

Curriculum Vitae

Personal information **Libera Fresiello**

Work experience

01/01/2022 – ongoing – Enschede, The Netherlands

ASSISTANT PROFESSOR – University of Twente

- Development of high fidelity in silico and in vitro cardiorespiratory simulators for the testing of artificial organs devices and their physiological controllers.
- Development of an ECMO simulator for the training of medical personnel and students

01/08/2018 – 31/12/2021 – Leuven, Belgium

RESEARCH ASSOCIATE – Katholieke Universiteit Leuven

- Creation/management/running of an engineering laboratory embedded into to the group of cardiac surgery
- Development of a new in vitro simulator for the testing of diagnostic medical imaging equipment

01/08/2017 – 31/07/2018 – Leuven, Belgium

RESEARCH ASSOCIATE – Katholieke Universiteit Leuven

(Frans Van de Werf scholarship and travel grant N. FWO-V446017N)

Visiting researcher at the Centre for Medical Physics and Biomedical Engineering, Medical University of Vienna (October 2017- February 2018)

- Conduction of a multicentre clinical study (Leuven-Vienna) to identify limiting factors of exercise capacity in LVAD patients
- Conduction of an in silico simulation study to investigate the hemodynamic interaction between the cardiovascular system and VADs during exercise.

05/08/2014 – 31/07/2017 – Leuven, Belgium

POST DOC – Katholieke Universiteit Leuven

(Marie Curie scholarship “ VAD and exercise”, FP7-PEOPLE-2013-IEF Project number 624296)

- Conduction of a clinical study to investigate exercise capacity and heart rate variability in patients with VAD and with a heart transplantation
- Feasibility study on the use of wearable technology as a monitoring system of heart failure patient’s daily activity and of their cardiac rehabilitation program
- Development of an in silico cardiorespiratory simulator for the study of complex pathophysiological conditions (e.g. exercise pathophysiology, fluid responsiveness during mechanical assisted ventilation etc.)

09/2010 – 08/2014 – Rome, Italy

COLLABORATION RESEARCH CONTRACT – Institute of Clinical Physiology, Italian National Research Council

(The research was conducted in the frame of the EU SensorART project (ICT-FP7-GA N 248763))

- Development of a modular in silico cardiovascular simulator including autonomic controls and pharmacological therapies

-Development of hybrid (numerical – hydraulic) cardiovascular simulator to study the hemodynamic effects of mechanical circulatory support systems (intra-aortic balloon pump, VAD etc.) on the cardiovascular system in different pathophysiological conditions.
-Collection and analysis of in vivo data from large animals to validate the in silico and hybrid simulators mentioned above.

09/2009 – 08/2010 – Rome, Italy

COLLABORATION RESEARCH CONTRACT – Istituto Nazionale per le Ricerche Cardiovascolari

-Development and validation of an in silico simulator for the study of the interaction between biventricular pacemaker and the cardiovascular system.
-Development and validation of a computational model for the stem cells therapy for myocardial infarction aimed at reproducing the main phenomena of diffusions of nutrients in the tissue

11/2009 – 07/2010 – Rome, Italy

COLLABORATION (AS VISITING RESEARCHER) – Institute of Clinical Physiology, Italian National Research Council

-Collaboration for the simulation of different types mechanical circulatory assist devices (PUCA pump, intra aortic balloon pump) and their comparison in terms of hemodynamic and energetics effects on the myocardium.

08/2009 – 10/2009 – Rome, Italy

COLLABORATION RESEARCH CONTRACT – Institute of Clinical Physiology, Italian National Research Council.

Realization of a computational model of a ventricular assist device as module of the software simulator CARDIOSIM©.

02/2009 – 08/2009 – Rome, Italy

VOLUNTEER RESEARCH COLLABORATOR – Institute of Clinical Physiology, Italian National Research Council.

Study of the cardiovascular physiology and lumped parameters models. Study and in simulation of mechanical circulatory support systems, their working principles and effects on hemodynamics.

