

**Annex 3**  
**2022 Annual report on general surveillance of genetically  
modified organisms from FEDIOL**

Brussels, 30 August 2022

[REDACTED] CropLife  
Europe  
9 Rue Guimard  
1040 Brussels

**Subject: 2022 annual report on general surveillance of genetically modified organisms**

Dear [REDACTED],

We are responding to CropLife Europe and its member companies regarding the general surveillance of genetically modified organisms (GMOs) that have been authorised for placing on the market in the EU and in Great Britain, according to Directive 2001/18/EC and/or Regulation (EC) No 1829/2003. We recognise our organisations' role in the supply chain to facilitate the notification by operators of any observed unanticipated adverse effects of GMOs on human and animal health or the environment.

In view of the above, FEDIOL has undertaken the necessary steps to

- Inform and remind their member organisations and companies on an annual basis
  - to monitor for potential unanticipated adverse effects
  - that, in the framework of their management or safety standards (ISO, HACCP, ...), procedures must be in place and implemented to limit losses and spillage of viable GMOs and to routinely eradicate adventitious populations on their premises
  - to inform and remind their own member companies of this requirement
  - to report back any adverse effect reported to them to the European trade associations.
- Report to the authorisation holders directly or via CropLife Europe
  - at least annually, regardless of whether an adverse effect was observed or not
  - immediately any adverse effects reported to them.

For the authorised GMO(s), FEDIOL has alerted their members to the product and safety information made available by the authorisation holder(s) via CropLife Europe's operator

website<sup>1</sup>, including any information regarding the general surveillance of the listed product(s).

The lists of authorised GMOs in the European Union and Great Britain are available on the Community register of GM food and feed<sup>2</sup> and the Register of GMOs for food and feed uses in Great Britain<sup>3</sup>. The list of all authorised GMOs is included in the Annex below.

FEDIOL has been collating reports of potential adverse effects resulting from the placing on the market of these products, which may have come to the attention of their members.

To date, FEDIOL confirms that throughout the reporting period and based on their annual reminder to their member organisations and companies, no observed adverse effects have been reported from the monitoring by their members.

Yours sincerely,

A black rectangular redaction box covering the signature area.
