

21ST eHEALTH NETWORK MEETING 1-2 JUNE 2022, PARIS, FRANCE

COVER NOTE

1. Proposal for improvement Coordinated Actions

1. Issue at stake

After the tremendous work that has been done by the eHealth Network on the DCC and EFGS, the eHealth Network is no longer in crisis mode. However there are still interoperability challenges ahead for the eHealth Network. There are a lot of meetings, mailings and written procedures, but limited resources in the Member States. This proposal will attempt to streamline the processes of the eHealth Network but will mainly function as a conversation starter for the breakout sessions. It will take into the account the role of the Coordinated Actions meeting, that arose during the covid crisis to enable faster decision making. The question now is: What does the eHealth Network (and the Coordinated Actions) need at this moment to progress the cooperation between the Member States in the eHealth Network taking into account the lessons learnt on cooperation the last two years.

2. Summary

Presentation by the co-chair will serve as a conversation starter for the break-out sessions on the future governance of eHealth in Europe. It will focus on the optimization of the processes of the eHealth Network and especially the role of the Coordinated Actions.

3. Format of procedure in the meeting

For discussion. Presentation by co-chair will serve as a conversation starter for the break-out sessions on the future governance of eHealth in Europe.
