## Hinterland connection with core port of Szczecin: railway bridge over the Regalica river

2019-PL-TM-0244-W

**Programme:**

CEF Transport

**Transport corridor:**

Baltic - Adriatic, North Sea - Baltic

**Transport mode:**

Maritime

**Call year:**

2019

**Location of the Action:**

Poland

**Implementation schedule:**

February 2020 to June 2023

**Maximum EU contribution:**

EUR 7,104,962

**Total eligible costs:**

EUR 35,524,809

**Percentage of EU support:**

20%

**Coordinator:**

Państwowe Gospodarstwo Wodne Wody Polskie  
(Poland)

**Status:**

Ongoing

**Last modified:**

March 2023

The Action aims at ensuring sustainable and efficient inland waterways and rail transport to/from the core seaports of Szczecin and Świnoujście, on the Baltic-Adriatic Core Network Corridor.

The connection between the sea ports and the hinterland will be enhanced through the construction of a new double-track railway bridge over the Regalica river (Eastern Oder). It will replace an old single-track drawbridge, whose clearance of less than 3 metres does not allow the navigation underneath, unless the movable span of the bridge is risen. This prevents safe and free navigation of inland waterway vessels under the bridge and disrupts train traffic on the railway.

The new railway bridge will be around 278 metres long and 14 metres wide, with a vertical clearance of 6.20 metres. The higher clearance and enhanced rail capacity of the new bridge will allow unhindered passage of inland waterways vessels underneath it and trains over it, solving the collision of waterway and railway and improve the accessibility to sea ports. On the long run, it will contribute to the sustainability of the transportation links and prepare for expected future transport flows.

The bridge is located at the intersection of the Regalica river and the comprehensive railway line No. 273, in the access area to the core port of Szczecin.
