**Brief motivation (max 100 words):** The Netherlands wants to continue to commit to accelerating interoperability by strengthening the collaboration between the Member States in the years leading up to the EHDS. We showed that we can work together on the DCC. We should keep this momentum by preparing for the EHDS together. The time is now to continue to learn from each other, help each other and establish interoperability together. In addition, NL wants to build the bridge with the rest of the world and initiatives like the GDHP. We are all playing the same game, only the playing field and the players differ.
