

Curriculum Vitae

Personal information Saverio Affatato

Work experience

He has worked in S. Orsola Hospital (Bologna-Italy) and Performed Data Acquisition and Analysis for gamma spectrometer. Setting Up Radiology and NIR measured in Physics Laboratories and Hospital. Acquired NIR radiations. Since 1994 he has been working at the Laboratorio di Tecnologia Medica (LTM), where he is currently involved on the development of diagnostic methods for the in-vitro evaluation of prosthetic implants. In particular he has Developed, Tested and Debugged Special Software Applications to Ultrasound Digitizer 3D (Italian Patent N. BO97A000338).

From 1995 he has been involved on the development of new wear protocols for wear evaluation on Hip Joint Simulator and particle debris characterization. He teaches "computerised methods for the post surgery evaluation of Total Hip Arthroplasty" in the post-doctoral

course "Biomedical Technologies in Reconstructive Articular Surgery", University of Bologna

He was and is actually the reference person, for the Lab., for some European projects (EUREKA "EU-294", Bioker, Nanoker).

Education and training

1994 School of Specialization in Health Physics - University of Bologna, 1991 School of Specialization in Atomic and Nuclear Physics - University of Bologna 1990

Physic degree - Specialized degree ex DM 509/99 / four-year degree in the old system.

Additional information

Publications

Saverio Affatato has published more than 170 scientific articles in international journals with impact factor. They can be consulted through <u>www.scopus.com</u> [author - Saverio Affatato]
