

# CEF eDelivery Presented at the ENTSOG Workshop on Data Communication Harmonization for Gas Transmission

## CEF eDelivery Presented at the ENTSOG Workshop on Data Communication Harmonization for Gas Transmission

European Commission, 2017

On 16 May 2017, the European Commission presented the Connecting Europe Facility (CEF) eDelivery building block at the ENTSOG [Workshop on Data Communication Harmonization for Gas Transmission](#).

The CEF eDelivery building Block helps users to exchange electronic data and documents with one another in a reliable and trusted way.

The e-SENS AS4 profile promoted by CEF eDelivery and the one of ENTSOG are very similar. Both initiatives are therefore analysing how to align and find synergies moving forward.

This will result in more collaboration opportunities in the near future.

The role of ENTSOG (the European Network of Transmission System Operators for Gas) is to facilitate and enhance cooperation between national gas transmission system operators across Europe in order to ensure the development of a pan-European transmission system in line with European Union energy goals.

To see how CEF eDelivery, and other building blocks (eID, eInvoicing, eSignature and eTranslation), are Connecting Europe, [visit CEF Digital 2018 now](#).
