I received a funding by the Bavarian Ministry of Economic Affairs, Energy and Technology for a research project on electromagnetic interference between Cardiovascular Implantable Electronic Devices (CIED) and body scanners for security controls.

I received a funding by the Deutsche Stiftung für Herzforschung for a research project on electromagnetic interference between CIED and e-Mobility.

I work for the German Heart Centre Munich and several colleagues provide advice to several medical device companies in all fields of non-invasive and invasive cardiology.

I am an active member of the European Society of Cardiology (ESC), the European Heart Rhythm Association (EHRA), the German Society of Cardiology (DGK), which are partly funded by several medical device companies. I received and will receive fellowships, scholarships, educational grants and reimbursement of reasonable expenses directly related to conference/seminar attendance (i.e. accomodation, travel costs) by those organisations.

I participated the German Society of Cardiology (DGK) annual conference 2021 as chairman of a scientific session (on April 8th), which has been sponsored by Medtronic but open to the public via live and remote-stream. I do not received any payment or honorarium by the company.

I confirm the information declared on this form is accurate and complete to the best of my knowledge and I acknowledge that my information will be stored electronically and published on the website of the European Commission.
