

eHealth DSI Operations Home

eHDSI Mission, Governance and Communities

Welcome to the eHealth Digital Service Infrastructure!

The eHealth Digital Service Infrastructure (eHDSI or eHealth DSI) is the initial deployment and operation of services for cross-border health data exchange under the Connecting Europe Facility (CEF). eHDSI sets up and starts deploying the core and generic services, as defined in the CEF, for Patient Summary and ePrescription. The generic services are the necessary implementation of data exchange at country level, the core services at EU level. These together enable the provision of Cross Border eHealth Information Services (CBeHIS).

The **eHealth Operations** knowledge base hosts the **eHDSI Operational Management Board (eHOMB)** and **eHDSI Member State Expert Group (eHMSEG)**. The eHDSI Operations provides a vehicle for stakeholders to handle all operational matters of the CEF eHealth eHDSI. It aims to ensure that the European Commission orchestrates the implementation process of the DSI with the committed and active participation of the Member States and to ensure user organisations and standardization bodies play a role.

 **EXTENDED Week: Wave 3 Formal & Upgrade Test**

NEW Due to the COVID-19 crisis, some of the MS could not complete all the Conformance and E2E Functional Tests for some or all of their services. Therefore, this **Extended Test Week** from 22 Jun 2020 till 26 Jun 2020 comes as an additional time frame for MS to complete the Wave 3 Formal & Upgrade Test Session.

EXTENDED Test Week - 22nd - 26th June
