

4.4 Timeline for the eHN Patient Summary Guidelines release 3 implementation in the eHDSI

Eamon Coyne, eHMSEG Co-Chair
Health Service Executive Ireland

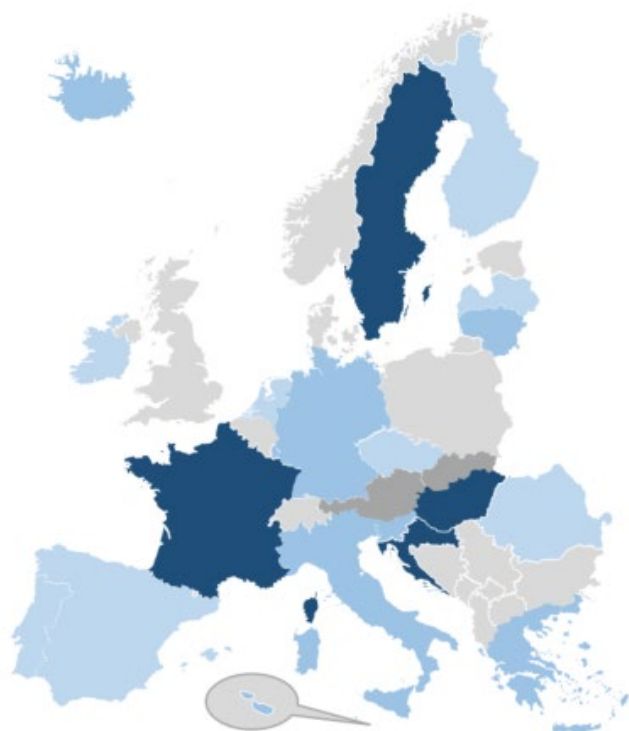

Patient Summary in the eHDSI

- *EU PS Guideline V2 have been adopted by the eHN in November 2016*
 - Within the period of the CEF project the PS Guidelines V2 are the base for the CDA PS - Implementation Guide
 - Still to be used in upcoming Waves beyond 2021
- *EU PS Guideline V3 have been adopted by eHN on June 2021*
 - Developed by eHN Subgroup on semantics
 - Extension based
 - On experiences gained from MS Feedback within eHDSI
 - On the alignment with the work on the IPS and CEN – IPS specifications
 - Intended to be implemented within EU4Health

Survey on MS plans to implement PS Guideline V3

Intended application in:

- 2022-2023: *FR, HU, HR, CY, SE*
- 2024-2025: *DE, LU, SI, IT, MT, LT, IS*
- 2026-2027: *IE, PT, ES, NL, CZ, LV, RO, FI*
- *Unlikely: AT, SK*

20 Member States aim to implement the PS following the V3 Guidelines within EU4Health

Common efforts needed

- *Business requirements update*
- *Creation of new Implementation Guide / extension of the existing one*
- *New validation rules*
- *MVC new / extended value sets, new code system versions*
- *Implementation changes of common assets (CDA-Display tool, Transformation manager, ...)*
- *...*

Additional MS level efforts

- *Modification of current implementation*
 - National connector
 - Transformation of national PS document to new eHDSI – Friendly A and if implemented from Friendly B to national representation
- *MTC new / extended value sets, mapping and translation*
- *Change within third party application, if integrated natively*
- ...

Steps for implementation

- *eHDSI – PS Cluster issued Change proposal (CP-65)*
 - To start the process of Assessment by all the Stakeholders involved
 - Provide better view about the efforts needed and impact on the MS and Solution Provider
 - Support the decision on approach to apply V3 Guidelines (V2/V3 parallel, one shot,...)
- *First timeline discussions within the eHDSI shows that MS are in favor of:*
 - Start the conceptual work immediately in EU4Health incl. decision on process to apply by MS already in production with Patient Summary
 - Being ready in Wave 6 from a practical viewpoint, look at
 - Implementation Guides and specifications, validators for testing

Risks

- *Not being able to implement V3 Guidelines*
 - Specifying a new implementation guideline is work that should not be underestimated
 - MS and EC need to provide Governance structure and relevant resources
 - External expertise, recruitment of additional experts is needed
- *MS not able to provide relevant structured data*
 - New elements and sections to keep optional ?
 - Effort on the political level in MS needed to enforce implementation of coded and structured medical information within their healthcare domains
