Brazil and

G20/WHO pilot

- *G20 launched in March 2022 a Pilot Project under its Indonesian presidency (with WHO/OECD/GDHP/UNDP involvement) to develop a global trust framework and a universal verifier to validate digital Covid-19 certificates*
- *COM is contributing to the discussions, providing input*
- *EU MS were invited to join the meetings and the pilot. NL, FR, ES and DE participate in the meetings*
- *Pilot based on combining already existing solutions*
- *Timeline: Connect-a-thon - phase 2 mid December, phase 3 February, final report on technological feasibility of harmonizing existing trust networks*
- *Goal: establish a global public trust repository for digital Covid-19 and beyond*

EU DCC Regulation - Article 16(3) Report

- *EC will have to assess the appropriateness of the continued use of EUDCCs in the EU*
- *EC will provide a report to EP and Council by 31 December 2022*
- *The report will include information on:*
 - ✓ **restrictions to free movement**
 - ✓ **domestic and international uses of the certificates**
 - ✓ **impact on the acceptance of the different types of vaccine, the fundamental rights and non-discrimination**
 - ✓ **respect of data privacy and protection of personal data**

Future of the EU DCC

- *EU DCC Regulation expiring on 30/06/2023*
- *Discussions ongoing in the eHN subgroups*
- *Parallel ongoing internal COM discussion on possible options*
- *Need to take account of*
 - **eHN and MS intentions**
 - **impact on the connected / third countries (more than 76)**
- *Possible re-use of the technology (QR code, trust network, etc)*