Education and training

14/01/2014 – Warsaw, Poland

DOCTOR OF PHILOSOPHY (PHD) TECHNICAL SCIENCES, SPECIALIZATION IN BIOCYBERNETICS AND BIOMEDICAL ENGINEERING Republic of Poland - *Natęcz* Institute of Biocybernetics and Biomedical Engineering “*Maciej Natęcz*”

28/04/2011 – Florence, Italy

II LEVEL MASTER IN CLINICAL ENGINEERING – University of Florence

12/2008 – Rome, Italy

QUALIFICATION FOR PROFESSIONAL PRACTICE IN ENGINEERING – Ordine degli ingegneri di Roma

27/10/2008 – Rome, Italy

MASTER IN BIOMEDICAL ENGINEERING – University Campus

Projects 08/2014 – 08/2016

VAD and Exercise, European Commission, Marie Curie Actions Intra-European Fellowship, N. 624296

Investigations of exercise capacity in patients supported by a ventricular assist device. Clinical investigations in patients and development of an in silico model to reproduce the observed cardiorespiratory phenomena

2017 – 2018

Exercise with a VAD: multicenter study of pump-patient interaction to evaluate limiting factors and strategies of improvement, Frans Van de Werf Fund for Clinical Cardiovascular Research

Conduction of a multicentre clinical study (Leuven-Vienna) to identify limiting factors of exercise capacity in LVAD patients Conduction of an in silico simulation study to investigate the hemodynamic interaction between the cardiovascular system and VADs during exercise.

2014 – 2017

Exercise hemodynamics in patients subsequently undergoing LVAD therapy and heart transplantation: patient-based model building, Fonds pour la Chirurgie Cardiaque, N. 489589

Evaluation of exercise capacity in patients supported by a ventricular assist device and patients that received heart transplantation

2020 – CURRENT

An in vitro system for the evaluation of medical devices, KUL Internal funds, C3/20/033

Development of a new in vitro simulator for the testing of diagnostic medical imaging equipment

2018 – CURRENT

Improving outcome after the Ross procedure, FWO- Strategische Onderzoeksbeurs (Student Lucas Van Hoof)

Improving outcome after the Ross procedure

2020 – CURRENT

Anatomical And Functional Optimization Of A Hybrid Simulator To Support Medical Device Testing, FWO- Strategische Onderzoeksbeurs (Student Maria Rocchi)

Development of a new in vitro simulator of the cardiovascular system including 3D printed anatomical components

2019 – CURRENT

A cardiovascular simulator for medical device testing, Bilateral Project FWO-PAS, N.VS03119N

Improvement of a hybrid (computational-hydraulic) simulator of the cardiovascular system

2018 – CURRENT

Exercise physiology with a Ventricular Assist Device, KUL Internal funds, N. C14-18-080

Development of an in vitro and in vivo model to test the interaction between ventricular assist device and the cardiovascular system during physical exercise

2019 – CURRENT

CardioMiMic: a cardiovascular simulator for teaching cardiovascular pathophysiology, KUL Internal funds, Microproject

Adaptation of an in silico cardiovascular simulator for teaching and educational purposes

2017 – CURRENT

Can we improve exercise capacity in VAD patients?, Fonds pour la Chirurgie Cardiaque, N. 489618

Evaluation of limiting factors of exercise physiology in patients supported by a ventricular assist device

Memberships

International conferences/seminars/sessions organized:

- “Developing Smarter Pumps and Improving Patient Experience: Innovations in Mechanical Circulatory Support”, Avinguda de l'Hotel Castelldefels, Spain, 8-9 June 2019
- Organizer of the ICB seminar “Mechanical supports to life: Bioengineering meets clinical arena (modeling and patients' data)” at the Nalecz Institute of Biocybernetics and Biomedical Engineering, Polish Academy of Sciences, Warsaw Poland, 21-23 May 2018
- Member of the organizers of 6 annual young European Society for Artificial Organs (yESAO) conferences, from 2011 to 2016
- Member of the organizing committee of the XLII European Society for Artificial Organs (ESAO) conference in Leuven, Belgium, 2-5 Sept. 2015
- Member of the organizing committee of the XLI European Society for Artificial Organs (ESAO) conference in Rome, Italy, 17-20 Sept. 2014
- Board member of the ISMCS (International Society for Mechanical Circulatory Support), 2019 -2023
- Member of the ESAO (European Society for Artificial Organs), 2011 - till now
- Member of theVPH (Virtual Physiological Human), 2021-till now
- Member of the organizers of the “young ESAO”, 2011-2016

Other Relevant Information

Honors and Rewards:

2019

ESAO-SAGE Research Award – European Society for Artificial Organs

2017

Best abstract and presentation, AMAC conference – Conference on Applied Modeling in Acute Care

2016

Best poster award at the XLIII ESAO conference – European Society for Artificial Organs

2014

ESAO PhD Award for excellent PhD theses – European Society for Artificial Organs

2014

Special Prize for the PhD thesis – **Natęcz** Institute of Biocybernetics and Biomedical Engineering, Polish Academy of Sciences
