

Start using Digital Signature Services (DSS) - Demo

Start using Digital Signature Services (DSS)

1. [What is DSS?](#)
2. [How can it be used?](#)
3. **Demos of DSS**
4. [Releases and Bitbucket](#)

3. Demos of DSS for electronic signature creation, extension and validation

The CEF eSignature building block maintains a demonstration tool that allows everybody interested in the DSS functionalities to try them out.

The demo tool is a web application that, among others, allows users to:

- upload and sign a document
- upload and sign multiple documents
- access REST / SOAP webservices
- extend an electronic signature
- validate an electronic signature

The DSS demonstration tool is accessible from [here](#)
