

## ANNEX 3.D

### LEAD BASELINE INDICATORS DATA AT REGIONAL LEVEL

<b>Abbreviations &amp; signs used in the datasets for baseline indicators</b>
---

**Abbreviations & signs used in the Data column**

n.a.	not available
n.s.	not significant
-	not relevant

**Abbreviations & signs used in the Flag column**

**Quality of the data**

c	confidential
e	estimate
p	provisional
	unreliabl
u	e

**Different source**

When the source used to calculate a value is different from the main source, it is indicated as a flag. To get more information on the sources, please refer to the section "presentation of the sources" in the document "Baseline Indicator Fiches"

stat. data	Statistical data, as opposed to Census data. See the relevant indicator fiche (C18-Age structure – Technical Annex 3.C) for more explanations.
FSS	Farm Structure Survey
LFS	Labour Force Survey
OFP project	The full title of EU-CEE-OFP research project is " <i>Further development of Organic Farming Policy in Europe, with Particular Emphasis on EU Enlargement</i> ", led by the University of Institute of Rural Sciences, University of Wales, Aberystwyth. The project receives the financial support of the Commission of the European Community under the 5th Framework Programme (Resources QLK5-2002-00917). See the relevant indicator fiche (O23-Organic farming – Technical Annex 3.C) for more explanations.
reg. accounts	Regional Accounts

**Different NUTS level of calculation**

When the value has been calculated at a NUTS level different than the one indicated in the sheet name, it is precised in the flag column.

NUTS 2 data	This flag is used for indicator C2-Importance of rural areas. The calculation has been made on the basis of NUTS 3 data, except for the countries signalled by this flag. Please refer to the indicator fiche (Technical Annex 3.C) for more detail.
DE4	For the German NUTS 2 regions DE41 & DE42, when the data where not available, the calculation has been made at the corresponding NUTS 1 level (DE4).

### Different year

When the value given for a NUTS code / MS differs from the main year used for the indicator, it is indicated as a flag.

### Different calculation

For some indicators, mainly due to data availability, the value for a given NUTS code may have been calculated in a slightly different way than the one indicated in the fiche (available in Technical Annex 3.C). It is then indicated by a flag.

LFS G_to_Q	A_B or	For indicators referring to employment, the main source is the National Accounts. For some countries, LFS series have been used. The breakdown by branch used in LFS may not always correspond to the one defined for the indicator, which is signalled in the flag. For more information, please refer to the corresponding indicator fiche (Technical Annex 3.C).
hotels only / sum of available data		Some indicators (e.g. O31-Tourism infrastructure) consist in a sum of variables. When one or more of this variables are missing, it is indicated in the flag column.
forest		Some indicators (e.g. C16-Protective forests) refer to an aggregate of areas: in this example Forest + Other wooded land. When data for one of this area are missing, it is indicated in the flag column. In this example "forest" means that the given data correspond only to the forest area.
e-G2		For the EU aggregates, in most cases, Eurostat provides the value. When it is not the case, or when other sources have been used, the aggregate may have been calculated by DG AGRI, which is indicated by the flag "e-G2"

Indicator Measurement	Source	Year	Unit	Calculation	NUTS code	label	NUTS level	FLAG OECD / Eurostat (Context)	Objective 1 - Economic Development	Objective 2 - Employment Rate	Objective 3 - Unemployment	Objective 4 - Training and Education in Agriculture	Objective 6 - Labour Productivity in Agriculture	Objective 27 - Farmers with Other Gainful Activity	Objective 33 - Development of Services Sector
