

**25TH EHEALTH NETWORK MEETING 28 NOVEMBER 2023,
BRUSSELS**

COVER NOTE

6.6. eHMSEG Updates (*for discussion*)

1) Introduction

The eHealth Member State Expert Group (eHMSEG) is an operational body of the MyHealth@EU infrastructure, which consists of representatives of the MS National Contact Points for eHealth (NCPeHs) who participate in the deployment and operation of the MyHealth@EU cross-border services. With the help of its work groups and task forces and in close co-operation with the Commission, the eHMSEG ensures that the MyHealth@EU infrastructure is both operational and interoperable throughout the EU.

2) Issue at stake

The eHMSEG presents an update of its activities, which are focused on the continuous expansion and improvement of the MyHealth@EU cross-border eHealth services within the EU and in support of member states already in operation and those in the process of implementing these critical services.

3) Summary

The eHMSEG community focuses on support within MyHealth@EU in the following domains technical, semantic, legal, operational and communication domains. While continuing to provide support to MS operating and entering into operation with these services i.e. Patient Summary, ePrescription/eDispensation, Original Clinical Documents, in the upcoming years, the eHMSEG has to work and co-operate with the eHN and its subgroups to prepare the environment at a strategic level for the operational implementation of new usecase (laboratory reports, hospital discharge reports, images and image reports).

4) Format of procedure in the meeting

This Agenda point is for information, but it will be presented during the meeting.
