The second column shows performance relative to that of the EU in 2023. Colours next to the column show matching colour codes: dark green: above 125% of the performance of the EU in 2023; light green: between 100% and 125%; light orange: between 70% and 100%; dark orange: below 70%. The next columns show performance change over time between 2016 and 2023 and between 2022 and 2023, with scores relative to those of the EU in 2016. Positive (negative) performance changes are shown in green (red).

POLAND is an **Emerging Innovator** with performance at 62.8% of the EU average. Performance is above the average of the Emerging Innovators. Performance is increasing at a rate higher than that of the EU (8.5%-points). The country's performance gap to the EU is becoming smaller.

The graph on the left shows the evolution of **innovation performance over time** against the performance of the country in 2016. Innovation performance increased strongly over time being 24% higher in 2023, with half of the increase taking place in 2023.

The graphs below show the evolution of innovation performance in the different **innovation dimensions** against the performance of the country in 2016. Performance increased most strongly for Research systems, Finance and support, Information technologies, Innovators, Linkages and Employment impacts. Performance declined for Firm investments, Intellectual assets and Environmental sustainability.

Performance is measured relative to that of the country in 2016 (=100).

Structural differences with the EU are shown below:

- Poland has lower per capita income, but a faster growing economy. Manufacturing takes up a larger share of the economy, with both SMEs and large enterprises accounting for a smaller share of turnover.
- Enterprise births, and FDI net inflows add positively to the innovation climate, Entrepreneurial Activity, Top R&D spenders, and Buyer sophistication add negatively.
- Poland has a much higher share of Non-innovators without disposition to innovate.
- Entrepreneurial training and government procurement average as drivers of research and innovation are below the EU average.
- Poland's performance on climate change indicators is subpar, particularly in regards to environmental innovation.
