# Resources - Clinical Semantics

## Purpose

The purpose of this page is to list relevant resources about Semantics in the eHealth domain, including links to resources in the Internet or books and articles from the medical literature.

This list refers not only to terminology resources (SNOMED CT, LOINC, etc), but also to the information models in which the controlled vocabularies are used, with emphasis in HL7 standards as well as in other initiatives (e.g. CEN/ISO 13606 and openEHR).

### Table of Contents

- **General (Terminology resources & Information models and other Standards)**
  - Articles in the biomedical literature
  - Books
- **LOINC**
  - Articles in the biomedical literature
  - Books
  - Videos
- **SNOMED CT**
  - Articles in the biomedical literature
  - Online learning
- **Other**
  - Books

*This page is under continuous improvement*

Please, help us building this list of resources with your suggestions using this link. Thanks very much for your contribution!
General (Terminology resources & Information models and other Standards)

Articles in the biomedical literature

Books

**LOINC**

**Articles in the biomedical literature**

**Books**

- Vreeman DJ. LOINC Essentials - A step by step guide to getting your local codes mapped to LOINC. [Info.]

**Videos**

- [LOINC for Beginners.](#) DJ Vreeman (Director, LOINC and Health Data Standards Regenstreif Center for Biomedical Informatics)
- [Understanding the structure of LOINC Names.](#) DJ Vreeman (Director, LOINC and Health Data Standards Regenstreif Center for Biomedical Informatics)

---

**SNOMED CT**

**Articles in the biomedical literature**

**Online learning**

- SNOMED International offers [FREE online Courses about SNOMED CT](https://elearning.ihtsdotools.org/) (htps://elearning.ihtsdotools.org/)

---

**Other**

**Books**

- Chute CG, Sato L, Cheetham E. Medical Informatics - Knowledge Management and Data Mining in Biomedicine. Springer, Boston, MA; 2005. [Accessible online.]
