## Construction of LNG terminal Krk

6.5.1-0018-HR-W-M-16

**Programme:**

CEF Energy

**Call year:**

2016

**Location of the Action:**

Croatia

**Implementation schedule:**

February 2018 to December 2020

**Maximum EU contribution:**

EUR 100,777,119

**Beneficiaries:**

LNG Hrvatska d.o.o. (Croatia)

<http://www.lng.hr>

**Status:**

Closed

**Energy corridor:**

North-South gas interconnections in Central Eastern and South Eastern Europe

**Energy sector:**

Gas

**Project(s) of Common Interest:**

6.5.1

**Executive summary:**

Executive Summary available [here](#)

**Last modified:**

March 2023

The Action implemented the first phase of the Project of Common Interest (PCI) 6.5.1 that addressed the development of a Liquefied Natural Gas (LNG) terminal on the island of Krk in Croatia. The objective of the Action was to procure and put into operation a Floating Storage and Regasification Unit (FSRU) and to construct a dedicated jetty and a connecting pipeline with an approx. send-out capacity of 2 bcm/year. The investments form an integrated facility to unload, store and regasify LNG and will allow for anchoring special purpose LNG vessels, refilling LNG into the tanks.

The planned activities included: construction of the jetty and auxiliary systems, construction of the connecting high-pressure (HP) gas pipeline and purchase and delivery of an FSRU.

The completed Action has enhanced the diversification of natural gas supply for Central Eastern & South Eastern Europe, increased security of gas supply and improved competitiveness in the region. This Action followed the preparatory studies carried out under other CEF-funded Actions, namely 6.5.1-0037-HR-S-M-14, 6.5.1-0026-HR-S-M-15 and 6.5.1-0014-HR-S-M-16 and was accompanied with another CEF-funded Action - Construction works for the LNG Evacuation Gas Pipeline section Omišalj-Zlobin 6.5.1-0014-HR-W-M-17 that connects the LNG terminal to the national gas grid.
