

24TH EHEALTH NETWORK MEETING 1-2 JUNE 2023, STOCKHOLM, SWEDEN

COVER NOTE

11. Update on EHDS

1) Introduction

On 3 May 2022, the European Commission adopted the proposal for a Regulation on the European Health Data Space (EHDS), which was accompanied by an impact assessment and a communication. It is the first proposal for a common European data space following the communication ‘A European strategy for data from 2020, which announced the creation of nine sector- and domain-specific data spaces.

The proposal aims to improve individuals’ access to and control over their personal electronic health data (primary use of data), including at national and EU level, and to facilitate data re-use (secondary use of data) for research, innovation and public policy purposes across the EU. It also aims to improve the functioning of the single market, in particular for the development, marketing and use of digital health services and products (e.g. electronic health record systems).

2) Issue at stake

The Commission will give a short overview of the negotiations with both co-legislators.

3) Summary

The Commission will give a short overview of the negotiations with both co-legislators.

4) Format of procedure in the meeting

No action required from eHN members, point for their information.
