Status:

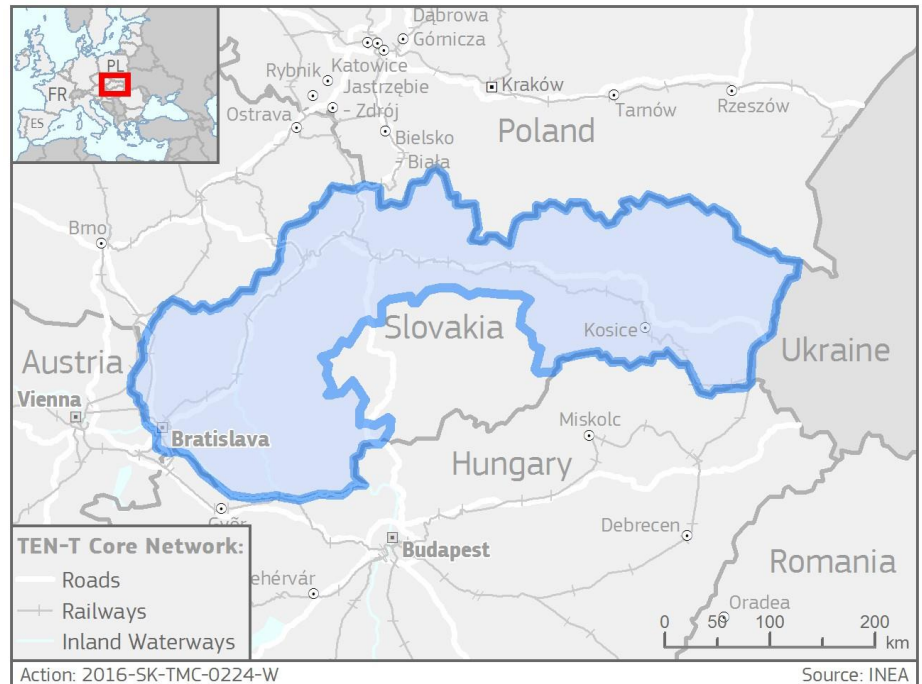

Ongoing

Last modified:

March 2023

Action Website:

<https://www.zssk.sk/o-spolocnosti/projekty-eu/nastroj-na-prepajanie-europy-cef/>

The Action covers the on-board equipment with ETCS Level 2 Baseline 3 of 9 units of 361 series operated by the Beneficiary. These units are intended to run on the Rhine-Danube, Baltic-Adriatic and Orient-East Med Core Network Corridors.

The Action complies with the Strategic Plan for Transport Infrastructure Development of the Slovak Republic by 2020, which foresees a technical provision of interoperability through the establishment of ERTMS. Installation and use of ETCS will enhance safety and smoothness of railway passenger transport and allow increasing the train speed on track sections equipped with ETCS, which will subsequently be reflected into the growth of economic efficiency of these vehicles.

Once implemented, the Action will have positive social and economic benefits as it will contribute to support the development of railway passenger transport in Slovakia as well as within the European context.
