployment rate is 49.3%. Agriculture contributes to the 8.8% of the added value produced in the region.

Natura 2000 covers 23.7% (236 872 ha) of the regional territory. Areas classified as less-favoured mountains areas cover 45% of the UAA.

The chief environmental challenges relate to soil erosion, water quality and biodiversity protection.

2. HOW THE BASILICATA'S RDP WILL ADDRESS THESE CHALLENGES

In addressing these challenges, Basilicata's RDP will fund action under all of six Rural Development priorities – with a particular emphasis on competitiveness (Priorities 2), environmental land management (Priority 4) and social inclusion (Priority 6). The focus of each priority is explained briefly below.

Knowledge transfer and innovation in agriculture, forestry and rural areas

Knowledge transfer and innovation actions will be put in place to increase the economic and environmental performance of farms, as well as for the development of rural areas and ten percent of funds will be allocated to actions related to this priority.

Almost 2 352 places will be made available in training courses and the programme will give farmers access to advisory services on topics related to the RDP priorities. The region is planning to launch 100 co-operation projects.

Competitiveness of agri sector

Support will be targeted to process and product innovation in farms and agro-industrial holdings. The objective is to improve output and product quality whilst reducing production costs. Equally important is the improvement of environmental sustainability, energy efficiency as well as rural infrastructure. The RDP will support the diversification of farms in order to create new income opportunities, for instance through the valorisation of agricultural by-products and waste.

To reach these objectives, the region will support 323 investment projects to restructure or modernise farms and over 639 young farmers will be granted business start-up aid

Food chain organisation, including processing and marketing of agricultural products, animal welfare and risk management in agriculture

Under this priority, the region wishes to grant support to integrated projects in the supply chain. The objective is to increase and stabilise the profitability of primary production and give priority to the modernisation of production processes and support for quality production. The region wants to encourage "from farm to fork" approaches and various forms of association in agriculture in order to reduce costs and improve the marketing of products. To reach these objectives, around 373 investment projects will receive support.

Restoring, preserving and enhancing ecosystems related to agriculture and forestry

Under this priority, Basilicata will safeguard water quality through the promotion of agricultural production techniques that reduce pressure on the environment and combat

erosion in hills and mountain area. The programme also proposes actions for the sustainable management of ecosystems and habitats, for preventing agricultural land abandonment and preserving plant and animal agricultural biodiversity.

Nearly 17 % of the agricultural land will be under management contracts supporting biodiversity, 15% under management contracts supporting water management and 15% of the agricultural land will be under management contracts supporting soil management. Over 14 332 hectares will receive support to convert to organic farming and another 22 325 ha to maintain organic production.

Resource efficiency and climate

Under this priority Basilicata aims to support the shift towards a low carbon and climate-resilient economy in agriculture and it will be supported mainly indirectly through cooperation projects, mainly for the sustainable provision of biomass for use in energy production. The programme will support the development of bioenergy and the use of agricultural and agro-industrial by-products, reducing emissions from agro-industrial activities and increasing carbon sequestration through forestry.

Investments in agricultural holdings with environmental purposes will also contribute indirectly to climate change mitigation and adaptation.

Social inclusion and local development in rural areas

The main actions refer to fostering local development in rural areas and broadband internet deployment (including the development of ICT-services). More than 80 beneficiaries will receive support for investments in non-agricultural activities in rural areas, while basic services will be improved for 57 170 inhabitants of the rural population.

Local Development Strategies (LEADER), which covers 76 % of the rural population (438 880 inhabitants), will create 62 additional jobs and around 14 490 inhabitants (2.5 % of the rural population) will have better access to ICT infrastructure.

The four ***biggest RDP measures*** in budgetary terms (total public funding) are:

- o € 146.2 million allocated to M4 (investments in physical assets)
- o € 89.5 million allocated to M8 (forestry)
- o € 86.2 million allocated to M11 (Organic farming)

Annex 1: Indicative public support for the Rural Development Programme in Basilicata region

Target	Measure	€ Total public	%
Priority1: Knowledge transfer and innovation in agriculture, forestry and rural areas¹			
1A: Fostering innovation, cooperation, knowledge base 4.87% of RDP expenditure	01 knowledge		
	02 advisory		
	16 cooperation		
1B: Strengthening links (with research etc.) 100 cooperation projects	16 cooperation		
1C: Training 2 352 participants trained	01 knowledge		
Priority 2: Farm viability, competitiveness and sustainable forest management		123 173 671	18.35
2A: Economic performance, restructuring & modernisation 0.62% of holdings with RDP support	01 knowledge	2 121 012	0.32
	02 advisory	87 351	0.13
	04 investments	47 439 688	7.07
	06 farm / business development	3 670 982	0.54
	16 cooperation	1 142 083	0.17
2B: Generational renewal 1.23% of holdings with RDP supported business development plan/investments for young farmers	01 knowledge	1 851 333	0.27
	02 advisory	571 042	0.09
	04 investments	26 999 662	4.02
