20TH eHEALTH NETWORK 8 NOVEMBER 2021, BRUSSELS, BELGIUM

COVER NOTE

4.3 X-eHealth update

1. Issue at stake

Inform the eHealth Network of the state of play with regard to x-eHealth and what are the expectations regarding this project and its link to the Myhealth@EU initiative.

2. Summary

The X-eHealth project is taking forward the European Electronic Health Record Exchange Format by developing draft technical specifications for the transfer of new health domains (medical images, hospital discharge letters, and lab tests).

Over the coming year, the project will start to produce its results.

It is important that all are aware of the timing of the project deliverables given the time-frame to make adaptations to the eHealth DSI architecture to accommodate these new health domains.

3. Format of procedure in the meeting

No action required only for information
